DRESSING TABLE INSTALLATION

Black connecting rod

large buckle

Tip Screws

Black connecting rod

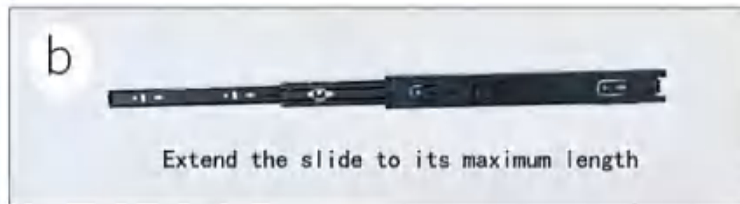

Wooden teeth

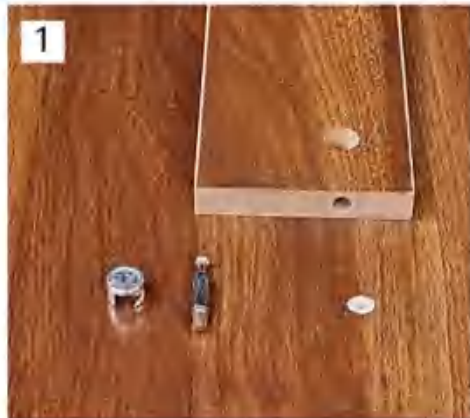

Rail

BEFORE INSTALLING THE PRODUCT, DISASSEMBLE THE SLIDE. SLIDE DISASSEMBLY STEPS

The method of removing the slide track is the same as that of removing the drawer. If there is a problem with the installation of the rearmost drawer, you can refer to this page to remove the drawer and reinstall it.

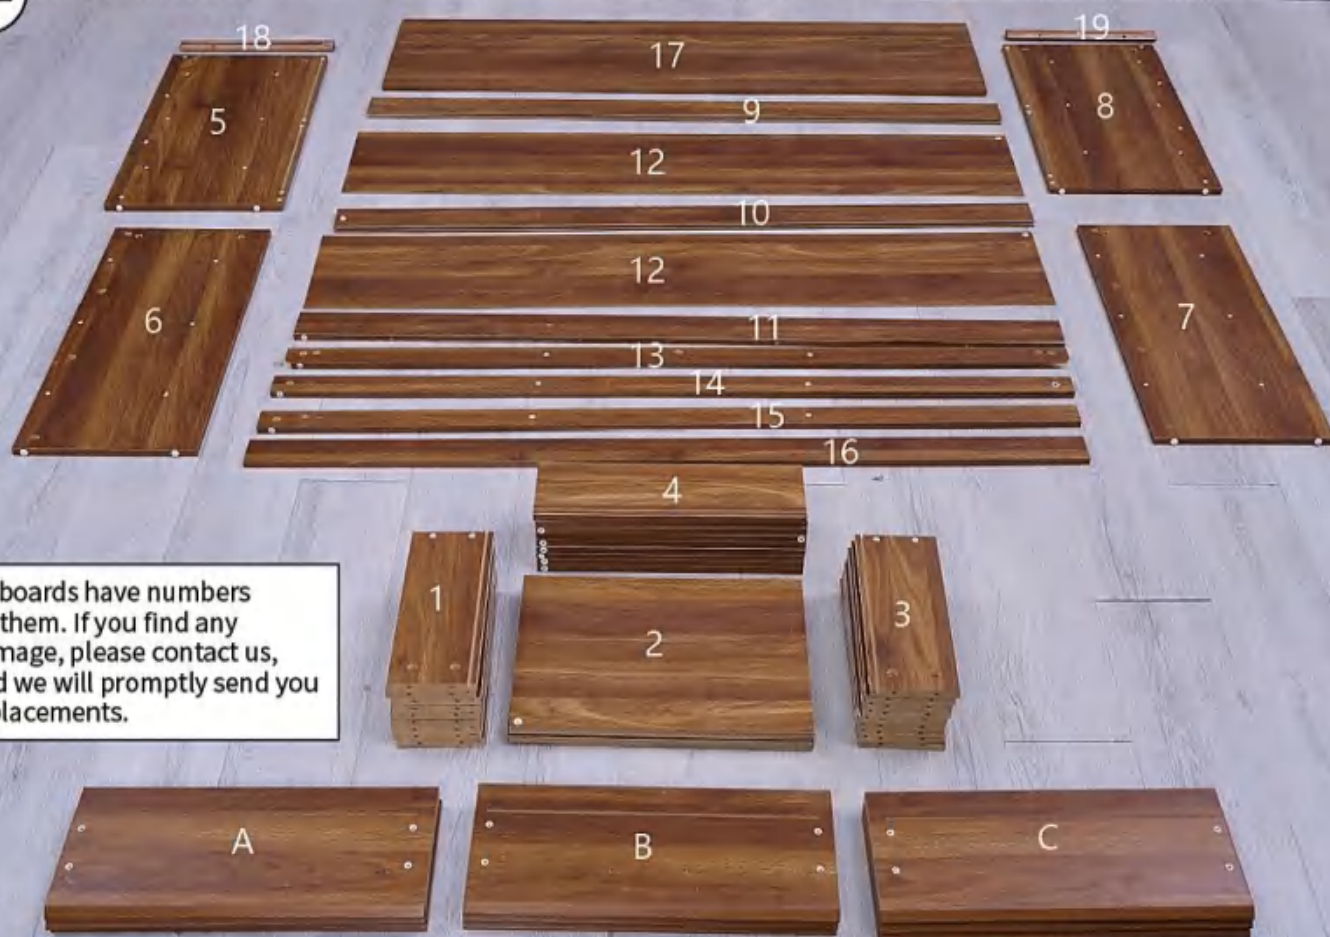

Connecting rods and circular cam locks are fittings used to connect wood panels. The method of use is shown in the diagram. Pay special attention to the direction of the arrow on the circular cam lock. When beginning to place it, ensure the arrow direction aligns with the hole direction on the side of the wood panel. After assembling the panels, tighten the circular cam lock clockwise. (If there is a gap between the panels during assembly, simply adjust the circular cam lock so that the arrow direction aligns with the hole direction on the side of the wood panel.)

