## Assembly

# RÎSE UP

#### **STEP 1: Adjust The Frame Width**

- Adjust the frame to your desired width and install 8pcs of the M6x10 screws to secure it in place.
- Ensure the large circular holes on the side of the frame are uncovered.
- You can easily adjust the frame width later.

#### STEP3: Connect the Feet to the Columns

- Connect each foot to a column with 4pcs of the long M6x35 screws.
- The black, circular feet can be unscrewed later to level your desk.

#### STEP 2: Connect the Columns to the Frame

- Screw the columns to the frame with 8 pcs of M6x10 screws.
- Ensure the side holes are uncovered so you can insert the screws through the frame into the column.

#### **STEP4: Install The Brackets**

- Slide the side brackets on each end of the frame and secure them with 2pcs  $\mathsf{M6x14}$  screws.

#### How To Use The Memory Settings:

- Adjust the desk to your desired height.
- Press and hold "M" until the screen shows  $\mathsf{S1}$
- Press the number you'd like to save the height.

#### How to Reset Your Desk:

- 1. Press the down arrow to lower the desk. release the down arrow
- 2. Press and hold the down arrow until the screen shows ASR. release the down arrow
- 3. Press and hold the down arrow until the screen shows the numerical height. The desk should lower all the way and then raise slightly. release the down arrow
