## REPLACEMENT PARTS

[www.skywalkertrampolines.com](http://www.skywalkertrampolines.com)

### WARNING

Read the assembly, installation, care, maintenance, and use instructions in this manual prior to assembling and using this trampoline. Save this manual for future reference.

### WARNING

High Wind: The trampoline can be blown around by high winds. The only sure method to protect your trampoline and the surrounding environment during high winds is to completely disassemble the unit and store indoors. The manufactures warranty does not cover any type of wind or weather damage.

# USE INSTRUCTIONS

## WARNING

To reduce the risk of serious injury, read and follow all of the warnings, precautions, and instructions in this manual before you use the trampoline enclosure. Warnings and instructions for care, maintenance, and use of this trampoline and enclosure are included to promote safe, enjoyable use of this equipment.

1. It is the responsibility of the owner and supervisors of the trampoline and enclosure to make sure all users obey the safety instructions given in this manual. The trampoline should only be used with mature, knowledgeable supervision.
2. Secure the trampoline and trampoline enclosure against unauthorized and unsupervised use. If you use a ladder to get on and off the trampoline, be sure to remove it when the trampoline and enclosure are not being used.
3. Be sure there is enough clear space above the trampoline and enclosure before use. It is best to have at least 24 feet (7.3 meters) of clear space above the ground. This space must be clear of wires, tree limbs, and any other possible hazards.
4. Lateral (sidewise) clearance is very important. Do not place the trampoline and enclosure near walls, buildings, fences, sidewalks, and other play areas. Always keep a clear space on all sides of the trampoline and enclosure.
5. Remove any objects that could interfere with the performer. Maintain a clear area around and under the trampoline.
6. Be sure the trampoline and enclosure are on a level surface before use.
7. Always inspect the trampoline and enclosure before each use. Make sure that the frame, padding, netting, enclosure tubes, and foam sleeves are correctly and securely positioned. Replace any worn, defective, or missing parts. (Jumpers may be hurt if the trampoline and enclosure are used when they are in poor condition.)
8. Bounce only when the surface of the mat (bed) is dry. There should be very little or no wind or air movement. The trampoline and enclosure must not be used in gusty or severe winds.
9. The trampoline and enclosure frames are made of metal. They are not grounded and will conduct electricity. For this reason, an electrocution hazard exists. No lights, electric heaters, extension cords, or household electrical appliances are to be permitted on the trampoline or in enclosure at any time.
10. Use the trampoline and enclosure in an area with lots of light. If the trampoline and enclosure are indoors or in shady areas you may need to use artificial (electrical) lighting in the area.
11. During the winter months the trampoline soft materials will need to be removed and stored in a dry place. If left up in the winter months it may cause damage to the springs, jump mat, spring pad and enclosure. The warranty will be void.
12. This trampoline and enclosure is made for users who weigh less than 100 pounds.
13. This Trampoline is designed for 3-7 years of age.
14. The trampoline enclosure is to be used only with the size of trampoline for which the enclosure is designed.
15. Misuse and abuse of the trampoline enclosure is dangerous and can cause serious injury.
16. Do not attach anything to the enclosure barrier that is not a manufacturer-approved accessory or part of the enclosure system.
17. Please remove any jewelry before jumping begins. Jewelry may get caught in the enclosure netting.
18. Wear clothing free of drawstrings, hooks, loops, or anything that could be caught in while using the trampoline/enclosure and result in entanglement and strangulation, or both.
19. **DO NOT** let more than one person inside the trampoline enclosure at the same time. Two or more people jumping at the same time can cause serious injury.
20. **DO NOT** jump on the trampoline while you have or are holding any objects, especially something sharp or breakable.
21. **DO NOT** use the trampoline and enclosure if you have been using alcohol or drugs.
22. **DO NOT** attempt or allow summersaults (flips) on trampoline. Landing on the head or neck can cause serious injury, paralysis, or death, even when landing in the middle of the jumping bed.
23. Always climb on to and off of the trampoline. It is a dangerous practice to jump from the trampoline to the floor or ground when dismounting, or to jump onto the trampoline when mounting. **DO NOT** use the trampoline as a springboard to other objects.
24. Enter and exit the enclosure only at the enclosure door or barrier made for that purpose.
25. **DO NOT** attempt to crawl under, jump over, intentionally bounce off of, hang from, climb on, kick, or cut the barrier netting.
26. While keeping head erect, focus eyes on the trampoline toward the perimeter. This will help control bounce.
27. Stop bouncing by flexing knees as feet come in contact with the trampoline bed. Learn this skill before attempting others.
28. Avoid bouncing too high. Stay low until bounce control and repeated landings in the center of the trampoline can be accomplished control in more important than height.
29. Avoid bouncing when tired. Keep turns short.
30. Learn Fundamental bounces and body positions thoroughly before trying more advanced skills. A variety of trampoline activities can be carried out performing the basic fundamentals in various series and combinations, performing one fundamental after another, with or feet bounces between them.
31. For additional information concerning the trampoline equipment contact the manufacturer. For information concerning skill training, contact a certified trampoline instructor.

