DIMENSIONS & WEIGHT CAPACITY

Rated weight capacity is 33lbs for the mount.
Caution:
Ensure all mounting surfaces are capable of holding the weight of your mount.
DO NOT EXCEED MAXIMUM LISTED WEIGHT CAPACITY.
SERIOUS INJURY OR PROPERTY DAMAGE MAY OCCUR!

Step 1

Unfold the Arms

- Unfold the Folding Arm Mounts (#C) until the two ends are fully extended and latch into place at a 90 degree angle.

Step 2

Connect the Shelf Segments

- Lay the Left, Middle, and Right Shelves (#A, #B) upside down on a flat surface in the orientation shown here so that Middle Shelf (#B) is in the center.
- Attach the Shelf Connectors (#D) across the shelf segments as shown using all 32 Bolts (#E) and tighten until secure.

Note: If a shorter length shelf is desired, the left and right segments can be connected without the middle segment for a 30" wide surface.

Step 3

Step 3a

Concrete/Brick Installation: Attach the Arms to the Shelf

Note: Follow this step for Concrete/Brick wall installation. For Wood Stud wall installation proceed to step 4a.

- Place the Folding Arm Mounts (#C) on the bottom of the shelf, centered in the middle of the left and right shelf segments as shown here. Position the back of the mounts to the rear of the shelves, ensuring that the front of the brackets do not extend out over the front edge of the shelf.
- Once the position is decided secure the Folding Arm Mounts in place using the Screws (#H) through the arms into the shelves, 4 per each arm mount.

Step 3b

Concrete/Brick Installation Option

- Hold the shelf to the wall in the desired mounting location and mark the center of the mounting holes with a pencil (6 per arm.)
- Remove the shelf from the wall. Drill holes in the marked locations using a 5/16" drill bit (8mm) to a depth of 3.3" (85mm). Clear dust or debris from the holes and insert the Concrete Anchors(#G) fully until flush with the wall.
- Hold the shelf in place over the holes and anchors. Install Lag Screws(#F) through the mount arms and into the concrete anchors then tighten the screws until secure. Do not over tighten.

Note: Do not drill mounting holes into mortar (such as between bricks or stones) only drill and install into solid stone or concrete surfaces.

Step 4

Step 4a

Wood Stud Installation: Attach the Arms to the Shelf

- Using a stud finder locate the studs and mark the edges of each stud with a pencil, then measure the distance between the center of each stud.
- Place the Folding Arm Mounts (#C) on the bottom of the shelf, so that the distance between the holes on one side only of each arm is equal to the distance between the two studs. **Only 3 holes on 1 side of each arm mount will be used**, ensure that these are positioned to be the same distance as the center of the studs.
- Once the position is set, secure the Folding Arm Mounts in place using the Screws (#H) through the arms into the shelves, 4 per each arm mount.

Step 4b

Wood Stud Installation Option

- Hold the shelf to the wall in the desired mounting location and mark the center of the mounting holes with a pencil (3 per arm, on one side of each arm only.)
- Remove the shelf from the wall. Use a 1/8" drill bit and drill on the marked locations to a depth of 3.1"(80mm).
- Hold the shelf in place over the holes and secure the shelf to the wall using 6x Lag Screws (#F), 3 per arm. Tighten the screws until secure.

Step 5

Folding the Shelf

- To fold the shelf down against the wall, squeeze the handles on the underside of each arm up until the latches release, then press the shelf slowly down until it stops.
