Important Planning!

Call 811 to Locate Utility Before You Dig

You can also call your local utility companies to have your area marked.

Confirm Local Building & Safety Code

Codes vary in each state and county. Especially if Gate automation is added in the projects future. Your local building and fire inspectors can advise you on what your local codes are.

Hardware Packet

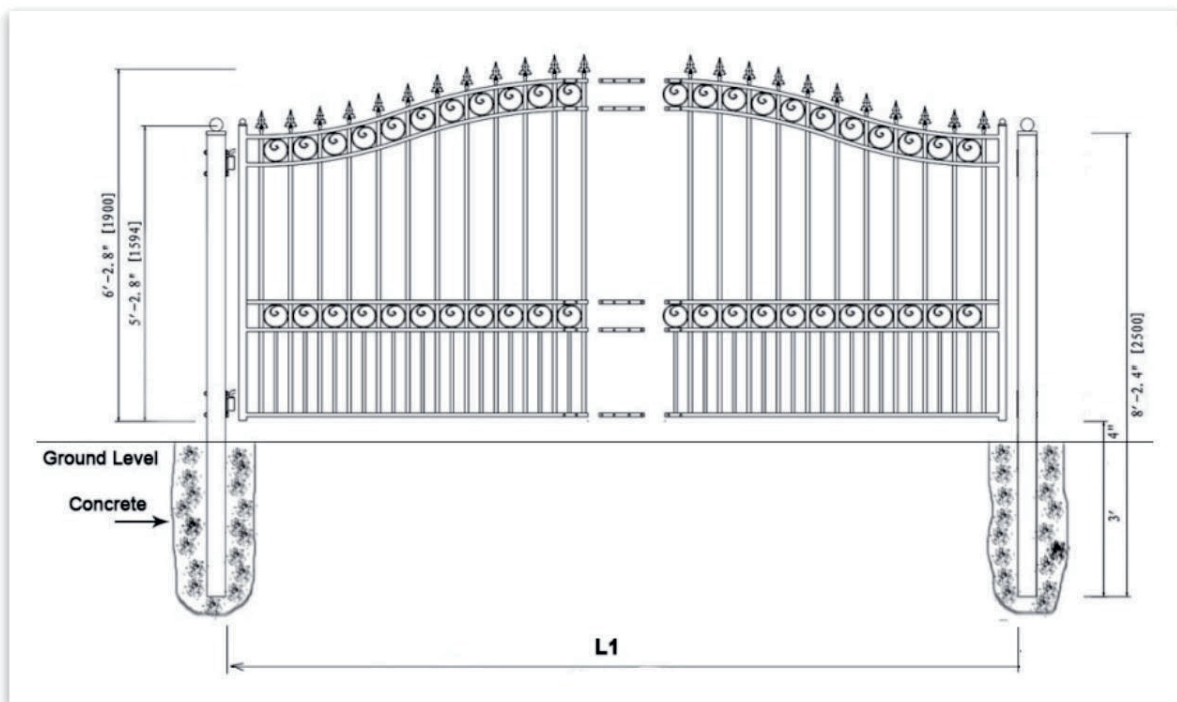

- 2 Panels of Gates
- 2 Posts
- 2 Hinges
- 1 Set of Assembly Brackets
- 1 Set of Bolts and Nuts

Tools Needed

Tape Measure ···A Can of white paint (Athletic Striping)··· 2 Stakes··· Mallet··· Quick Set Concrete (7-8 bags). ..Hoe to Mix concrete···Water Bucket ···Wheelbarrow···post hole digger···Shovel···Box beam level & Line Level··· String Line··· Wrenches (Sizes 3/4" & 1/2")···Grease Gun

Gate Size / Distance Between Inside of Gate Posts

L2	=	12'	/	144 1/4"
L2	=	14'	/	168 1/4"
L2	=	16'	/	192 1/2"

Part 1

Install Posts

Mark the post locations with a (X) in white paint and call **811**

After utilities have been located dig holes **36" deep**. Place posts in holes and check for level and correct distance apart. Pull the string level firm from post to post points.