## WARNING LABEL PLACEMENT

The labels shown on this page have been attached to the trampoline in the indicated locations. The Safety Instructions. If one of the labels is missing or illegible, call our Customer Care Hot Line toll-free at 1-866-603-Jump (5867), Monday through Friday, 8 a.m. until 5 p.m. Mountain Time, to order a free replacement label. Attach the label onto the Bouncer frame..

### WARNING LABEL LOCATED ON THE BOUNCER LEG

Note: The label shown is not actual size.

## WARNING

- Do not use without frame pads.
- Do not attempt or allow somersaults. Landing on the head or neck can cause serious injury, paralysis, or death, even when landing in the middle of the bed.
- Inspect the trampoline and parts before use. Replace any worn or damaged parts.
- One person on the trampoline at a time. Use by more than one person at the same time increases the chances of injury.
- Use trampoline only with mature, knowledgeable supervision.

### Specific use Limitations HIGH WIND

It is possible for the trampoline and enclosure to be blown about by high winds. If you expect high winds, move the trampoline and enclosure to a sheltered location. Disassemble (take down) the enclosure netting. Tie the trampoline frame down to the ground using ropes and stakes (not included). The only sure method to protect your trampoline and the surrounding environment during high winds is to completely disassemble the unit and store indoors.

## BEFORE YOU BEGIN

Thank you for choosing your Skywalker Trampolines brand Trampoline. Skywalker Trampoline round Trampolines are designed and crafted to provide many years of fun and fitness. This trampoline comes equipped with warnings and instructions for the assembly, care, maintenance, and use of the trampoline. This information must be read by all trampoline supervisors and users before any person is allowed to jump on the trampoline.

If you have questions after reading this manual, please call our toll-free Customer Care Hot Line at 1-866-603-Jump (5867), Monday through Friday, 8 a.m. until 5 p.m. Mountain Time (excluding holidays). To help us assist you, please mention the model and name of the trampoline when calling. (See the inside cover of this manual.)

# TRAMPOLINE SAFETY INFORMATION

In trampoline use, as in all active recreational sports, participants can be injured. However, there are steps that can be taken to reduce the risk of injury. In this section, primary accident patterns are identified and the responsibilities of supervisors and jumpers in accident prevention are described.

## ACCIDENT CLASSIFICATION

**Somersaults (flips):** Landing on your head or neck, even in the middle of the trampoline mat, increases the risk of a broken back or neck, which can result in paralysis or death. Such events can occur when a jumper makes an error trying to perform a forward or backward somersault (flip). Do not perform somersaults (flips) on this backyard trampoline.

**Multiple Jumpers:** More than one jumper at a time on the trampoline increases the chance of a jumper becoming injured by losing control of his or her jump. Jumpers may collide with one another, fall off of the trampoline, fall onto or through the springs, or land incorrectly on the mat. The jumper weighing the least is the jumper most likely to be injured.

**Mounting and Dismounting (Getting On and Off):** The trampoline mat is several feet above ground level. Jumping from the trampoline to the ground or any other surface may result in injury. Jumping onto the trampoline from a roof, deck, or other objects also presents a risk of injury. Smaller children may need assistance getting onto or down from the trampoline. Climb carefully onto and off of the trampoline. Do not step onto the springs or the frame pad. Do not grasp the frame pad to pull yourself onto the trampoline.

**Striking the Frame or the Springs:** Injury may result from hitting the frame or falling through the springs while jumping or getting onto or off of the trampoline. Stay in the center of the mat when jumping. Be sure to keep the frame pad in place to cover the frame. The frame pad is not made or intended to support the weight of the trampoline user. Do not step or jump directly onto the frame pad.

