## A Place of Happiness 1

D2202S44045-3550

A Place of Happiness captures the serene beauty of a Mediterranean Seaside town. A great expanse of aquamarine sea is viewed from a bright white structure that reflects the region's traditional architecture with its arched windows. One's gaze travels further out to magnificent rock formations in the distance that offer a striking contrast to the smooth surface of the sea. The photograph evokes a sense of peace, beauty, and happiness and grants a glimpse into the timeless charm of this coastal paradise.

A distinct focal shift from foreground to background creates a rich dichotomy between natural beauty and rigid architectural forms. Part of ART by TA, A Place of Happiness is an exclusive and original work of art. Shown on textured paper in a grey cap frame.
