Parts List

Models		VPSSMTCDG-3	VPSSMTTCDG-3
Part Name			
P1		15	15
P2		12	24
P3		9	18
P4		3	3
P5		12	24
Gloves		1	1

Safety Precautions

This product may contain sharp corners and edges. To prevent injury:

- Handle with care at all times
- Wear gloves, closed-toe shoes & long pants when handling
- Work on a stable, clean surface away from children and pets
- Follow all instructions carefully and use tools only as directed

If you are unsure about any step, pause and seek assistance.

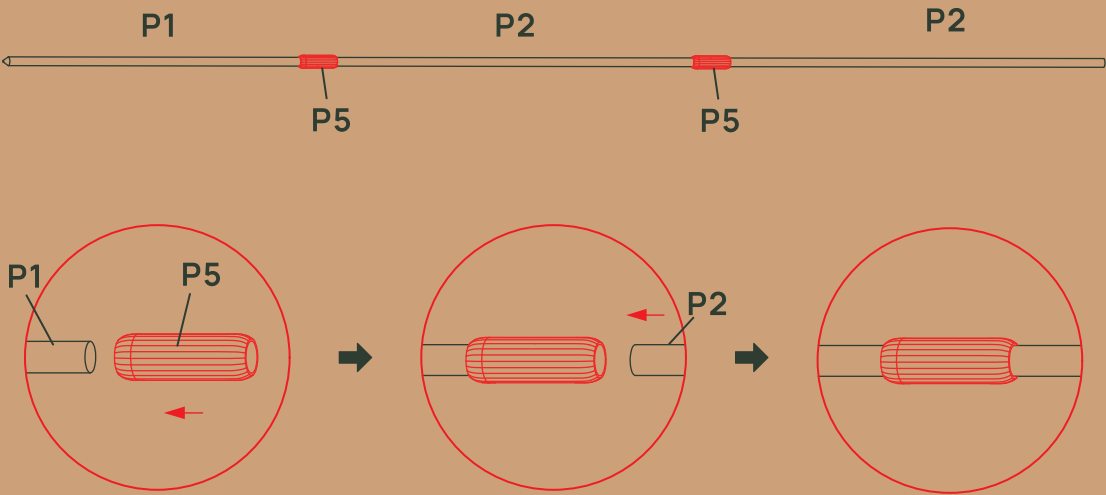

MAXGROW TOMATO TOWER 6 TIER

VPSSMTTCDG

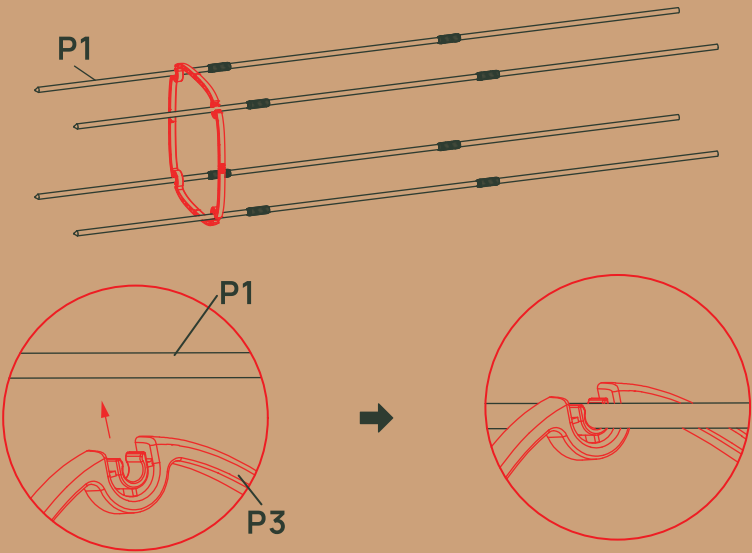

1 Connect P1 and P2 rods using P5 connectors. Repeat this to make 4 identical sections.

Note: Make sure each connector is fully inserted.

2 Install the Bottom Ring
Attach the bottom ring (P3) by snapping the four assembled vertical rods (at the P1 positions) into the four corners of the ring. Position the ring approximately 18 inches (45 cm) above the pointed ends of the rods.