**Loss of Control:** Jumpers who lose control of their jumps may land on the mat incorrectly, land on the frame or springs, or fall off of the trampoline. A controlled jump is one where the landing is in the same spot as the takeoff. Before learning a more difficult stunt, you should be able to do one before over and over with control. Attempting a stunt beyond present skill levels increases the chance of loss of control. To regain control and stop your jump, bend your knees sharply when you land.

**Alcohol or Drug Use:** The chance of injury increases when a jumper has consumed alcohol or taken drugs. These substances impair a person's reaction time, judgment, and physical coordination.

**Encountering Objects:** Jumping on a trampoline while other people, pets, or objects are underneath it will increase the chance of getting hurt. Jumping while holding or having an object on the trampoline, particularly one that is sharp or breakable, will increase the chance of injury. Placing a trampoline too close to overhead electrical wires, tree limbs, or other objects can increase the chance of injury.

**Poor Maintenance of the Trampoline:** Jumpers may be injured if a trampoline is used when it is in poor condition. A torn mat, bent frame, broken spring, or missing frame pad, for example, should be replaced before anyone is allowed to jump. Inspect the trampoline before each use.

**Weather Conditions:** A wet trampoline mat is too slippery for safe jumping. Gusty or high winds can cause jumpers to lose control. To reduce the chance of injury, use the trampoline only when the weather is good.

**Access:** To prevent access to the trampoline by unsupervised smaller children, the optional access ladder should always be taken away and stored in a safe place when the trampoline is not in use.

## ENCLOSURE SAFETY INFORMATION

### NEED FOR TRAMPOLINE ENCLOSURE SAFETY

A trampoline enclosure is a recreational product.

The information on this page and on pages 7-9 identify important safety precautions. The precautions are not all-inclusive, because an enclosure can be used in ways that this manual cannot cover completely.

To prevent pinches and cuts during enclosure use, a frame pad must be installed on the trampoline (See the trampoline manufacturer's instructions). The frame pad must be placed on the trampoline before the enclosure is erected. The frame pad reduces the chance of injury from accidental contact with the springs and frame.

### USING THE ENCLOSURE SAFELY

#### Adult Supervision of Children

Children using a trampoline with a trampoline enclosure must be supervised by adults. Young children must be supervised constantly. Adults must pay particular attention to:

- things that children bring into the enclosure.
- children's activities inside the enclosure.
- conditions inside the enclosure while children are using it.
- the way children enter and exit the enclosure.

Additional details of safety enclosure use are described below.

#### Electrocution Hazard Associated with the Metal Frame of the Trampoline and Enclosure

The trampoline and enclosure frames are made of galvanized steel. They are not grounded and will conduct electricity. For this reason, an electrocution hazard exists. No lights, electric heaters, extension cords, or household electrical appliances are to be permitted on the trampoline or in the enclosure at any time.

#### Hazards Associated with Entering and Leaving the Trampoline Enclosure

A trampoline enclosure installed on a trampoline is raised off the ground. The height of the enclosure increases the risk of a fall when a jumper is entering or leaving the enclosure. Young children, especially, may have difficulty entering and exiting the enclosure. To reduce the risk of falling, always help young children to get into and out of the enclosure.

Enter and exit the trampoline enclosure only through the door of the enclosure (the opening in the netting walls). The trampoline mat (bed) and the netting walls of the enclosure are separate pieces. No jumper, especially young children, should ever leave the enclosure by going out between the mat and the netting walls. Trying to get out this way creates a risk of choking from being caught between the trampoline frame and the netting walls.

Darkness increases the chances of a fall when a jumper is entering or leaving the enclosure. Do not use the trampoline unless there is plenty of lighting provided.

#### Hazards Associated with Animals, Sharp or Breakable Objects

To avoid damage to the trampoline enclosure and the trampoline, do not allow pets or other animals inside of the enclosure. The claws and teeth of animals can damage the netting. Do not jump on the trampoline while holding or wearing a sharp or breakable object.

# METHODS OF ACCIDENT PREVENTION

## The Supervisor's Role in Preventing Accidents

It is the responsibility of the supervisors of trampoline users to provide knowledgeable and mature supervision. They need to know and enforce all of the rules and warnings printed in this manual to minimize the likelihood of accidents and injuries. They also need to inform users of these rules. During periods of time when supervision is unavailable or inadequate, this may require that the trampoline is taken down, placed in a secure area, or otherwise secured against unauthorized use. Another option that may be considered is covering the trampoline with a heavy tarp that can be secured with locks and chains. It is the responsibility of the supervisor to make sure that the placard with TRAMPOLINE SAFETY INSTRUCTIONS (see step 10 in assembly instructions) is kept posted on the trampoline and that jumpers are informed about these instructions.