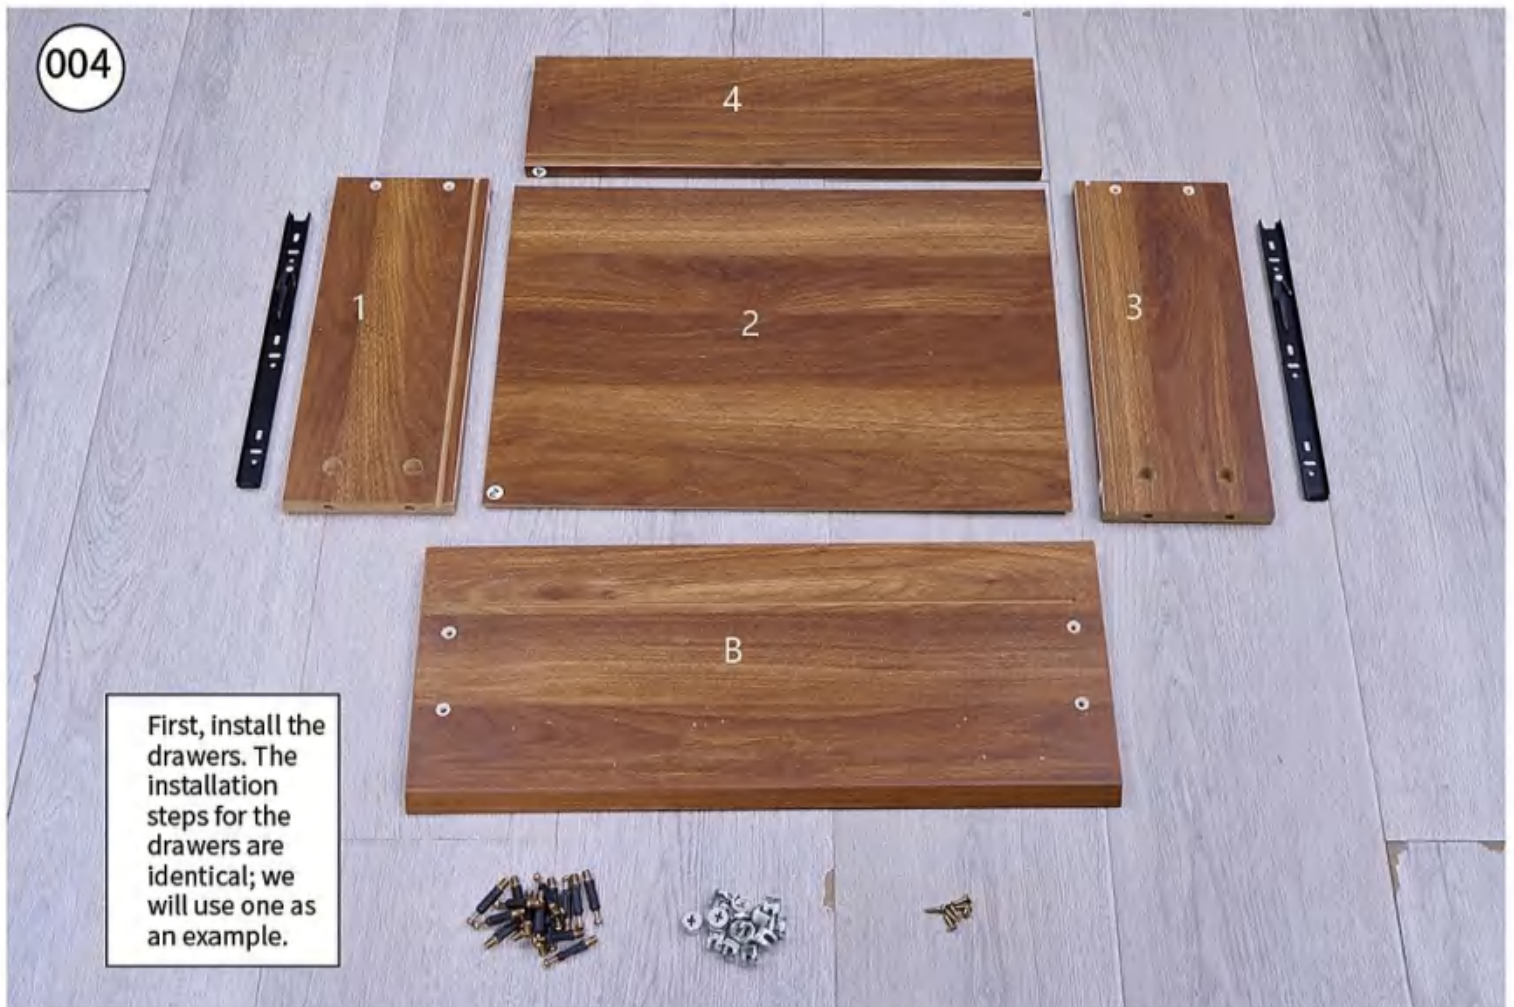

If you want to remove it, you just need to rotate the LB counterclockwise in the direction of the opening on the side of the board, and then you can successfully remove it.

001

002

005

006

Assemble boards 1, 3,
and 4 as shown in the
diagram.

009

010

Please refer to the connection steps for LA and LB on page 2.

011

Install the inner rail of the slide track on Plate No. 1.

012

019

Install the red part as shown in the diagram.

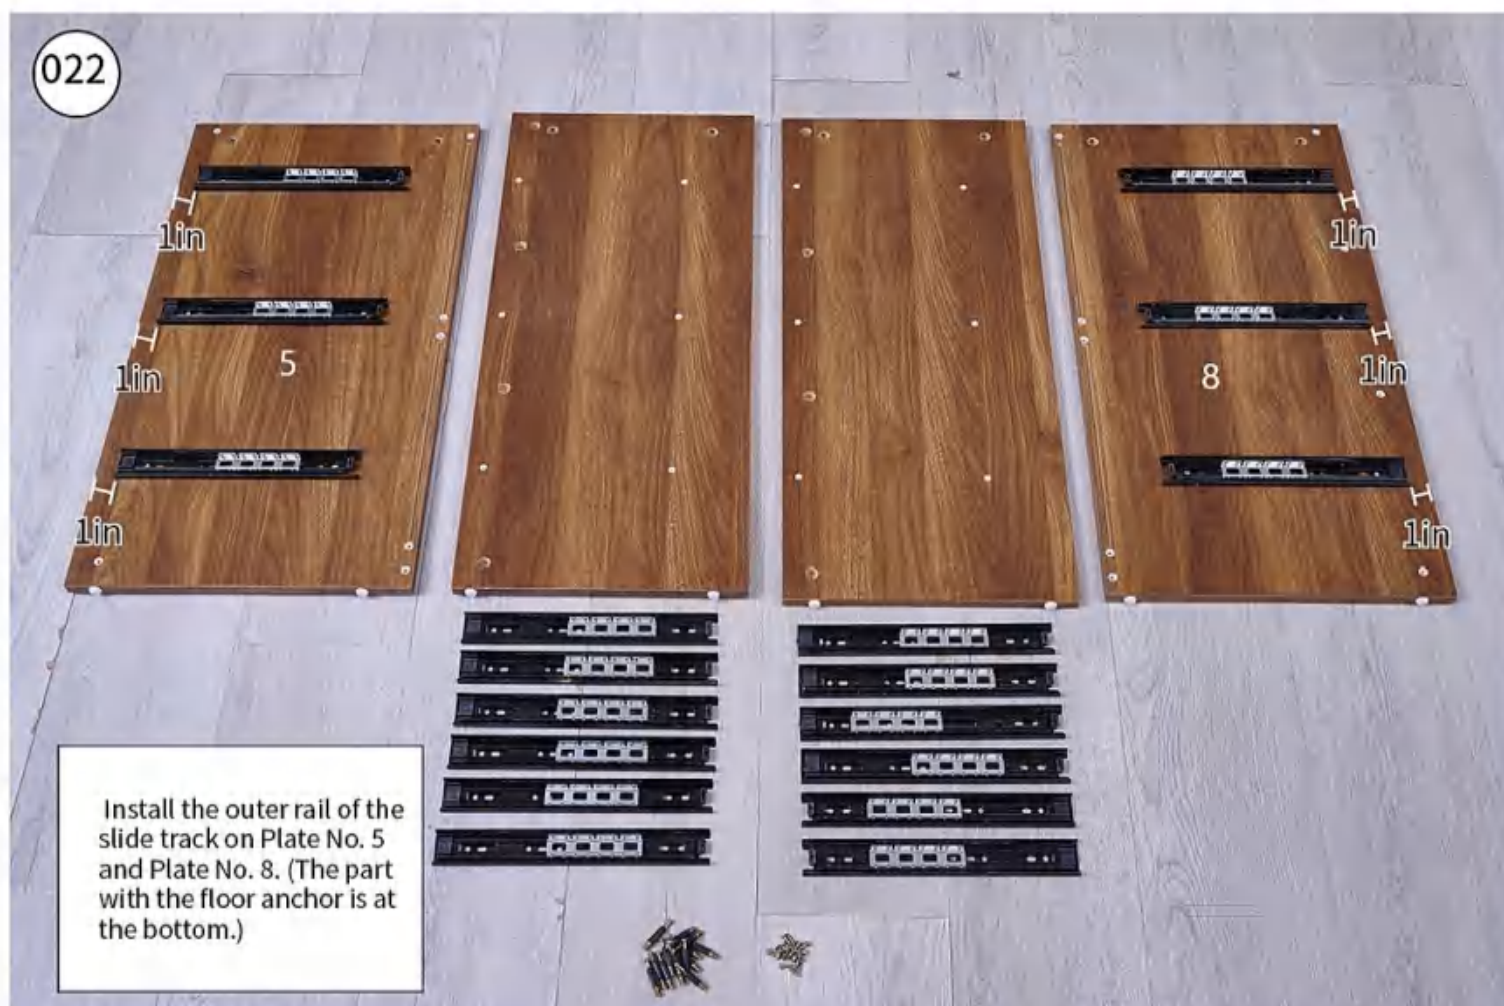

020

021

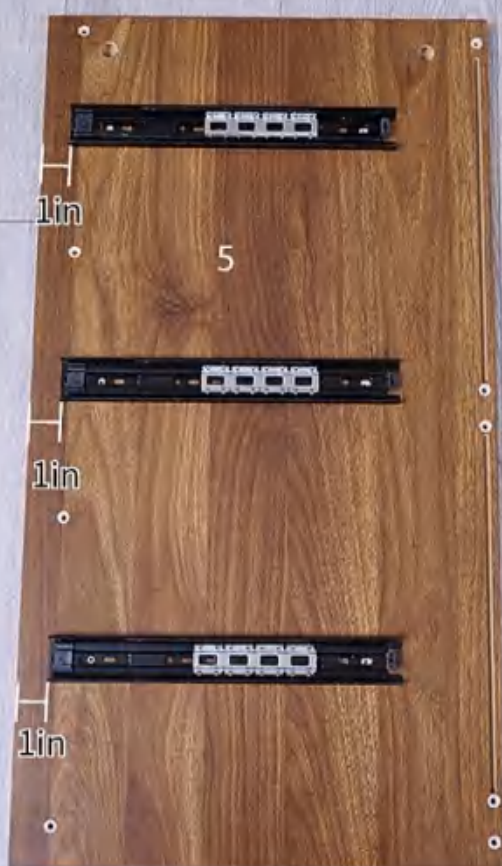

022

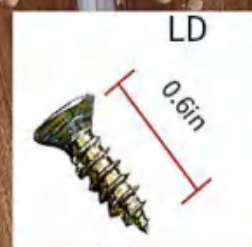

Install the outer rail of the slide track on Plate No. 5 and Plate No. 8. (The part with the floor anchor is at the bottom.)

023

1in As shown in the diagram, the front end of the rail is approximately 1inches from the edge of the board.

