F. Base/Shelf

x 2

Front

Spare Screws x 10 (1 bag)

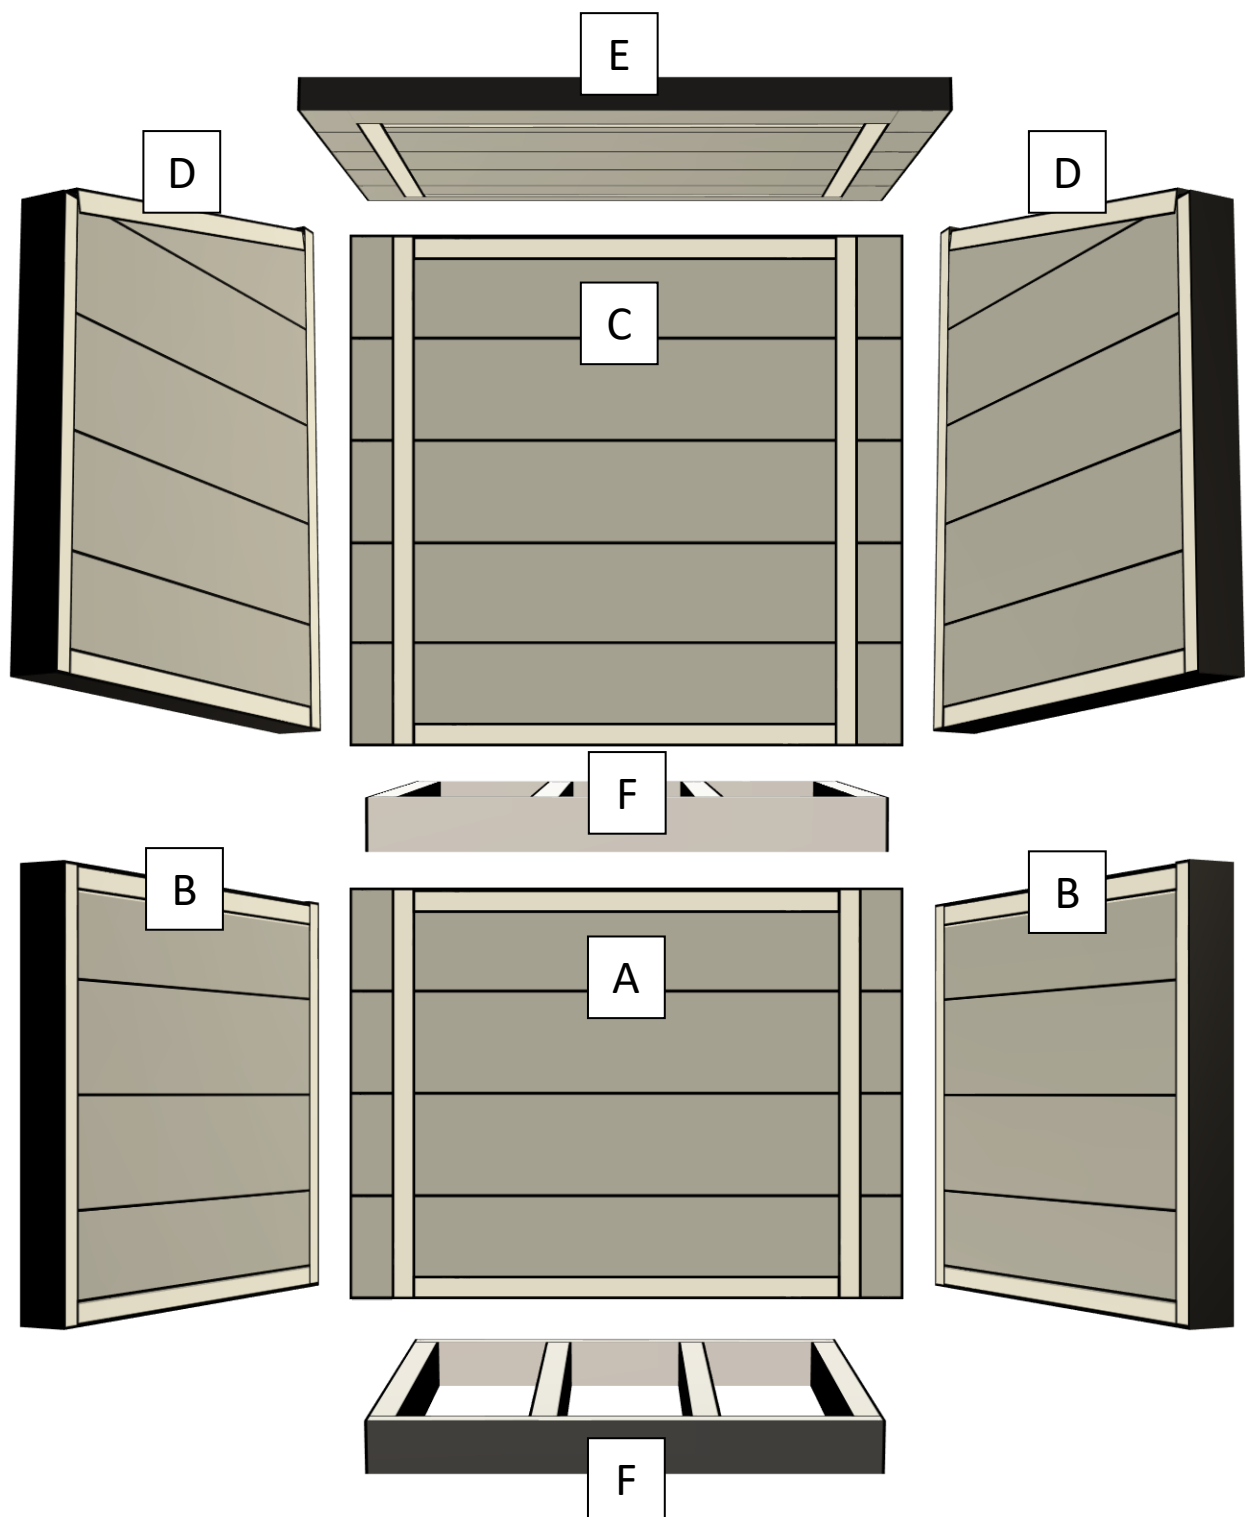

Pre-drilled Screws shown in red.