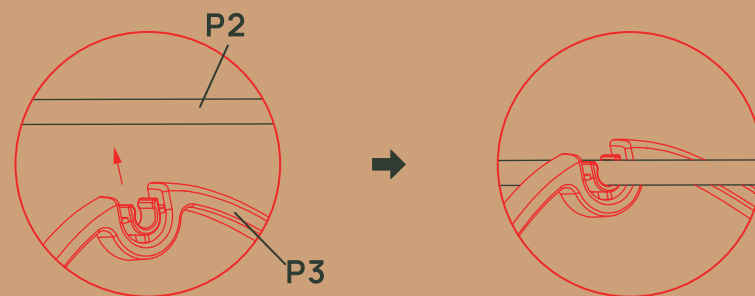

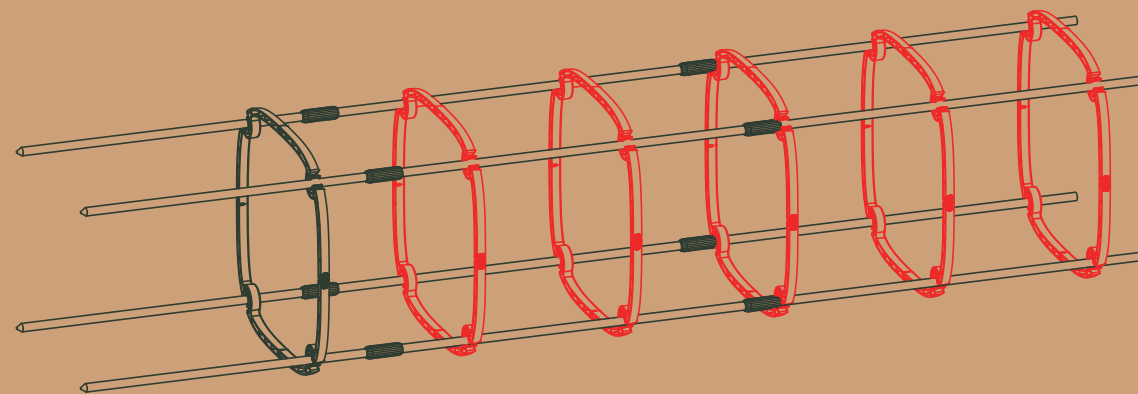

Note: Make sure the ring is level before pressing it firmly into place.

- 3** Install the remaining five rings evenly along the vertical rods. Space the rings approximately 12 inches (30 cm) apart.

Tips:

