

# Classic Metal Framed Mirror

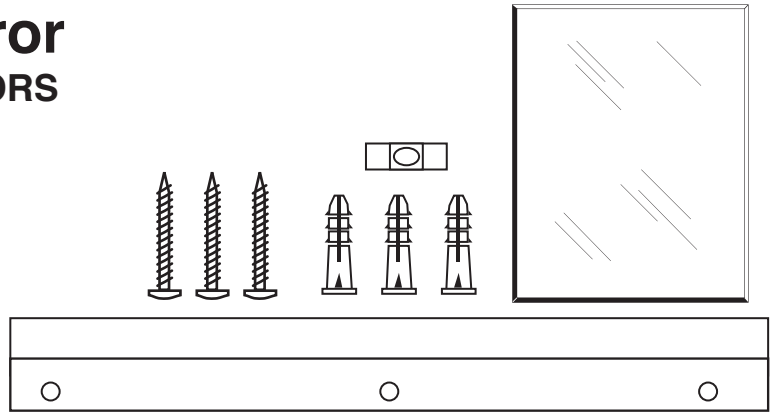

## MOUNTING INSTRUCTIONS FOR MIRRORS

### Parts List:

- Classic Mirror with Mounting Brackets
- 12" Wall Mounting Clip
- 3 Plastic Wall Anchors
- 3 Screws.
- 1 Disposable Level

### Tools Needed:

Pencil and Eraser, Drill and 3/16" Drill Bit, Screw Gun or Driver with Phillips Head, Tape Measure, Hammer and Friend to help. (Two People are required to mount this mirror).

**WARNING:** Always wear safety goggles and gloves when handling glass. Handle mirror Carefully. DO NOT REMOVE-Plastic Protective Corners until installation is complete. Do not bump mirror against hard surfaces. Place on towel or soft surface like carpet when handling. READ INSTRUCTIONS CAREFULLY BEFORE STARTING.

## MOUNTING INSTRUCTIONS

- #1** Using a tape measure, check the location where the mirror is to be installed. Be sure the mirror will fit in the desired location.
- #2** Place the mirror on the wall in area chosen. (Two people are needed for this task). Position the mirror at the desired height in the center of the location. With Pencil mark a dot or line on the very top edge of the arch. **See Fig.1.** Set mirror aside In safe place.
- #3** From the mark made on the wall (top of mirror), using a tape rule, measure down to angled bend on mounting bracket and mark this location on wall. **Fig. 2.**
- #4** From this spot, position the supplied 12" hanging bracket. The top of the hanging bracket should be centered on the spot marked on the wall. Mark the holes at the bottom of the bracket, using the level to make sure the bracket is level and straight. Set the bracket and level aside. **Fig.3.**
- #5** Using the Drill and 3/16" Drill Bit-Pre Drill the holes for the wall anchors. Lightly tap the plastic wall anchors into place with hammer.
- #6** Reposition the 12" bracket and bubble level and secure to the wall with the screws provided. Check the level again to determine that the clip is straight and level. **(Fig.4)**
- #7** Carefully place the mirror with the pre-mounted bracket onto the installed wall clip. Mirror can be adjusted side to side by gently sliding the mirror along the bracket. With mirror centered installation is complete - you look marvelous.
