Care Instructions

Your wine rack is conditioned and protected with Feed-N-Wax to keep it looking polished and beautiful in your home. If you notice any oily substance upon receiving, simply wipe it down with a dry cloth. This can be reapplied whenever the color starts to fade to bring out the natural features once again and add back that layer of polish.

Also, all wine racks now come with upgraded wall anchors! These DuoPower plugs boast intelligent 2-Component Technology to fasten to Concrete, Bricks, Drywall, Chipboard, etc.!

Hanging Instructions

Step 1: Insert the supplied #6 2.5"phillips head screw into the pre-drilled hole.
Do until about 1/8" of the screw exits back side of board. At desired height hold the shelf level and press the screw tip into the wall surface as a marker.

Step 2: Either on a stud or using the supplied drywall anchor (pre-drill a small hole in the wall if using anchors), tighten screw until secure. Do not over-tighten.