## The Jumper's Role in Preventing Accidents

Education on the part of the user is a must for safety. Users must first learn a low, controlled bounce and then learn the basic landing positions and combinations before proceeding to intermediate skills. Jumpers must understand why they have to master "control" before they can start thinking about other moves. Understanding the proper progression of skills in jumping on a trampoline must be the first lesson. Review this manual to learn about the basic techniques for using the trampoline. Follow the rules on the placard with TRAMPOLINE SAFETY INSTRUCTIONS (see step 10 in assembly instructions). For further information or additional instructional materials, contact a certified trampoline instructor.

## TRAMPOLINE SAFETY INSTRUCTIONS

### For the Supervisor

Read the instructions before using the trampoline. Enforce all of the safety rules. Become familiar with the information in this manual so you can help new users learn basic jumps and all users follow trampoline safety. All trampoline users must have mature, knowledgeable supervision, regardless of their skill or age. This trampoline is not recommended for use by children under 3 years of age. Inspect the trampoline before using it. Do not use the trampoline without the frame pad securely in place to cover the frame. Do not use the trampoline in wet or windy conditions. A worn or damaged mat, spring, or frame piece should be replaced immediately.

### JUMPING

Learn fundamental jumps and body positions thoroughly before trying more advanced skills. Know your own limits in performing each of the trampoline jumps. Study this manual to learn how to do basic jumps. Stop your bounce by flexing your knees as your feet come in contact with the trampoline mat. Learn this skill before attempting any others.

## WARNING

### Hazards Associated with High Winds

A trampoline with an enclosure can be moved or blown over by high winds. Anyone in its path, or inside of the enclosure, may be injured if this happens. If you expect high winds, take down the enclosure netting to the ground or move the trampoline and enclosure to a sheltered location. The only sure method to protect your trampoline and the surrounding environment during high winds is to completely disassemble the unit and store indoors. Damage due to wind or weather is not warranted.

## WARNING

### Storing the Trampoline Enclosure Safely

Specific steps for storing the trampoline enclosure are given later in this manual. There are special safety precautions to be aware of when storing the enclosure.

Remove the attached arch sections as a unit and place them on the ground. Separate the tubes after they are on the ground. Avoid pinching your fingers by wearing gloves and keeping your fingers away from pinch points near the bracket assembly while you are removing the tubes from the frame.

### Placing the Trampoline and Enclosure in a Safe Place

There must be at least 24 feet (7.3 meters) of clear, open space above the ground. Do not place or store anything underneath the trampoline and enclosure. To avoid injury, the trampoline and enclosure must be kept away from objects and possible hazards including electric power wiring, tree limbs, and fences. Do not place the trampoline and enclosure near any other recreational devices or structures such as a swimming pool or swing set. The trampoline and enclosure must be placed on a level surface before use. The area around the trampoline must always have plenty of light.

#### For the Supervisor

- Be familiar with the information in this manual and enforce all of the safety rules. Help all users to utilize the trampoline and enclosure safely.
- All trampoline and enclosure users must have someone to supervise them at all times, regardless of the skill or age of the user.
- Secure the trampoline and enclosure against unauthorized and unsupervised use. Keep the trampoline and enclosure free of any objects that could interfere with the jumper.
- This trampoline and enclosure is not recommended for use by children under 3 years of age or by anyone weighing more than 100 pounds.
- Use the trampoline and enclosure only when the trampoline mat (bed) is clean and dry. Inspect the trampoline and enclosure prior to each use and replace any worn or damaged parts. Use only when the enclosure netting has no holes, all uprights are tightly bolted into their sockets, and the netting is properly suspended.
- **DO NOT** attempt or allow somersaults on the trampoline. Landing on the back or neck can cause serious injury, paralysis, or death, even when landing in the middle of the bed.

#### For the Jumper

Do not use the trampoline enclosure when under the influence of drugs or alcohol.

