Package List

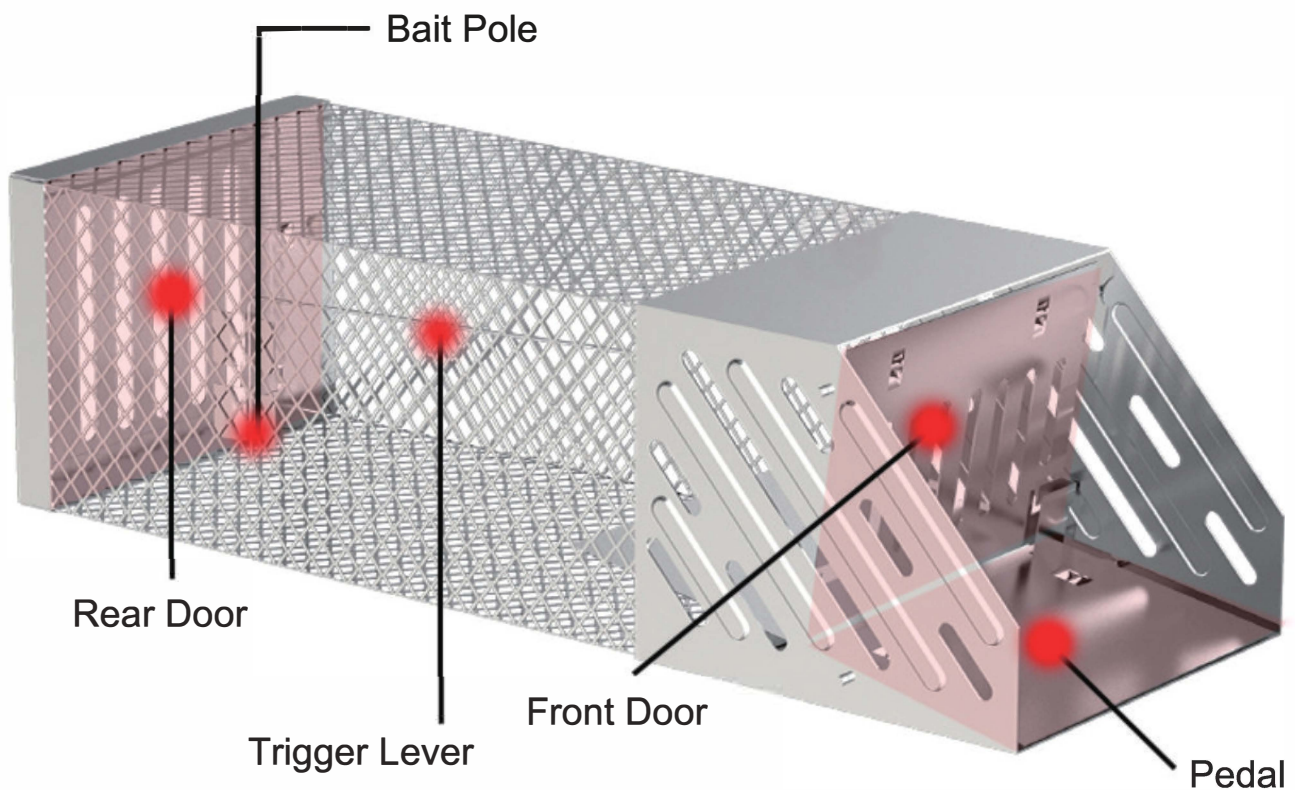

Upon opening the package, please check for the following items:

- * 1Pc/2Pcs × Rat Trap(According to your purchase)
- * 1 × User Manual

Specification

- * Material: Galvanized Iron
- * Item Size: 37×14.5×11cm/14.57×5.71×4.33in

Product Structure

Highlights

- * With one-way door mechanism and highly sensitive pedal, this rat trap can automatically catch rats continuously after setup.
- * Allow for entry but not exit.
- * Sliding door is convenient to place baits and pick up captured mice. Safe and humane.
- * Made of galvanized iron, suitable for both indoors or outdoors.
- * Bait it with snacks attractant to trap voles, squirrels, chipmunks, mice, rats, weasels and other similar size animals. All sets in seconds.

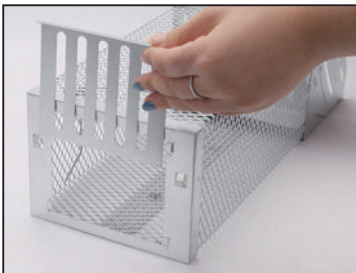

Suitable For Small Rodents

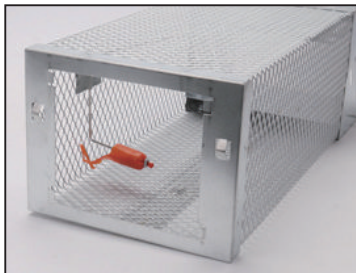

Recommended Baits

Seeds, Biscuit, Peanut, Fries, Sausage, Fruit

How To Use

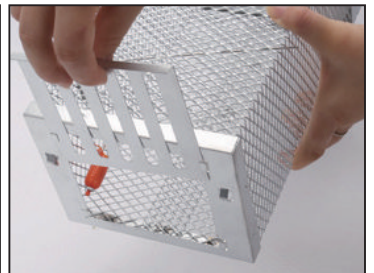

1: Slide up to open the rear door

2: Place the bait

3: Lift up the front door and use the trigger level to support it

4: Open the rear door and pour the mice out after catching them

Note: Sausage Not Included

Rat Catching Skills

1. How to choose the best placement position?

Observe the environment before control, and try to place it on the road where rats must pass.

- A.** It can be placed at one side of the mouse entrance or the door entrance or the other side of the entrance and exit, and blocked with boards or cartons.
- B.** It can be placed beside the wall with mouse droppings, and the mouse droppings need not be cleaned before placing.

2. What should be paid attention to when placing the mousetrap?

- A.** Do not change the position of other objects beside the wall of the mousetrap, so as not to cause the rats to be alert, The mouse has a good memory, it can remember

the placement of the objects at the side of the walking channel. If the placement of these objects is changed, it will generate vigilance not to pass this way.

- B.** On the contrary, taking advantage of the characteristics of mice, place other objects (such as cardboard boxes and cardboard sheets) in the wall aisles where mice pass without mousetraps to block them (for example). If the mice have a "new thing reaction", they will be alert to these objects and will not pass here.
- C.** Try to block the way in front of the mousetrap as far as possible and make it the only way for rats to get in and out, which will greatly improve the success rate of catching.

Camouflage of Mouse Trap

According to data and research, when mice witness their companions being caught by any type of mousetrap, their brains can retain that memory for approximately 2-3 months, leading them to avoid similar traps in the future. Therefore, the use of camouflage can create a convincingly deceptive trapping effect. This is applicable to various scenarios, allowing for camouflage in different settings such as disguising traps as newspapers, cardboard boxes, shopping bags, rags, and more.

Cleaning, Maintenance & Warranty

1. Wipe with a cloth stuck with alcohol or twisted with dry water.
2. If it is not used for a long time, put the rat trap in the packing box and store it in a cool and dry place.
3. Do not immerse it in water or put it in a humid environment for a long time
4. If the mousetrap malfunctions, please contact the seller immediately.

Friendly Reminder