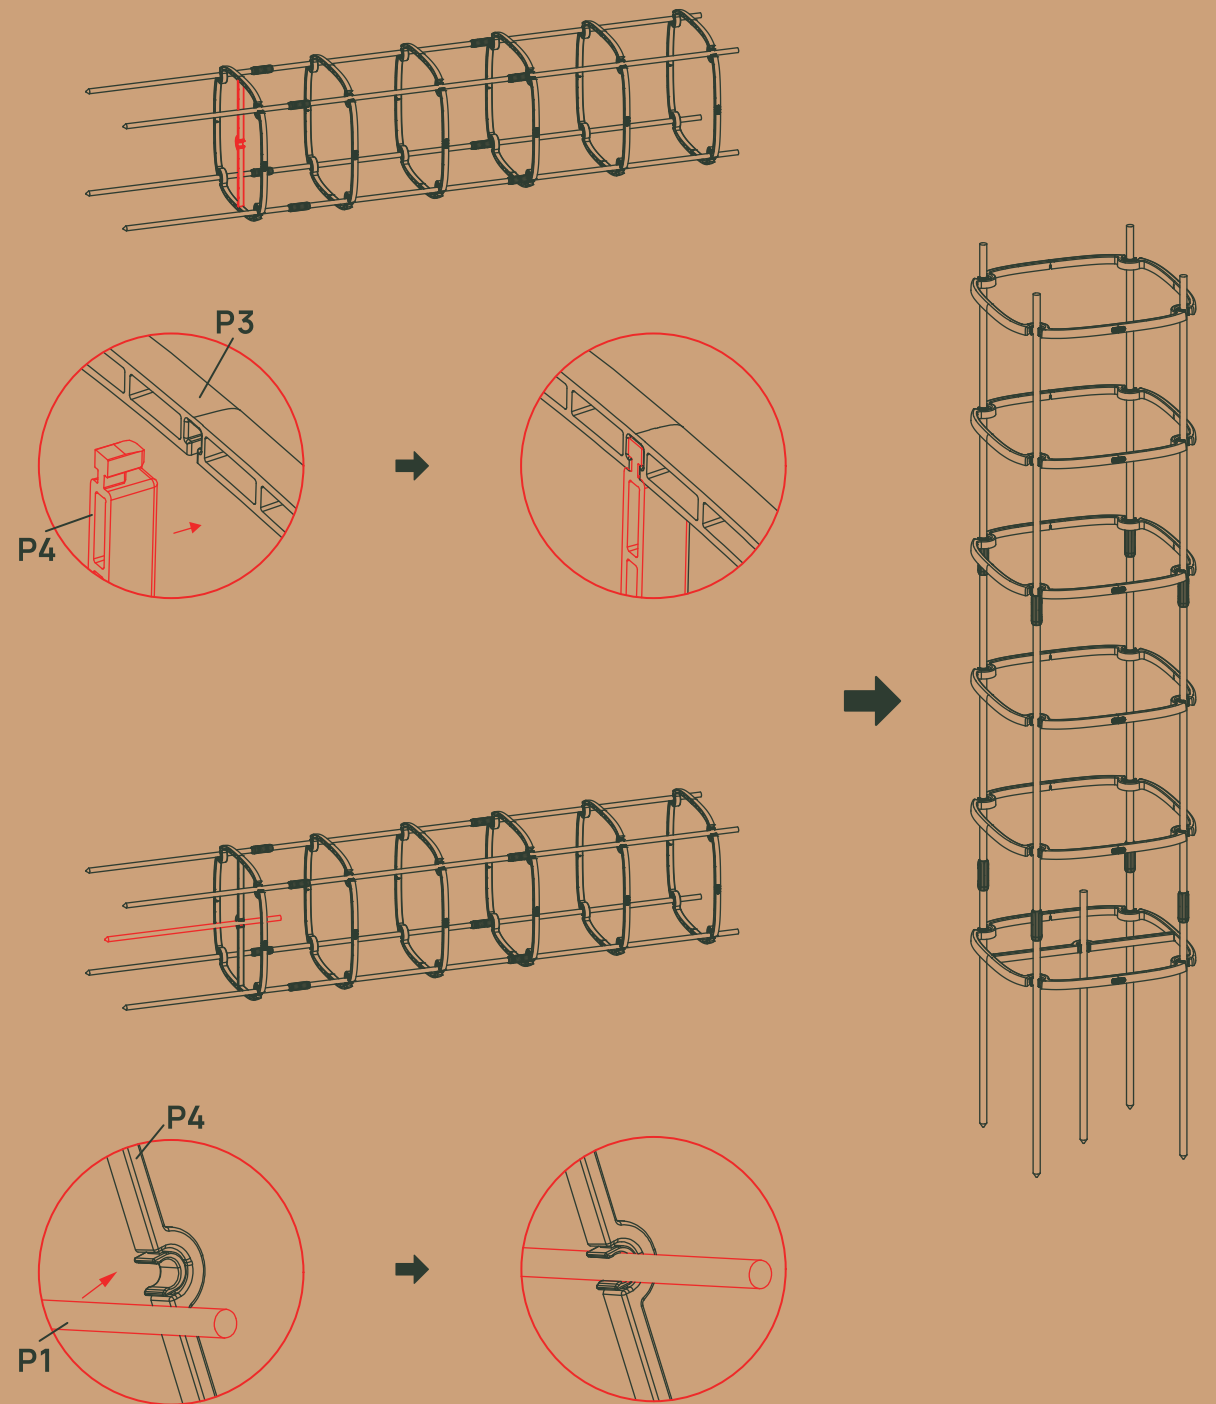

- Even spacing helps provide balanced support as your plants grow.
- To protect the weather-resistant coating, avoid sliding the rings along the rods. If height adjustment is needed, remove the ring and reinstall it at the desired position. This helps prevent coating damage, rust, and loose connections.

