

ASSEMBLY & INSTRUCTIONS

**IMPORTANT! TO PREVENT ELECTRICAL SHOCK,
TURN OFF ELECTRICITY AT CIRCUIT BREAKER
OR FUSE BOX BEFORE PROCEEDING WITH INSTALLATION.**

Remove all parts and parts packages from carton.

1. Attach circular strap (3) to outlet box (1) with screws (4) using the slots in the circular strap. Make sure that the green ground screw (7) mounted to circular strap faces outward.
2. Make wire connections: splice the black fixture wire to the black supply wire and the white fixture wire to the white supply wire. Make connections with wire connectors (2).

**CAUTION: BE CERTAIN THAT NO BARE WIRE STRANDS
ARE EXPOSED OUTSIDE OF THE WIRE CONNECTORS.**

3. Attach house ground wire to fixture ground wire with wire connector. Otherwise, attach ground wires to circular strap (3) using green ground screw (7).
4. Mount the Canopy (5) to the circular strap (3) allowing screws (6) to pass through holes in the canopy, secure with ball nuts (8).
5. Attach reflector (11) to the fixture (10) with screws (9).
6. The installation is now complete and power may be reconnected at the main fuse box.