024

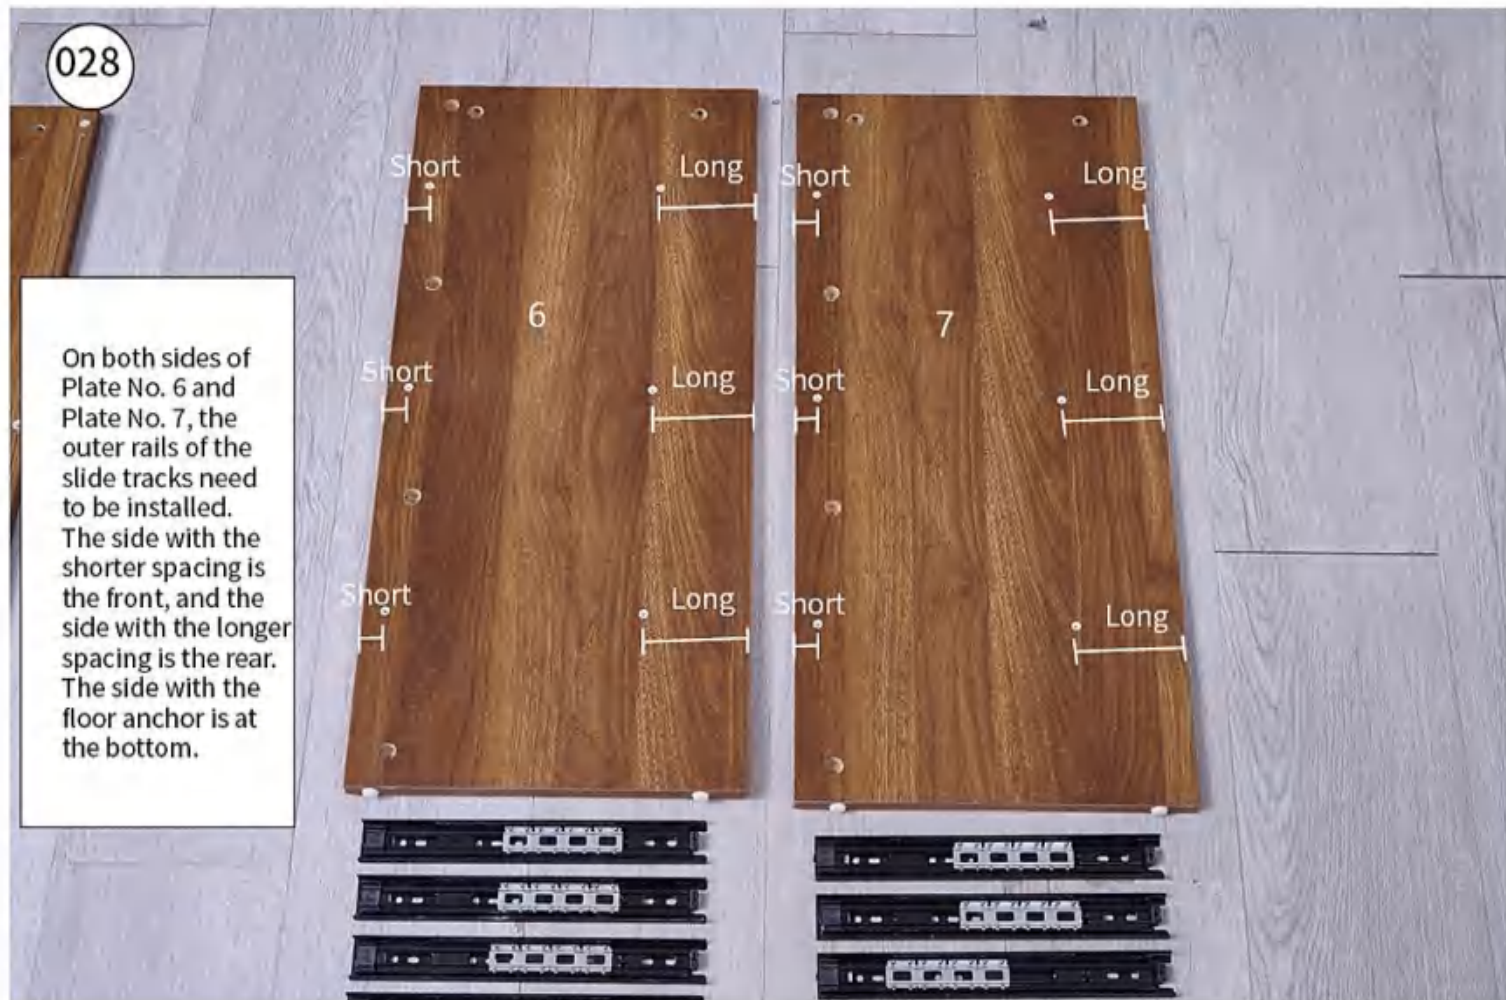

027

028

029

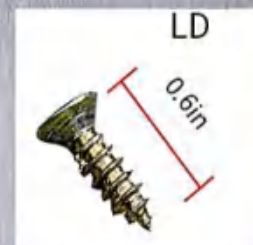

First, install the outer rail on one side.

030

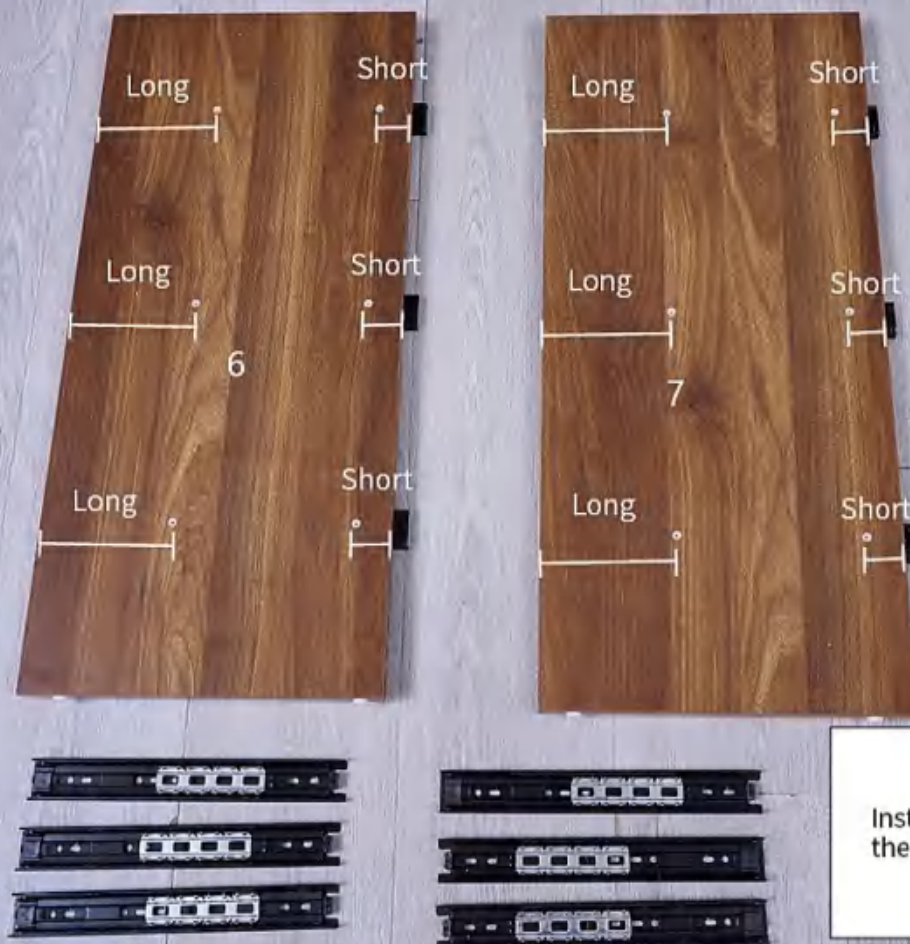

Pay attention to install according to the correct positioning holes. The front end of the slide track protrudes about 0.6 inches when it is in the closed state. (For the convenience of installation, the inner rail can be pulled out until it is in a proper position.)