### JUMPING

- Avoid jumping too high or for too long. Always control your jump.
- Take turns jumping one at a time, and always have someone watch you.
- Do not attempt to jump over the netting. Do not intentionally bounce off of the netting. Do not hang from, kick, cut, or climb on the netting.
- Wear clothing that does not have drawstrings, hooks, loops or anything else that could get caught while using the trampoline/enclosure and result in entanglement or strangulation, or both.
- Do not attach anything to the netting that is not a Skywalker Trampolines approved accessory or part of the of the trampoline enclosure.

## GETTING ON AND OFF THE TRAMPOLINE

Climb onto and off of the trampoline. Do not jump onto or off of it. Do not use the trampoline as a springboard to jump to other objects or places.

## ENTERING AND EXITING THE TRAMPOLINE ENCLOSURE

Un-zip and un-clip opening and place one knee on the frame pad and climb head first through the door and crawl to the center of the mat. A responsible adult supervisor must zip the enclosure closed.

For additional information regarding equipment, contact Skywalker Holding, LLC. For additional information regarding skill training, contact a trainer certification organization.

## USE AND INSTRUCTIONAL MATERIAL

### OVERVIEW OF TRAMPOLINE USE

During this learning period, jumpers should practice these basic techniques and perfect them. Braking, or checking the bounce, should be taught first and stressed as a safety measure. Jumpers should brake their jump whenever they start to lose their balance or control. This is done by simply flexing the knees sharply upon landing and absorbing the upward thrust of the mat. This allows the jumper to stop suddenly and avoid losing control.

With trampoline use, the takeoff point and landing point of a good, controlled jump are in the same spot. An exercise is considered learned only when a jumper is able to perform it correctly time after time. Jumpers should never go on to any advanced stunt until they can perform all previous stunts correctly each time.

Allow each jumper a brief turn on the trampoline. Extended bouncing exposes an overtired user to an increased risk of injury. Longer turns tend to lessen the interest of others waiting to jump. Clothing should consist of a T-shirt and shorts. Jumpers should wear regulation gymnastic shoes or heavy socks, or they may jump barefoot. Street shoes or tennis shoes should not be worn on the trampoline. Beginning jumpers may wish to wear loose-fitting protective clothes, such as a long-sleeve shirt and pants, until correct landings are mastered. This will reduce the chance of mat (bed) burns from improper landings on elbows and knees. No hard-sole shoes should be worn, as they cause extra wear on the trampoline mat.

Mounting and dismounting (getting on and off) properly should be a strict rule from the beginning. Users should climb onto the trampoline by placing their hands on the frame and stepping or rolling up onto the frame, across the springs, and onto the mat. They should not step directly on the frame pad or hold on to the frame pad when getting onto or off of the trampoline. Users should always place their hands on the frame while getting on or off. To get off, jumpers should walk to the side of the mat, bend over and place one hand on the frame, and then step from the mat to the ground. If you have installed the optional ladder, its rungs can be used to get on or off. Always face the ladder and place your hands on the frame. Make sure your foot has secure contact with the ladder rung when using it.

Reckless bouncing should not be permitted. All skills should be learned at moderate heights. Control, rather than height, should be emphasized. Jumpers should be forbidden to practice alone and unsupervised.

# ASSEMBLY

- 1、 Lay two frames(1) on the ground in the positions as shown.  
Insert one end (A) of frame(1) into the end (B) of the other frame  
Repeat this step until six frame sections are connected as shown

Notice: make sure the frame is turned so the big diameter tube is facing the ground

- 2、 Attach the mat and frame by the first Elastic with ball as shown Drawing A. After attaching the first Elastic with ball , count exactly 6 V-rings in a clockwise direction, attach a second Elastic with ball to the V-ring and frame at this point .Count 6 V-rings in a clockwise direction and attach a third Elastic with ball .Count 6 V-rings in a clockwise direction and attach a fourth Elastic with ball . Count 6 V-rings in a clockwise direction and attach a fifth Elastic with ball Count 6 V-rings in a clockwise direction and attach a sixth Elastic with ball .

Continue to attach the remaining Elastic with ball between previously attached Elastic with ball , until all Elastics are attached.

