Temperature adjustment:	The sauna will reach a maximum temperature of 150 Fahrenheit under ideal experimental conditions. Under normal environment temperature, the sauna will reach a maximum temperature anywhere from 140 to 150 Fahrenheit.	
Description:	This 1-person high-quality sauna consists of a 100% solid wood framework with tongue-in-groove boards, and it is crafted with either African okoume and Canadian hemlock wood. No matter which luxurious material you prefer, the sauna will be a beautiful addition to further decorate your home. The energy efficiency of the product makes it a better choice for both the environment and your utility bills. With Bluetooth technology, this sauna is the perfect place for you to relax with the music of your choice while enjoying a wide array of health benefits, such as increased blood circulation, better sleep, and weight loss.