031

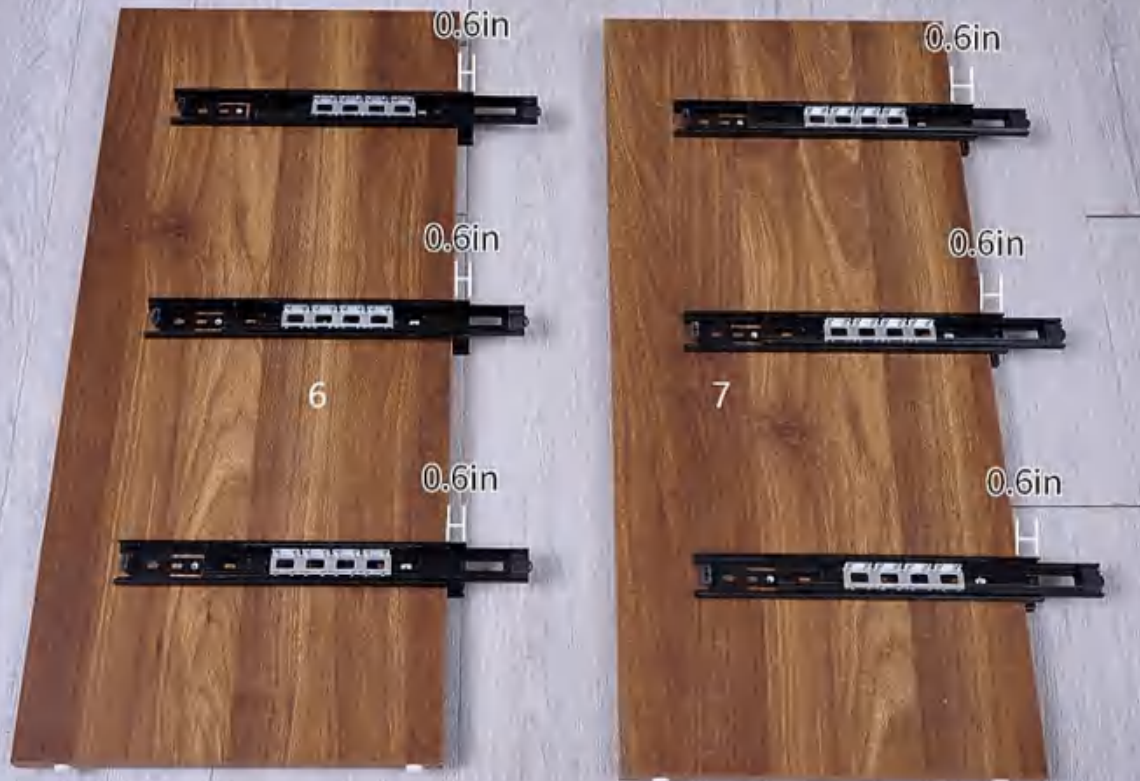

032

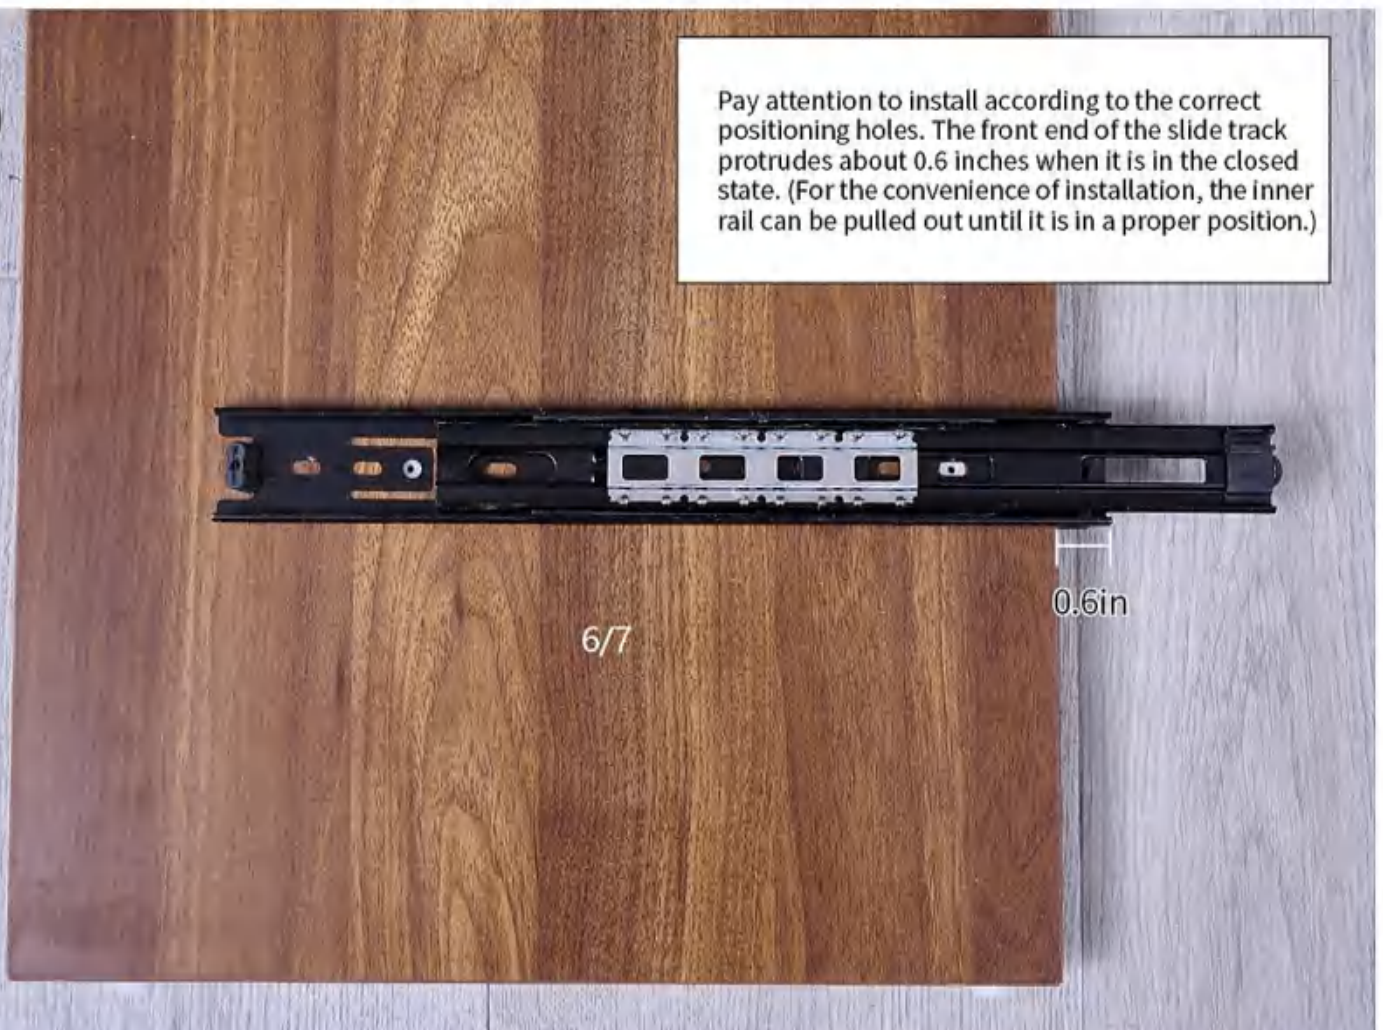

Install the outer rail on the other side.

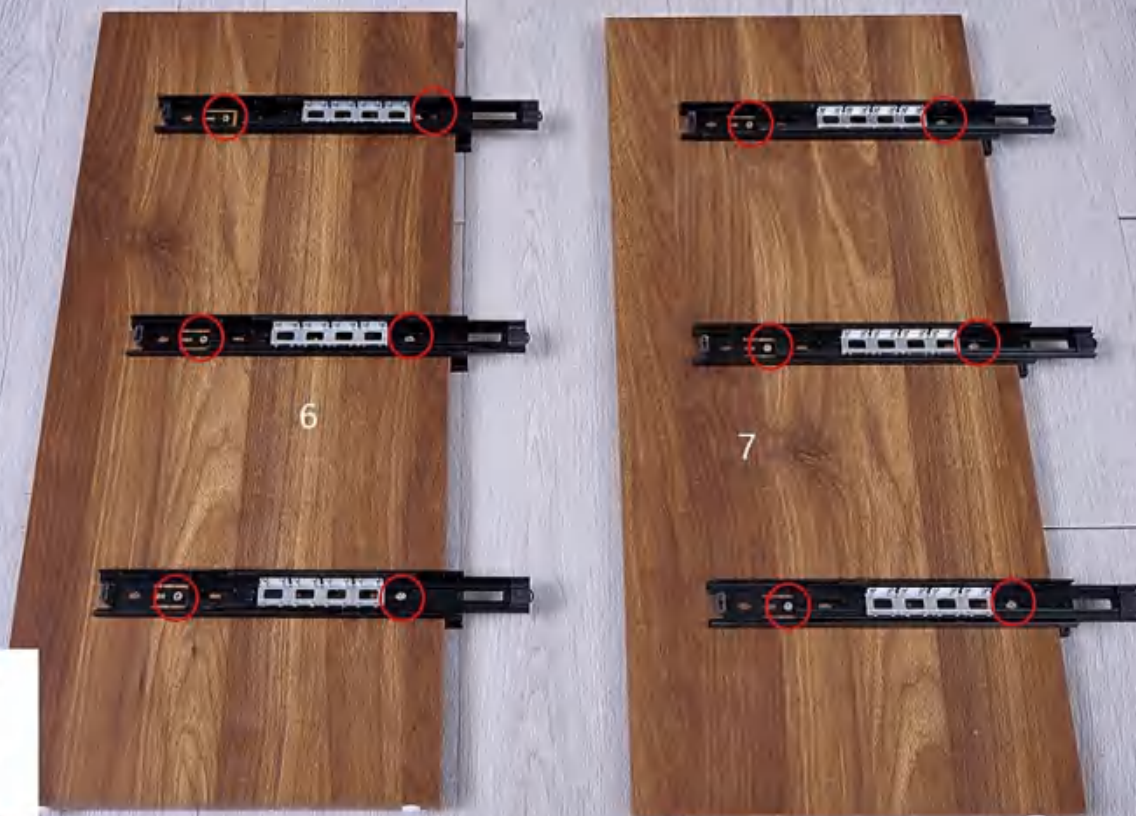

033

034

035

036

037

038

039

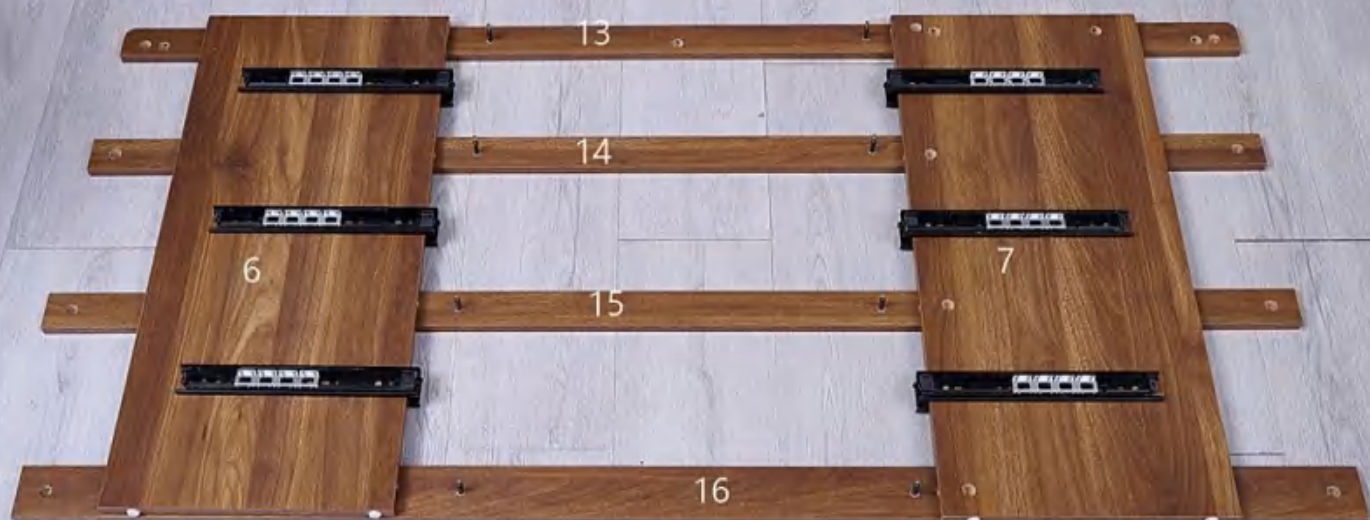

Assemble Plate No. 6,
No. 7, No. 13, No. 14
and No. 16.

