ASSEMBLY & INSTRUCTIONS

**IMPORTANT! TO PREVENT ELECTRICAL SHOCK,
TURN OFF ELECTRICITY AT CIRCUIT BREAKER
OR FUSE BOX BEFORE PROCEEDING WITH INSTALLATION.**

Remove all parts and parts packages from carton.

1. Thread two long Machine Screws and Green Ground Screw into
   Mounting Strap.
2. Fasten Mounting Strap to Outlet box (not provided) with
   Mounting Screw.
3. Connect the wires. Splice the black, smooth, or round Fixture
   Wires to the Black Supply Wire and the white, ribbed, or
   flat-sided Fixture Wires to the White Supply Wire using wire
   Connectors.
CAUTION: Be certain that no bare wire strands are exposed
   outside of the wire connectors.
4. Attach the Ground wire onto the Mounting Strap with Ground
   Screw and tighten.
Carefully tuck all spliced wires into the Outlet box.
5. Mount Fxture Pan to ceiling allowing Machine Screws to pass
   through holes in the Fixture Pan and secure with Small Ball Nuts.
6. Install lamp (not included).
7. Installing Glass Shade (not included) with sokcet ring.
The installation is now complete and power may be reconnected at
the main fuse box.