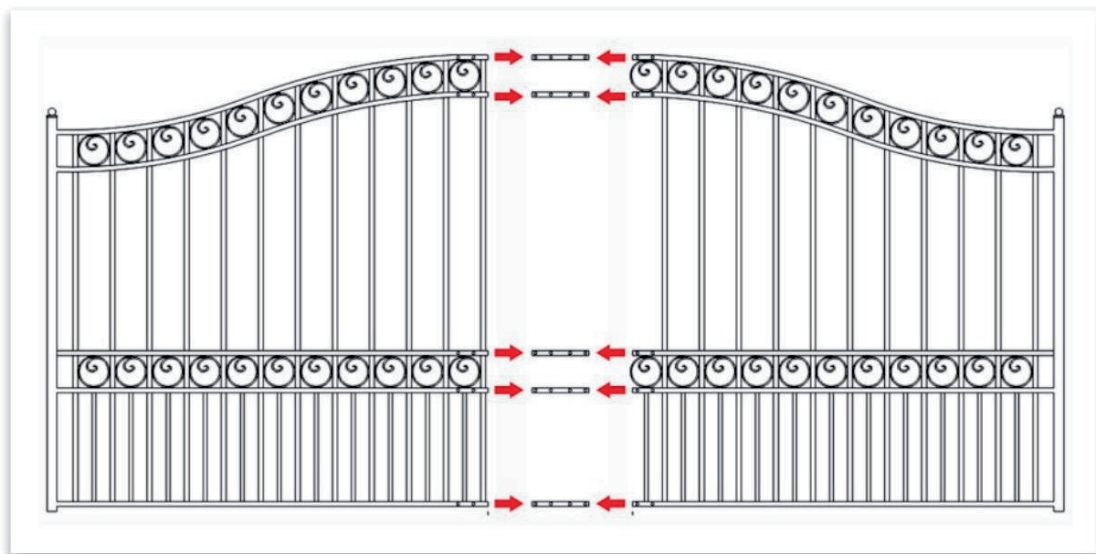

Adjust height of posts pounding down on the Posts or adding site debris under the post to get the correct bottom of the gate height.

Mix concrete & fill holes taking care to not move the posts. **POSTS NEED 3-4 DAYS FOR CONCRETE TO SET.**

Part 2

Gate assembly

Please assemble two part of gate with special assembly brackets and hardware.

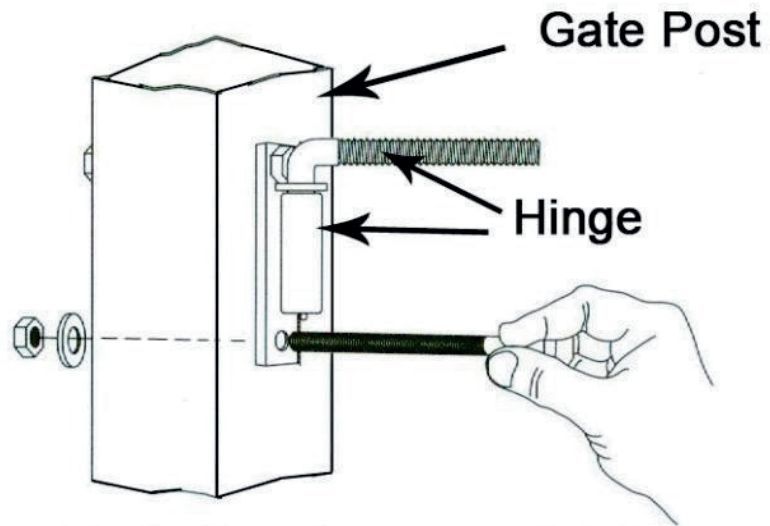

Part 3

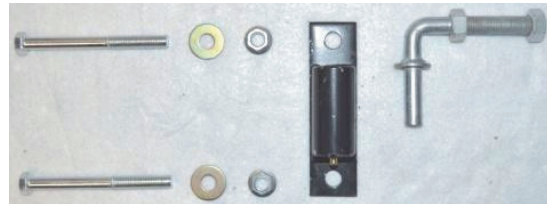

Hanging the Gate

Bolt Hinges to hinge post.

Hang Gate on "J" Hinge and adjust as required.

Set of the Hinge

Post with Hinge