040

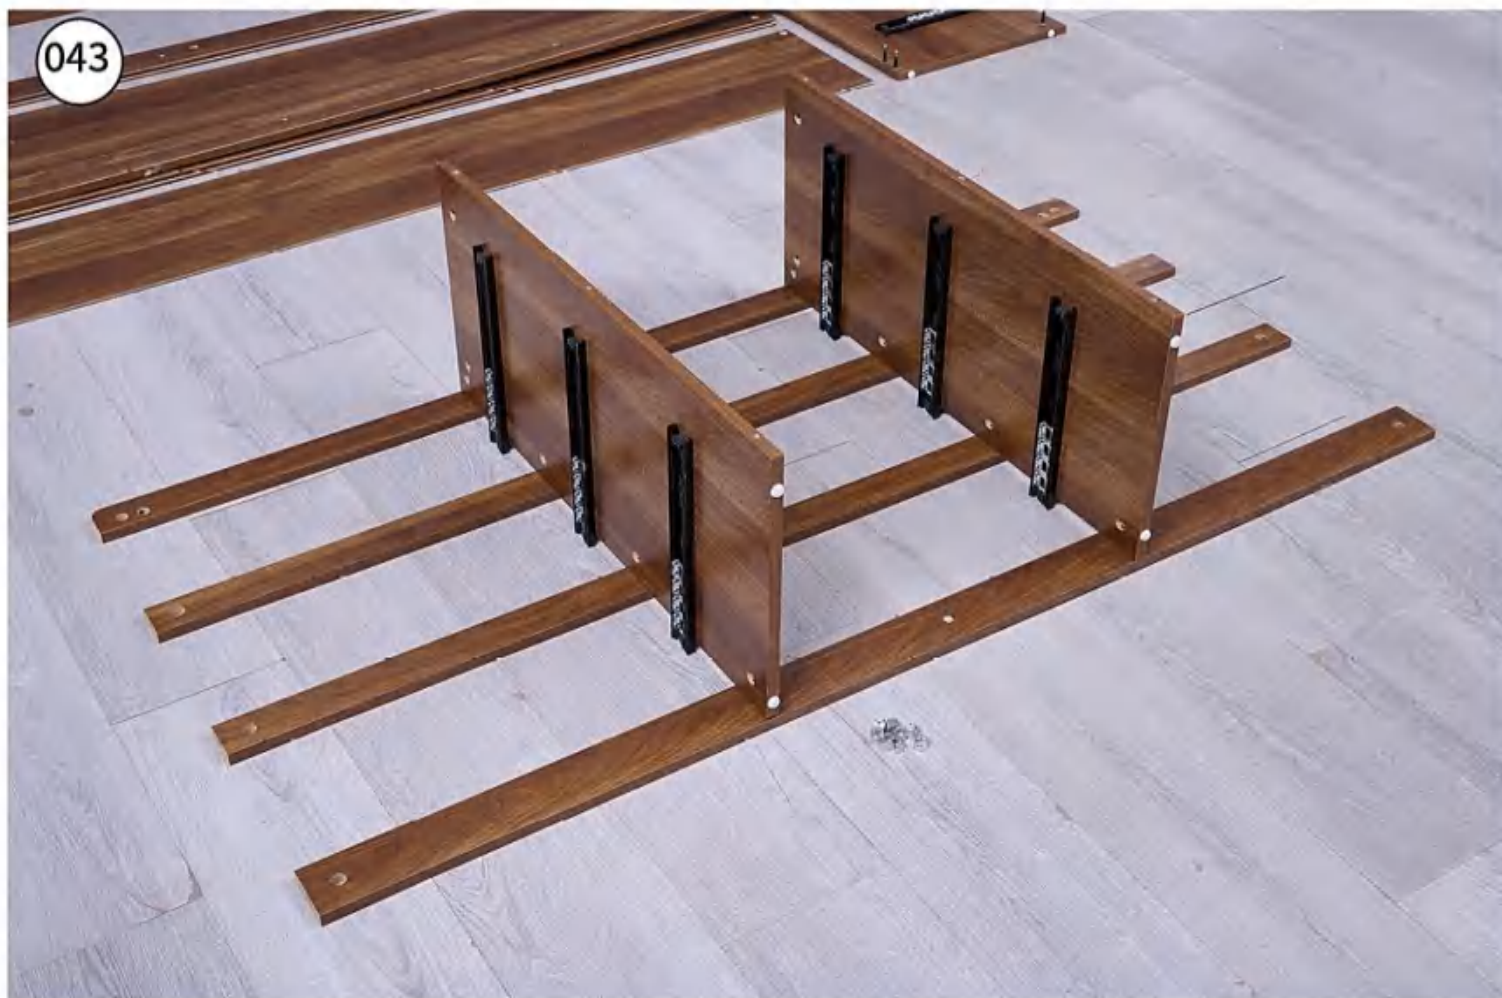

041

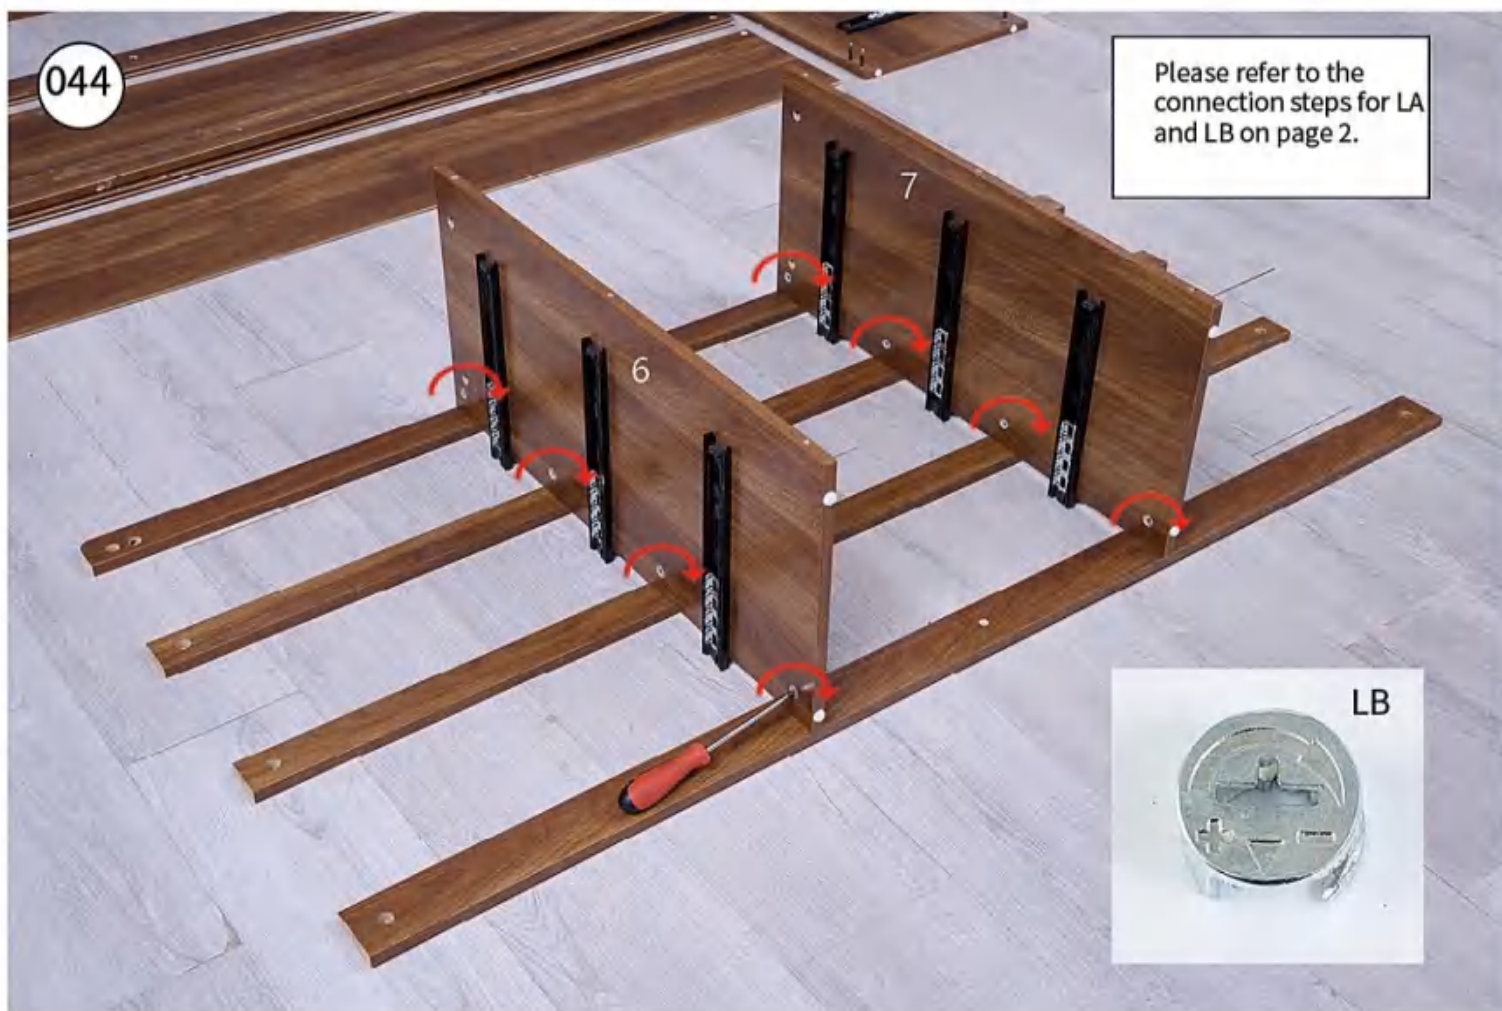

042

043

044

045

After installing this part, set it aside for later use.