- 4** Insert the crossbar (P4) into the bottom ring (P3) as shown in the diagram.

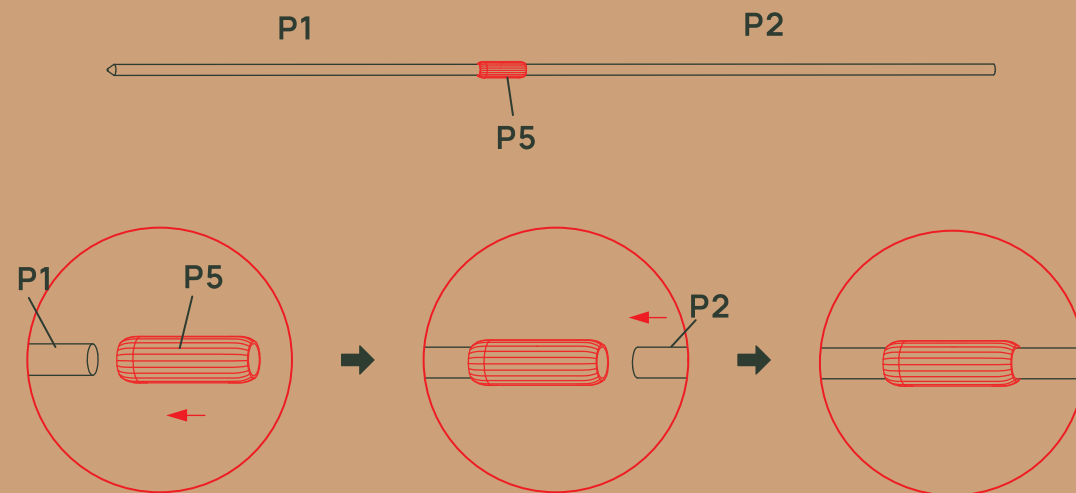

Then snap the P1 rod into the center slot of the crossbar to secure it in place.

You can now insert the legs into the soil and get to growing!

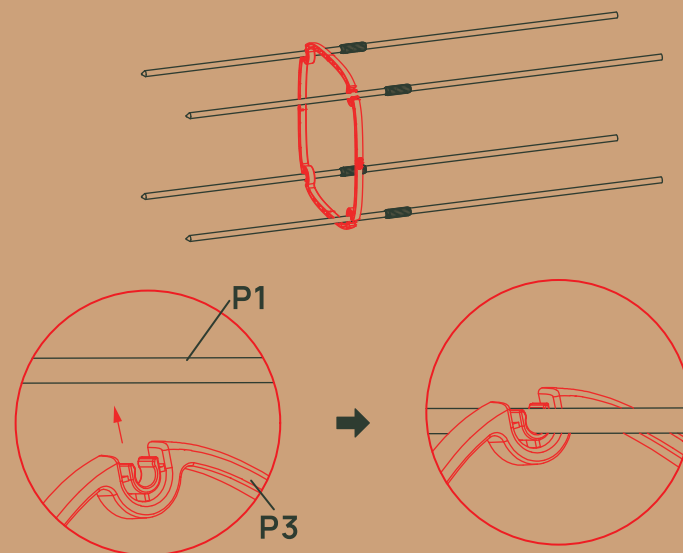

- 1 Connect P1 and P2 rods using P5 connectors. Repeat this to make 4 identical sections.

Note: Make sure each connector is fully inserted.

- 2 **Install the Bottom Ring**
Attach the bottom ring (P3) by snapping the four assembled vertical rods (at the P1 positions) into the four corners of the ring. Position the ring approximately 18 inches (45 cm) above the pointed ends of the rods.

