EASY TO INSTALL

Maintain Overlap: For optimal stability, always keep at least a 3-inch overlap when extending the curtain rod, regardless of its thickness.

Install All Hooks: Ensure every hook is securely installed to properly support the weight.

Adjustable Length: For this double curtain rod setup, you can easily adjust the overall length by adding or removing Type （B2） rods as needed. Note: Please ensure that both the front and back rods use the exact same number of rod sections.
