Note:

Step 34 / 35

Note:

You may need patience to get a perfect smooth slide of drawer experience, and we appreciate your patience.
Asking for a second person to assist you will simplify the process.

1.Align Components: Position the groove on the drawer side to match the rail profile. Insert a precision tool (e.g., screwdriver tip) into the outermost hole of the slide rail. Ensure both sides are aligned symmetrically.

2.Slide Drawer Inward: Gently push the drawer into the cabinet until slide come up against drawer front. This step needs to be done simultaneously for both sides.

3.Secure & Adjust: While maintaining pressure on the tool, slowly pull the drawer outward until slide can not be moved.

4.Finalize Installation: Locate the pre-drilled mounting holes where the rails meet the drawer sides. Securely tighten all screws on both sides.

Step 35 / 35
