

Inspired by the silhouette of a mountain emerging through mist, Cén combines sculptural simplicity with carefully considered details.

A hand-blown glass diffuser, softly sandblasted from within, creates a warm and inviting illumination. The addition of a subtle gold ring detail introduces contrast and depth, accentuating the transition between light and form while adding a refined visual signature.

Offered in Dark Concrete, Shiny Black, Oatmeal, and Olive Green finishes, Cén adapts effortlessly to a variety of interior settings—from minimal and contemporary to warm and residential.

Elegant without excess, Cén is designed to create atmosphere through both its presence and its light.
