

Assembly Instructions

Why bamboo?

- Renewable resource – Bamboo has the Fastest Growing Cycle of any furniture raw material – 5 years sprout to harvest.
- Bamboo also has superior structural strength as well as the lowest moisture expansion/contraction displacement of any furniture raw material 50% lower than Oak or Pine
- Environmentally desirable UV activated finish – virtually 100% of the finish is utilized without spray or runoff waste and it dries instantly when exposed to UV Light without heat.

Parts 2 and 3 are fully assembled, please insert 3 into 2 at an angle as shown below and then push 3 into position. You will have some small resistance as the bamboo bows slightly to allow the correct orientation.

Be careful not to over tighten the B screws when attaching part C.
