

Infrared Fan 110V Light Controller Specification

Product Description:

This product adopts infrared digital remote control technology, remote control one-to-many control, no need to pair code, simple and convenient operation, strong anti-interference ability.

Technical parameters:

Wall switch segmentation sequence: white light, yellow light, white + yellow light, small night light.

Input voltage: 100V-120V AC50/60Hz

Output current: 220mA

Output voltage: 80-110V

Motor rated power: <40W

Built-in driving capacitor: 3.5-4UF

LED output power: 25-36W*2

Wind speed: low, medium, high

Timing: 1 hour, 2 hours

Receiving mode: infrared

Remote control distance: 4-8 meters

Remote control battery: No. 7 1.5V X2