Notice: If the mat is not in the middle of the frame, spend some time adjusting it by pulling the Elastic with ball (6)

- 3、** Tighten the six legs(3)(only one is shown) onto the six mounts on the frame  
Repeat this process to assemble the rest of the legs(3) to the frame(1) by the same manner

- 4、** Lay the pad with net (5) on the frame.  
adjust the position of the pad, so that the slits are directly above the legs as show

fastening the screw(10) by tool(#)

5、

Insert the bottom of curved tube with foam(7) into the T-joint of the frame as shown in bellow, Repeat this step to assemble five more curved tube

- 6、 Insert rail(2) into the foam(8) as show , repeat this process to assemble the rest of the foams to the Rail(2)

- 7、 Insert the small(A) end of rail(2) into the big(B) end of other tube(2) by small tube of the curved tube(7) as shown in above. Repeat this assembly steps until 6 rails will be completed.

fastening the screw(10) by tool(#)

8、

Hold the pole cap(11) close to a curved tube(7) with foam as shown insert Drawing (A).

Insert the pole cap(11) though one strap ring on the top of the net as show insert Drawing B.

9、

Tie one end of the string to the curved tube(7), pull the string through net edge and trampoline as shown

## WARNING

# TRAMPOLINE AND ENCLOSURE CARE AND MAINTENANCE

## Care

To avoid damage to the trampoline and enclosure, do not allow pets or animals inside the enclosure.

The trampoline is intended to be used by one person at a time who weighs no more than 100 pounds. The user should be either barefoot, wearing socks, or wearing gymnastic shoes. Street shoes or tennis shoes should not be worn on the trampoline. The user should remove all sharp objects from his or her person that may cause injury or damage to the mat. Heavy, sharp, or pointed hard objects should never touch the mat.

Continued exposure over a long period of time to the sun, especially to ultraviolet rays, will shorten the life of the enclosure fabric. For longer fabric life, store the enclosure when it is not being used. A dry enclosure, properly stored, will provide the longest life of the fabric, sewing, and hardware. Remove the enclosure from the trampoline during harsh weather conditions or during long periods of non-use.

## MAINTENANCE

Your trampoline was manufactured using quality materials and crafted to provide you and your family with many years of enjoyment and exercise. Proper maintenance and care will help to prolong the life of the trampoline and reduce the possibility of injury. The following guidelines should always be followed.

Inspect the trampoline enclosure before each use, and replace any worn, defective, or missing parts. The following conditions could represent potential hazards and increase the danger of personal injury:

- missing, improperly positioned, or insecurely attached frame padding, netting, enclosure tubes, or foam sleeves
- punctures, frays, tears, or holes worn in the mat, frame padding, netting or foam sleeves
- deterioration in the stitching or fabric of the mat, frame padding or netting
- ruptured or missing springs
- bent or broken frame, leg or enclosure tubes
- sagging bed or netting
- sharp protrusions on the frame, suspension system or enclosure tubes

If any of these conditions exist, the trampoline and/or enclosure should be disassembled (taken apart) or otherwise protected from being used until the condition is fixed.

## SPECIAL CONSIDERATIONS

### High Wind

It is possible for the trampoline and enclosure to be blown about by high winds. If you expect high winds, move the trampoline and enclosure to a sheltered location. Disassemble (take down) the enclosure netting.

The only sure method to protect your trampoline and the surrounding environment during high winds is to completely disassemble the unit and store indoors.

### Moving the Trampoline and Enclosure

If the trampoline and enclosure needs to be moved, it should be moved by two persons, kept horizontal, and lifted slightly. If necessary, the trampoline and enclosure can be taken apart for moving. To take the trampoline apart, follow the assembly steps in reverse order.

# EXPLODED DRAWING AND PART LIST

## PART LIST

Key No.	Description	Qty
1	Frame	6
2	Rail	6
3	Leg	6
4	Mat with net	1
5	Pad with net	1

7	Curved tube with foam	6
8	Foam	6
9	Cap	6
10	Screw	18
11	String	1
12	Pole cap	6
*	Screw driver	1

**SEASIDE - ADVENTURE BOUNCERS** provides physical activity for both good health and skill building. It was created for young bouncers to help them develop their gross motor and mental skills while playing activity driven identification games. Games can be played either competitively or cooperatively, depending on the ages and levels of players.

### **\*\*Object of the Games\*\***

**Physical Activity, Listening, Learning.** During the toddler years your child needs many opportunities for physical activity and mental stimulation. Try these playful physical and mental activities, or make up your own new game:

### **FIRST STEPS**

For young players, keep games simple. Teach your child to bounce or hop on each Ocean animal, while you call out the names of the animals where they land. Then ask them to repeat what you say as you call it out. Progress to asking your child to say the animal name as they bounce on the next animal without your help. For young toddlers the act of bouncing or stepping may be enough of a challenge in the beginning. Take it slow, their skills will develop quickly.