046

047

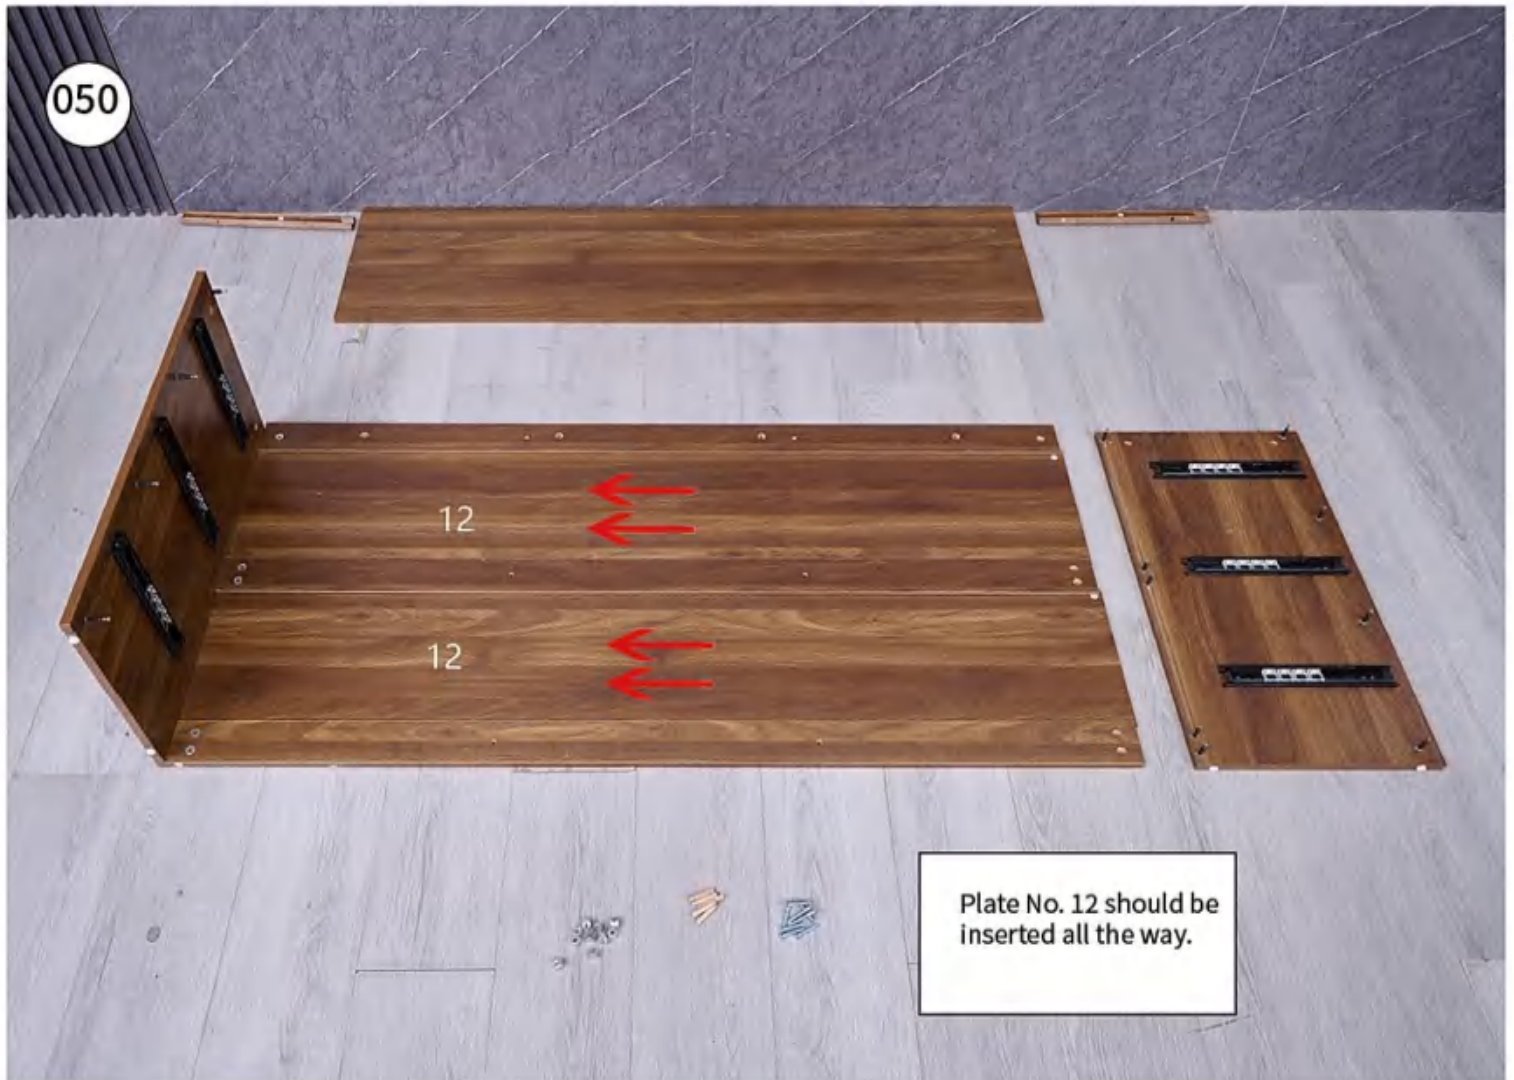

048

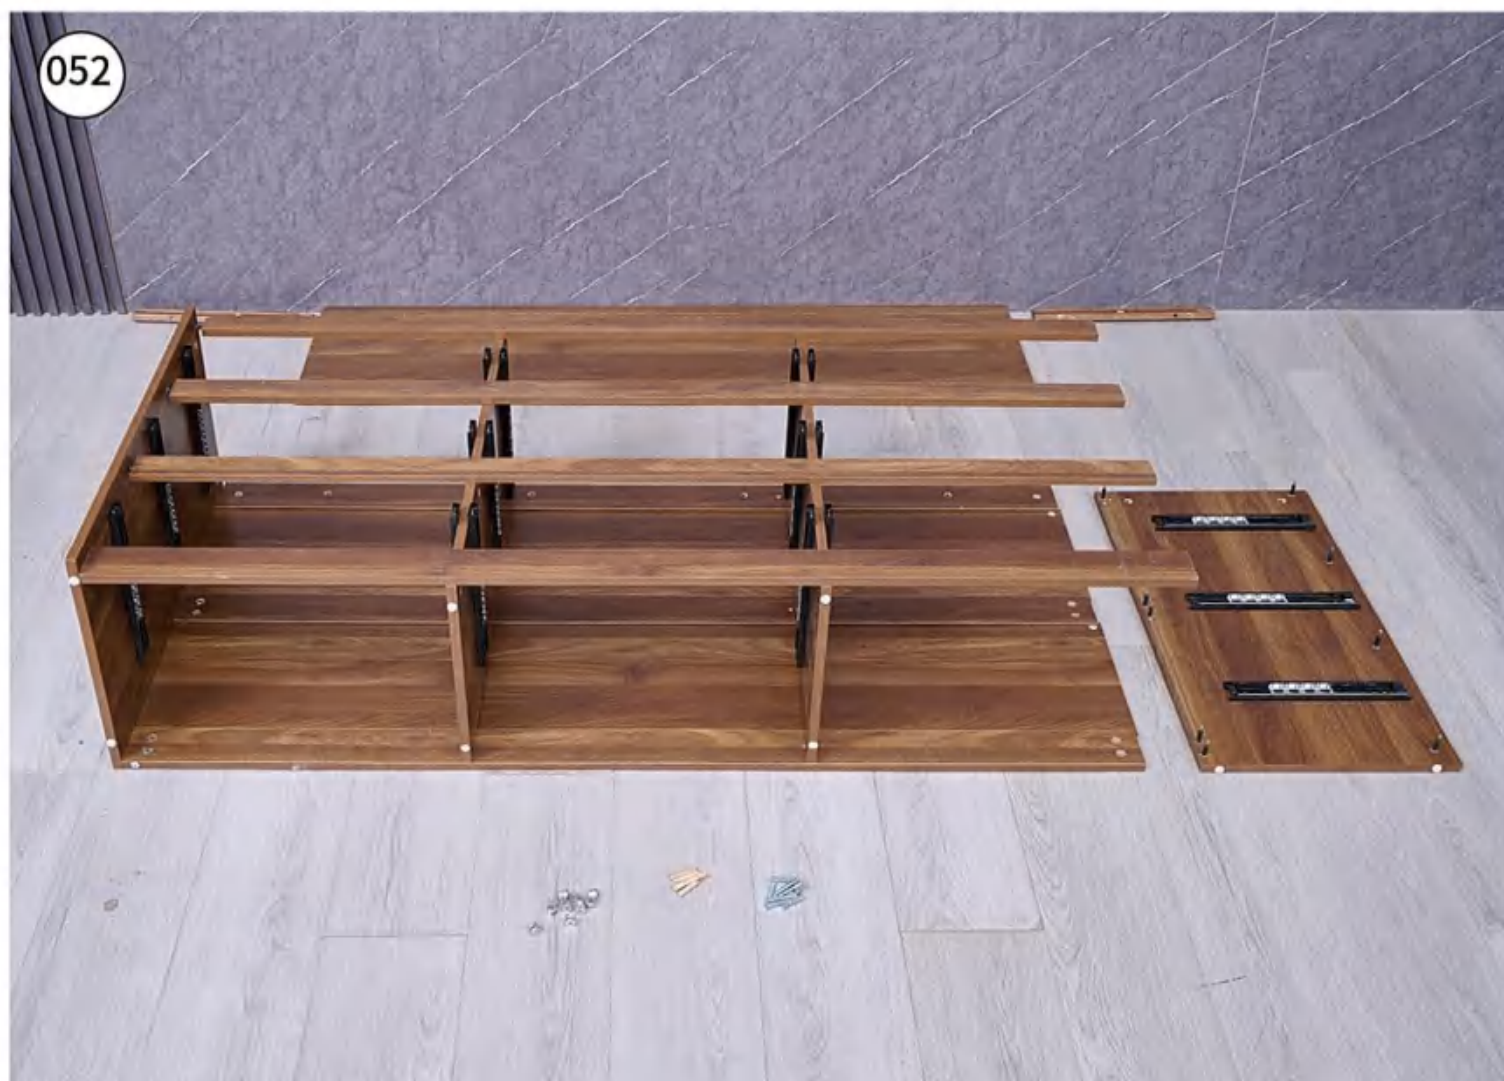

049

050

053

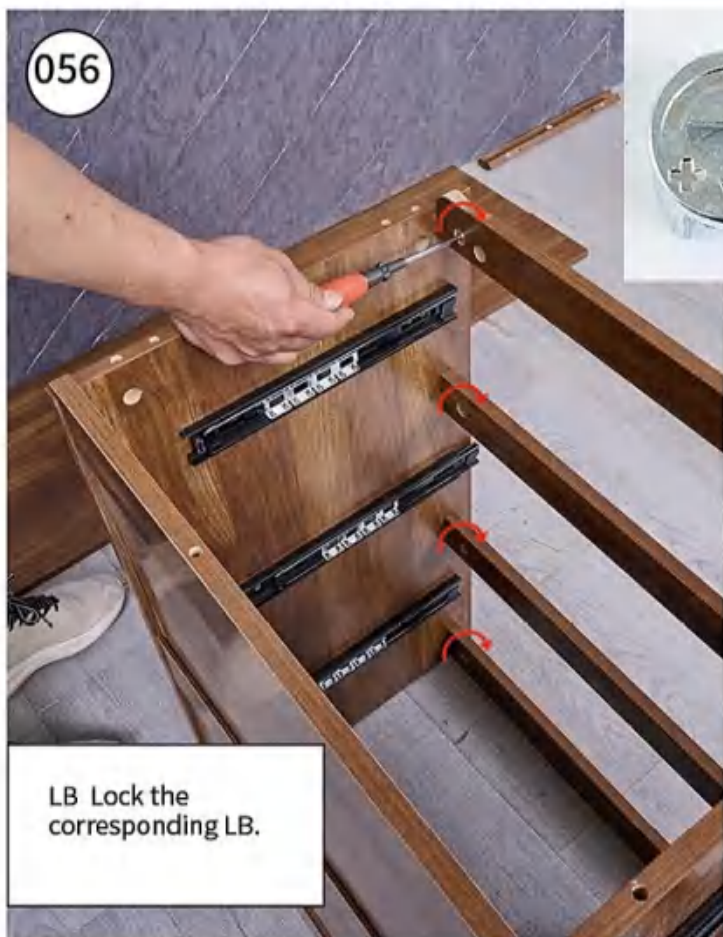

054

055

056

LB

LB Lock the corresponding LB.