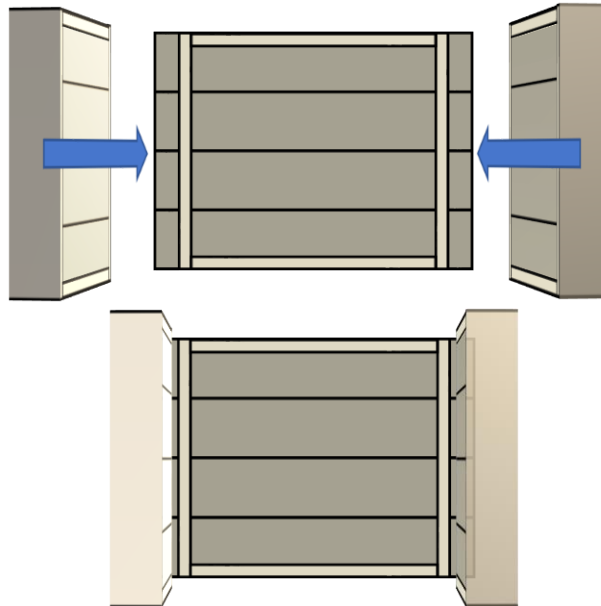

Please note: Base and Shelf placed inside Side Panels for packing reasons.

Tools Required:

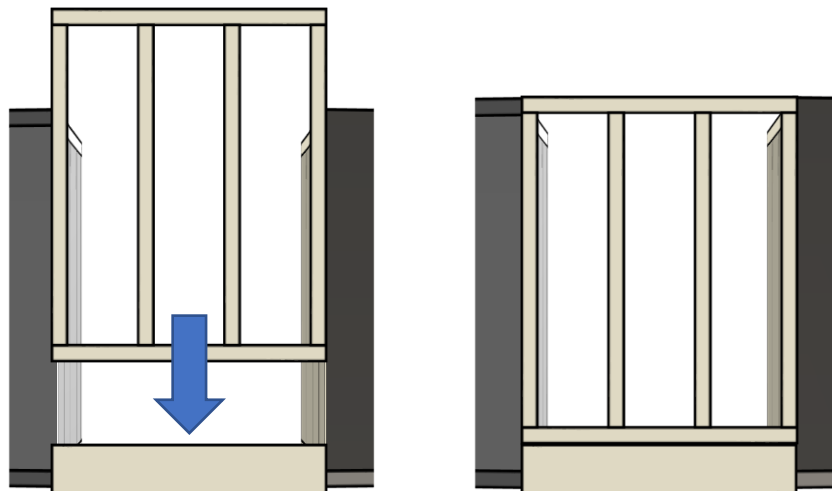

Philips Screwdriver

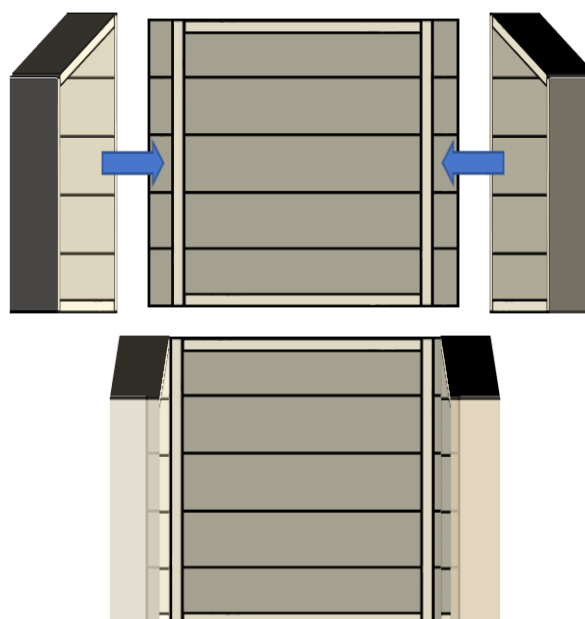

1. First, attach the 2 Lower Side Panels (B) to the Lower Back Panel (A), using the pre-drilled screws provided.

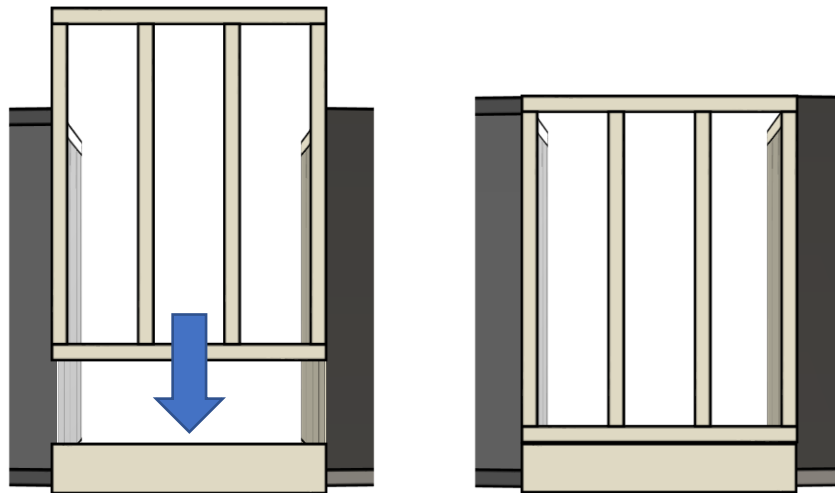

2. Once secure, flip the Lower section onto its back, and attach the Base (F), using the pre-drilled screws provided.

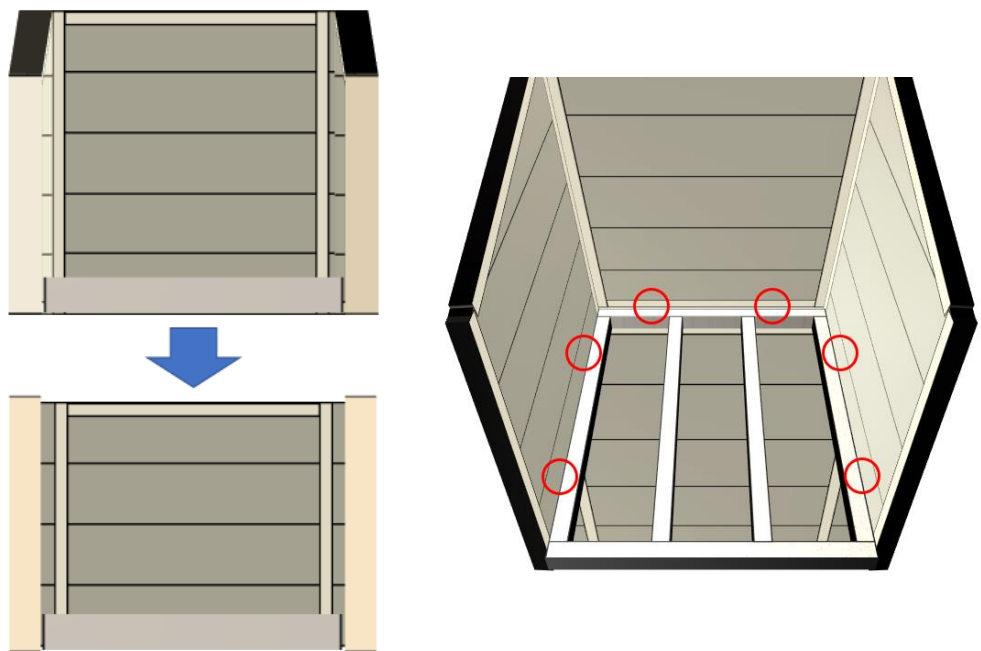

3. Now move onto the Upper section of the frame, attaching the 2 Upper Side Panels (angled) (D) to the Upper Back Panel (C), using the pre-drilled screws provided.

4. Now insert the Shelf (F), in the same way as the Base, using the pre-drilled screws provided.

5. Now place the Upper section of the frame onto the Lower section and screw together where shown.

6. Finally, sit the Roof (E) on top of the complete unit and screw together where shown.
