## Precautions and maintenance

- 1: To avoid scratching the surface of the lamp during installation, gloves should be worn during installation
- 2: A solar panel is placed on the top of the lamp, and the installation position must allow it to receive sufficient sunlight. Try not to place anything on the surface of the solar panel and do not cover it casually
- 3: When installing, cleaning, or replacing a light source, it is necessary to cut off the light source.
- 4: During the use of lighting fixtures, do not frequently switch on or off the power supply to avoid damage to the fixtures.

The installation of lighting fixtures must be carried out by professional personnel, taking into account electricity consumption, load-bearing capacity, and secure screws to ensure safety.