### **GAMES**

#### *Seaside Animals*

Develop your child's listening and concentration skills with games that incorporate memory. First, call out a sequence of 3-5. *Dolphin - Starfish - Whale - Starfish - Dolphin - Whale*. Try to increase the length of the sequence without error. Next you may ask them to bounce on the animals and ask them to say the animal's name, or the first letter of the animal's name. Encourage them to try it on their own. The goal is to improve your child's memory recall and to keep moving.

#### *Slippery Shore*

Slippery Shore can be played with 1 or more players. Allow each player to take turns. Slippery Shore is played for time. The winner is the person who can jump and land exactly on each Seaside Animal. If the player lands on any area other than a Seaside Animal then the player has "Slipped" and his or her turn is over. Record time for each player. The winner is the player with the longest recorded sequential jump time. To make it easier - ask each player to jump twice or three times on each image before proceeding to the next.

#### *Shell Shocked*

Turn on some music and instruct your child to jump on the animals as the music plays. If the music stops and your child lands on any part of the jump mat that is not a Seaside Animal then his or her turn is over.

### **PLAYING PRETEND**

Kids can also boost gross motor skills when they use their bodies to become a silly starfish, giggling dolphins, or wacky whales -- whatever their imagination conceives. Let your child make up a game!

### **PLAYING GUIDE INSTRUCTIONS** **Recommended for Ages 3-7**

#### **ACTIVE BOUNCE PLAY TEACHES:**

- **VOCABULARY**
- **MEMORY**
- **LISTENING**
- **CONCENTRATION**
- **SOCIAL INTERACTION**
- **GROSS MOTOR SKILL**
- **IMAGINATION**

ADVENTURE BOUNCERS are a wonderful way to get children excited about physical activity and learning. ADVENTURE BOUNCERS are designed to be "hands on". Kids love to move and learn. We've created the ADVENTURE BOUNCER Games to maximize the chances of learning and development, so kids will be rewarded as often as possible. ADVENTURE BOUNCERS are all about fun! Whether your kids play competitively, or as a team, we hope you have a great time with this game. To learn more, please visit:

**[www.skywalkertrampolines.com](http://www.skywalkertrampolines.com)**

# LIMITED WARRANTY

Skywalker Holdings, LLC warrants its trampoline products to be free from defects in material and workmanship under normal use and service conditions. The steel frame is warranted for one (1) year after the date of purchase. All other parts are warranted for ninety (90) days after the date of purchase. Wind or weather damage is not warranted.

All warranty coverage extends only to the original retail purchaser from the date of purchase. Skywalker Holdings, LLC obligation under this Warranty is limited to replacing or repairing, at Skywalker Holdings, LLC option, the product at one of this authorized service centers. All products for which a warranty claim is made must be received by Skywalker Holdings, LLC at one of its authorized locations. Preauthorization may be obtained by calling Skywalker Holding, LLC Customer Care Hot Line at 1-866-603-Jump(5867). This Warranty does not extend to any product or damage to a product caused by or attributable to freight damage, abuse, misuse, improper or abnormal usage, or repair not provided by a Skywalker Holdings, LLC authorized service center, or to products used for commercial or rental purpose. No other Warranty beyond that specifically set forth above is authorized by Skywalker Holdings, LLC.

SKYWALKER HOLDINGS, LLC IS NOT RESPONSIBLE OR LIABLE FOR INDIRECT, SPECIAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THE PRODUCT OR OTHER DAMAGES WITH RESPECT TO ANY ECONOMIC LOSS, LOSS OF PROPERTY, LOSS OF REVENUE OR PROFITS, LOSS OF ENJOYMENT OR USE, COST OF REMOVAL, INSTALLATION OR OTHER CONSEQUENTIAL DAMAGES. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES. ACCORDINGLY, THE ABOVE LIMITATION MAY NOT APPLY TO YOU.

THE WARRANTY EXTENDED HEREUNDER IS IN LIEU OF ALL OTHER WARRANTIES AND ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE IS LIMITED IN ITS SCOPE AND DURATION TO THE TERMS SET FORTH HEREIN. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS. ACCORDINGLY, THE ABOVE LIMITATION MAY NOT APPLY TO YOU. This Warranty gives you specific LEGAL RIGHTS. You may also have other rights which vary state to state.

THIS WARRANTY IS VALID ONLY IN THE UNITED STATES.