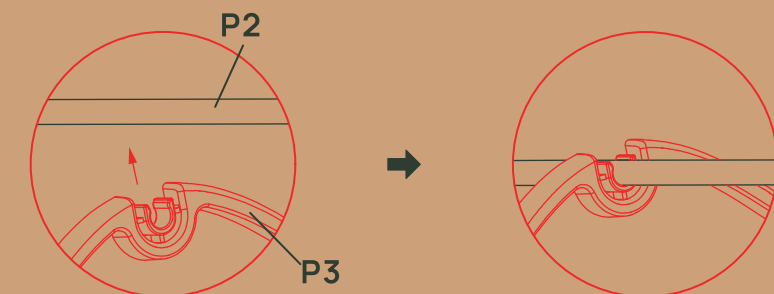

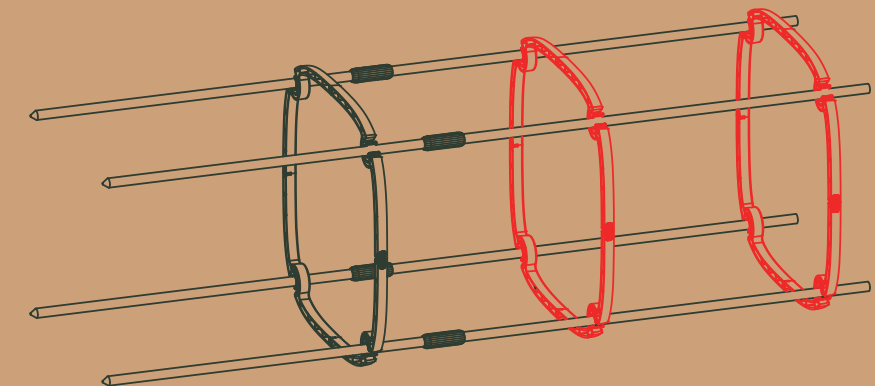

Note: Make sure the ring is level before pressing it firmly into place.

- 3 Install the remaining two rings evenly along the vertical rods. Space the rings approximately 16 inches (40 cm) apart.

Tips:

