

# CRYSTAL FIRE

## CF-1224 Log Set Installation Guide

Thank you for purchasing a gas log set for your 12"x24" Crystal Fire burner. These instructions will assist you in setup and placement of your new log set.

Included in this kit:

1 Bag of decorative volcanic stone

5 Refractory cement gas logs

Logset grate

### Step 1:

After installing crystal fire burner in fireplace, set log set grate in burner pan and center it so there is an even amount of space on each side as shown in figure 1.

### Step 2:

Scatter supplied lava rock around base of grate, covering entire burner pan evenly. Take care to avoid obstructing the igniter.

### Step 3:

Place logs on grate in the order shown.

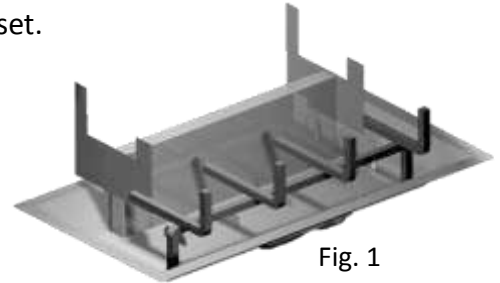

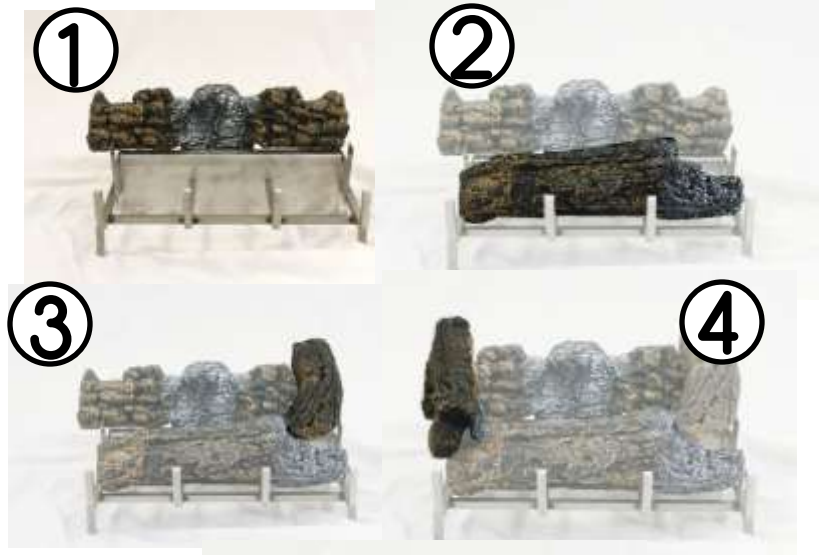

Fig. 1

### Note

Improperly ventilated log configurations may cause soot to appear on log surfaces. Rearranging logs to allow proper airflow should decrease sooting.