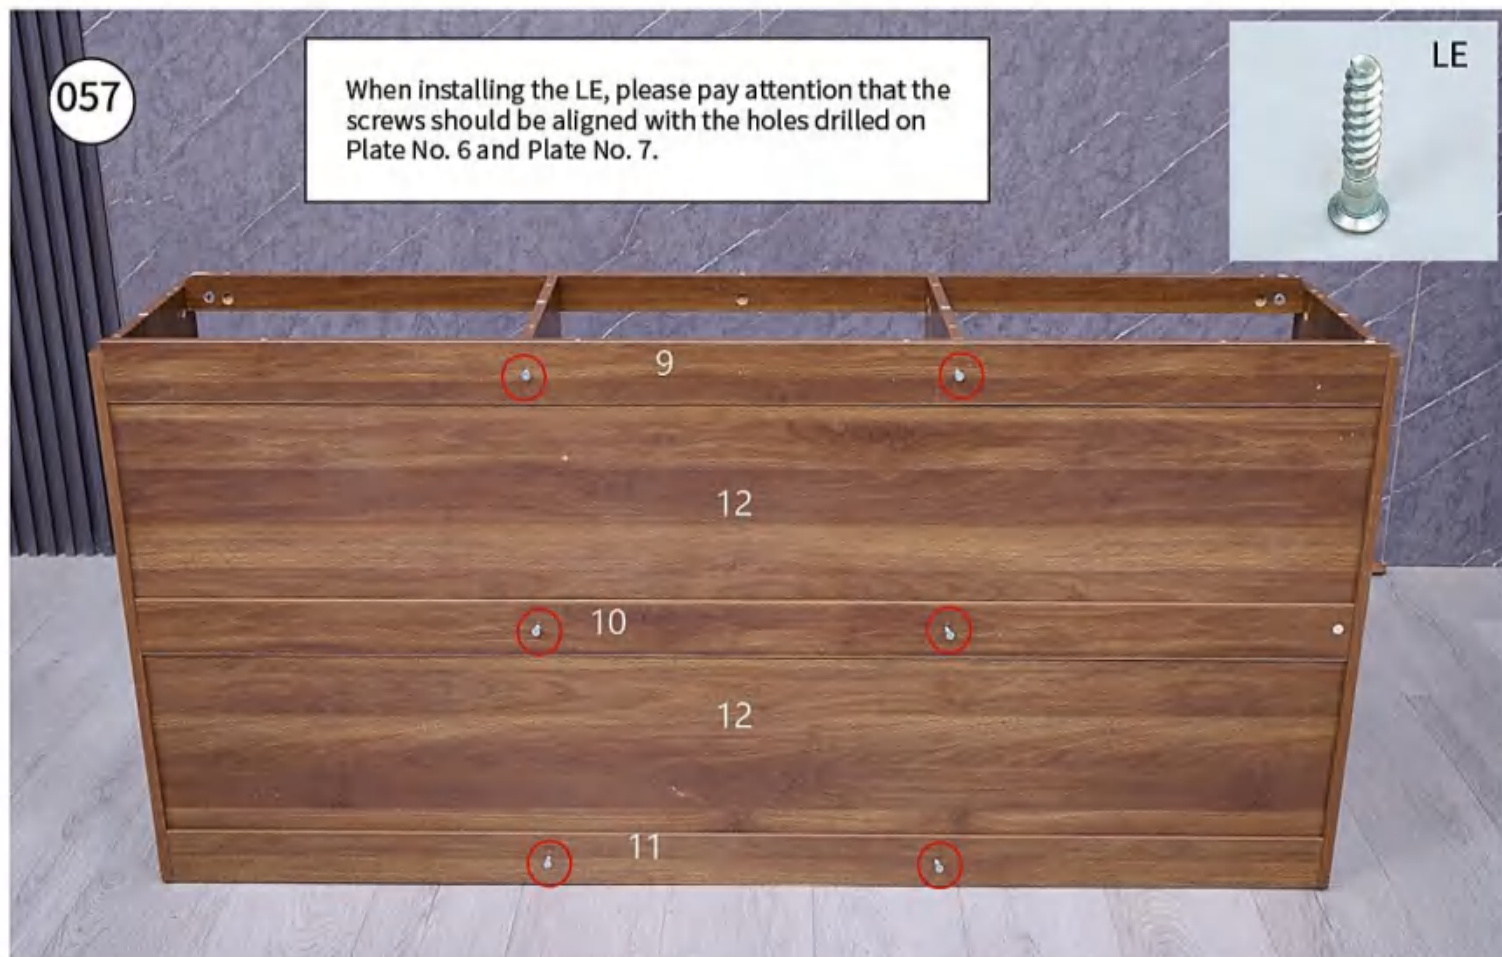

059

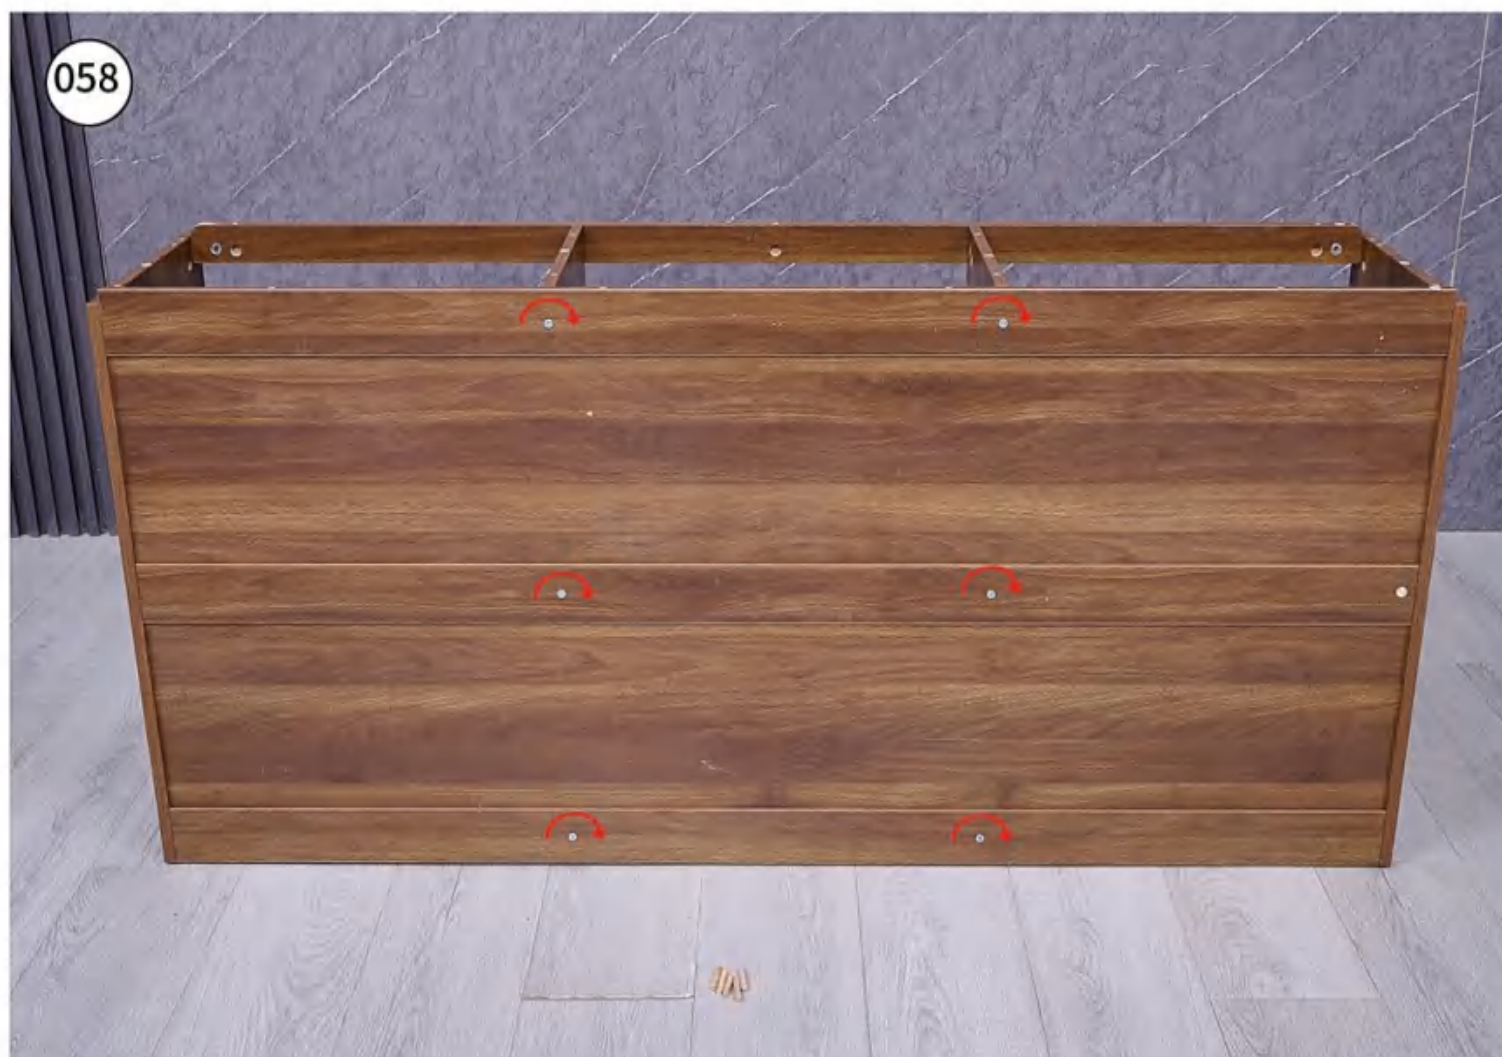

057

When installing the LE, please pay attention that the screws should be aligned with the holes drilled on Plate No. 6 and Plate No. 7.

LE

058

059

060

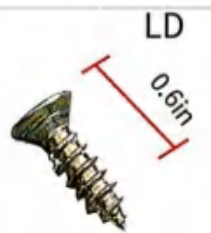

061

LD As shown in the figure, install LD according to the positioning on Plate No. 9, Plate No. 10 and Plate No. 11.

062

063

Attention: Plate No. 18 and Plate No. 19 have a front and a back. The end with a right angle is the back, and the end with a rounded corner is the front. Install them according to the illustration.

17

064

LA

065

069

070

LB

Install the corresponding LB.

073

The drawers are divided into left, middle and right. Install Drawer A on the left, Drawer B in the middle and Drawer C on the right.