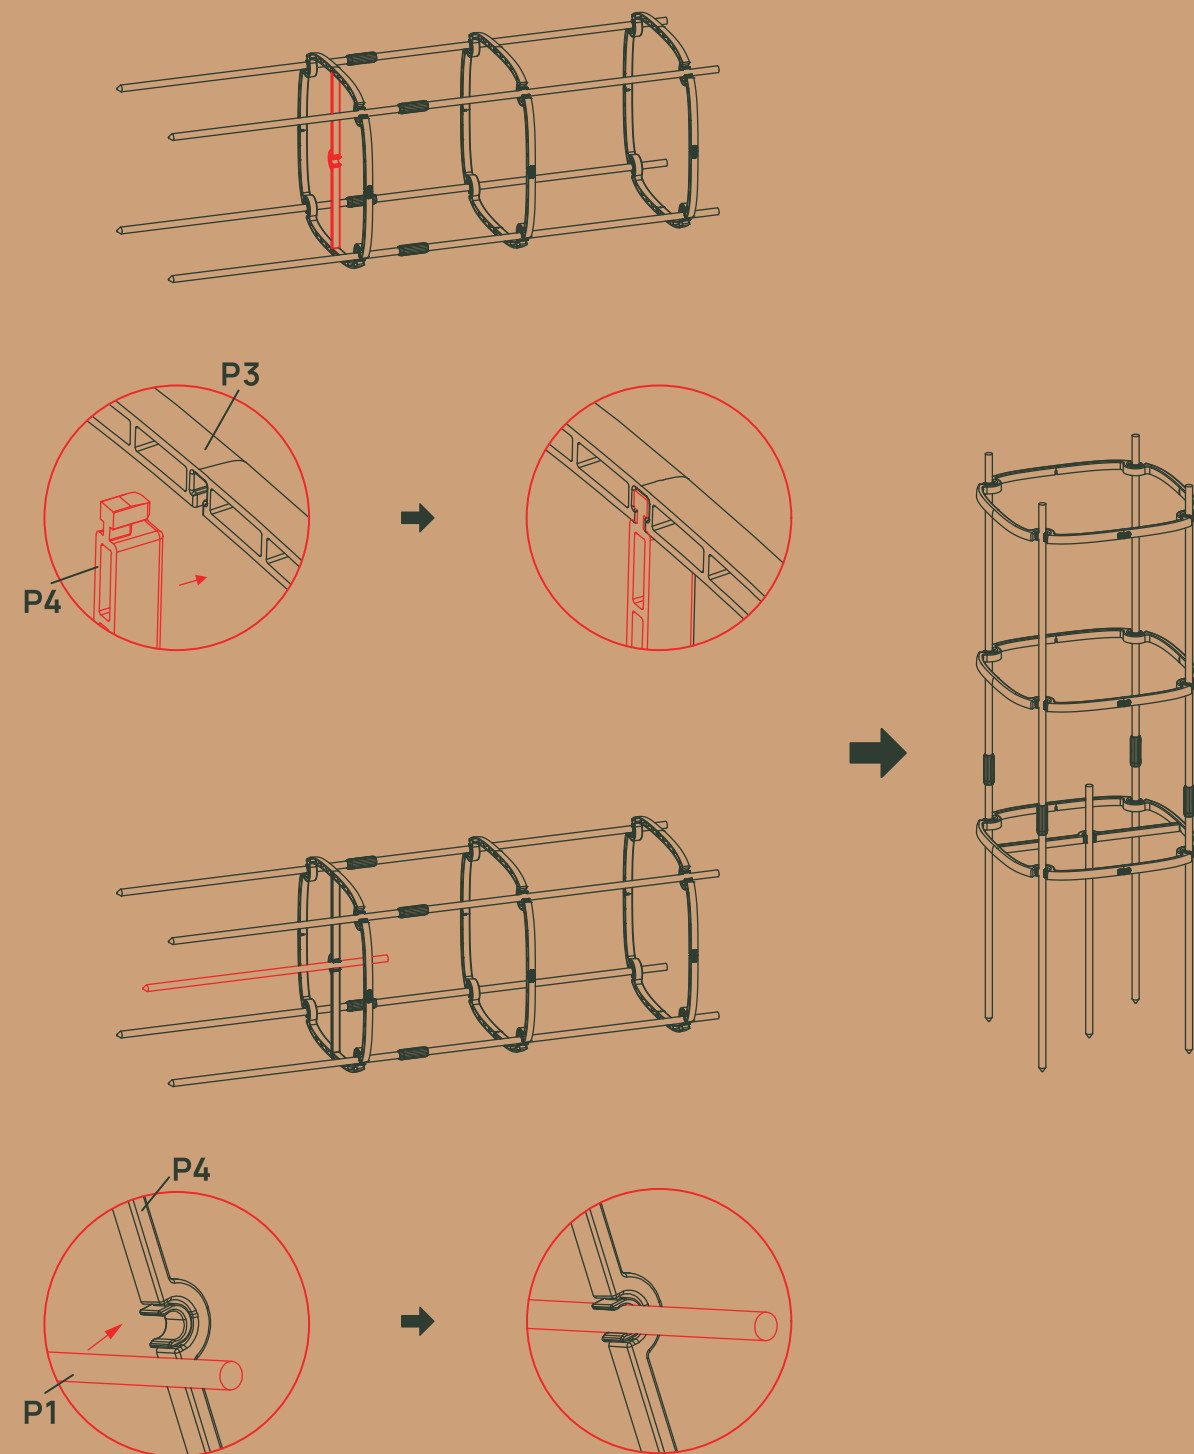

- Even spacing helps provide balanced support as your plants grow.
- To protect the weather-resistant coating, avoid sliding the rings along the rods. If height adjustment is needed, remove the ring and reinstall it at the desired position. This helps prevent coating damage, rust, and loose connections.

- 4** Insert the crossbar (P4) into the bottom ring (P3) as shown in the diagram.

Then snap the P1 rod into the center slot of the crossbar to secure it in place.

You can now insert the legs into the soil and get to growing!

Important

For your safety, please ensure the structure is securely fastened using connectors and ties. In windy areas, be sure to anchor your tomato cages firmly to the ground. This will keep strong winds from tipping it over and harming your plants.

Maintenance

To extend the life of your tomato cage, we recommend washing it clean, allowing it to air-dry, and storing it in a dry, covered place at the end of the season. The trellis is finished with a protective powder coating. If the coating becomes scratched, simply touch it up with polyurethane to help prevent rust.

Warranty and Support

Tomato Cage Warranty

Warranty: 1 Year Structural Guarantee

Exclusions: Damage caused by misuse, improper installation, or modifications is not covered.
