Sweet Spot 1

D2203S44065-3551

Sweet Spot offers a compositional study of perspective and form. Tightly shot, the perspective is on tiered curvilinear lines in brilliant white framed against a teal-blue sky. Three-dimensional form is achieved by both the angle of the shot and the sheer mass of the structure. Strong contrasts and proportions add power to the overall composition with white lines standing in opposition to a field of solid color.

An expert composition, Sweet Spot offers the viewer a breathtaking display of architectural forms in an exclusive work of art for ART by TA.