074

As shown in the figure, pull out the inner rail of the drawer, and also pull out the silver metal sheet inside.

075

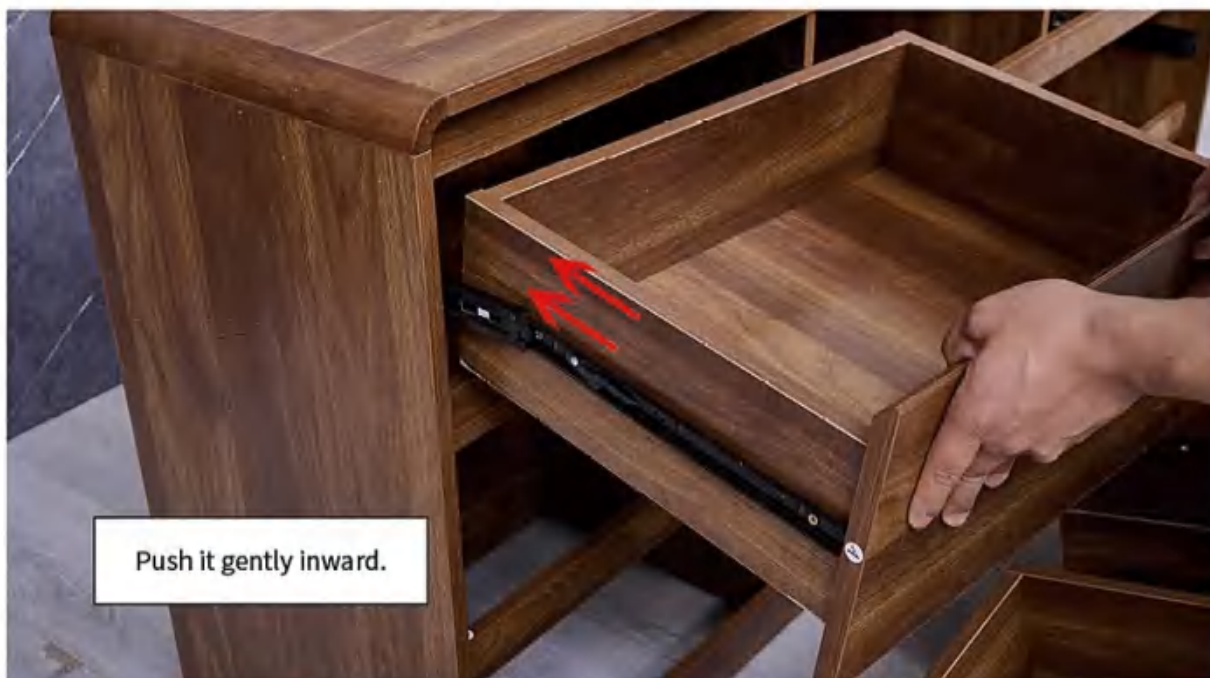

076

The inner rail of the drawer should remain parallel to the outer rail of the drawer.

077

Push it gently inward.

078

The inner rail of the drawer should remain parallel to the outer rail of the drawer.

079

Push it gently inward.

It doesn't matter if the installation is not successful at the first attempt. Press the black plastic parts on the inner rails on both sides, and you can easily take out the drawer (you can refer to Step C of the slide track disassembly on the second page of the installation diagram) and install it again until it is properly installed.
