Coffee cauldron User Manual

1. Product Material and Safety

Our coffee urn features an inner bucket made from food-grade material, ensuring compliance with hygiene and health standards, making it safe for storing and dispensing various or hot drinks.

2. Precautions:

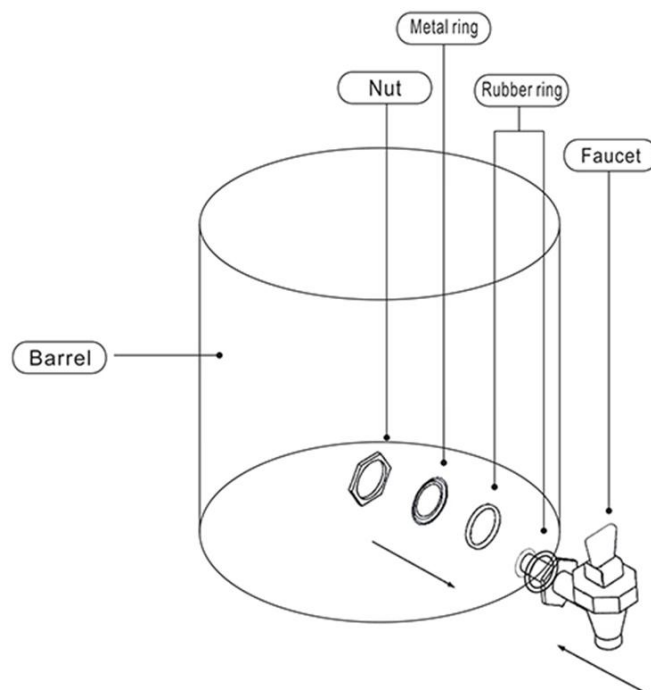

- Place the Coffee cauldron on a flat and stable surface to ensure its stability and safety.

Feel free to contact our technical service team if you have any questions regarding the warranty and after-sale

Faucet Installation Tips

1. Install according to the instruction figure below, the faucet should be close to the outer urn, and secure the faucet temporarily by hand to hold it in place during the installation process.
2. Install the rubber ring, metal ring and nut according to the direction and sequence shown in the figure. Note: The dimple of the metal ring needs to face the body of the barrel.
3. Fix the nut with a wrench until the faucet does not move.

Note: Do not install too tightly, as this may cause excessive wear on the rubber ring.
