

Ovente BPA-Free Cordless Electric Kettle with Auto Shut-Off, Double-Walled Stainless Steel, 1100W, 1.7L (KD64 Series)

\$24.99

Key Features

TEMPERATURE-LOCKED – The Ovente Electric Kettle KD64 series features a double-wall stainless steel interior, a smart innovation that keeps your beverages’ temperature locked for a longer period of time. The boiled water stays piping hot while the kettle’s exterior remains comfortable to touch. Plus, the kettle doubles as a pitcher. Just pour in cold water and some ice!

ULTRA EFFICIENT – This hot water boiler kettle runs on 1100W (120V), and it can bring a 1.7L pot of water to a rolling boil in just minutes, helping you save more on electricity bills! It is 50% more efficient than using traditional stovetop kettles in reducing your daily electricity use.

FAIL-SAFE OPERATION – Designed with auto shut-off and boil-dry protection, this kettle saves you from mishaps, even if you accidentally left the kettle on! The kettle shuts off on its own when the pot has reached its boiling temperature and then turns off the heating element when there is no water in the kettle. It also has a power on indicator light so you can check if the kettle is ON at one glance.

Additional Info

SKU	KD64 Series
