ASSEMBLY INSTRUCTION

Note:

1.Before fixing all screws, tighten each screw to 50% using an Allen wrench instead of an electric drill. If any screws are fully tightened during assembly, it is likely that the others will not align with their respective holes. Additionally, the holes are intentionally designed to be relatively larger to allow for adjustment of the screws.

2.Place the item on a flat surface to ensure stability during adjustment.

3.Gradually tighten all screws using appropriate tools.

4.If screws are not aligned with their respective holes during assembly, loosen all other screws to 50% and then continue the assembly process.

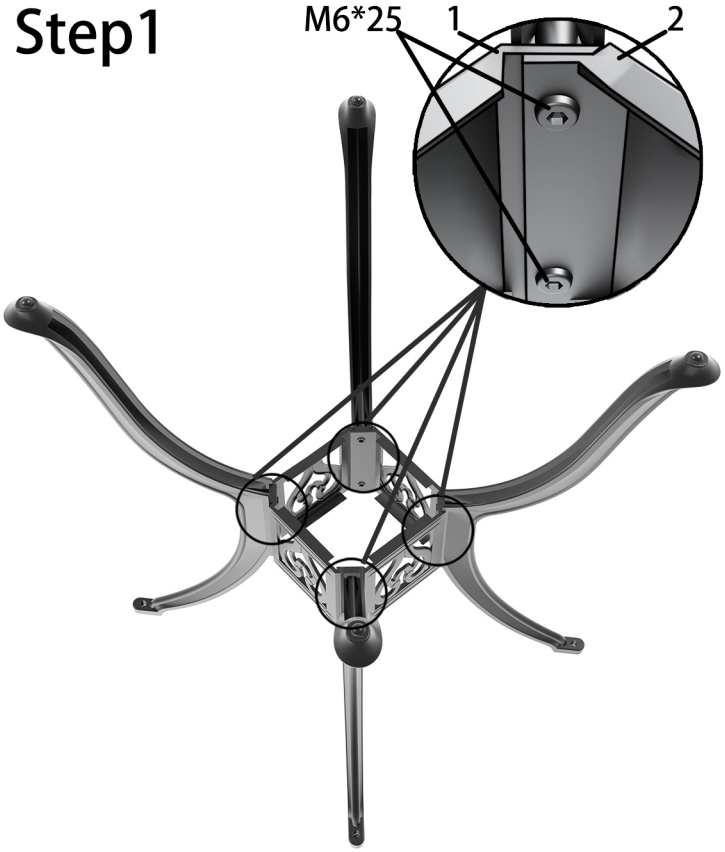

5.If the item is unstable, loosen all screws, adjust it on a flat surface, and then retighten all screws.

Hardware Fittings

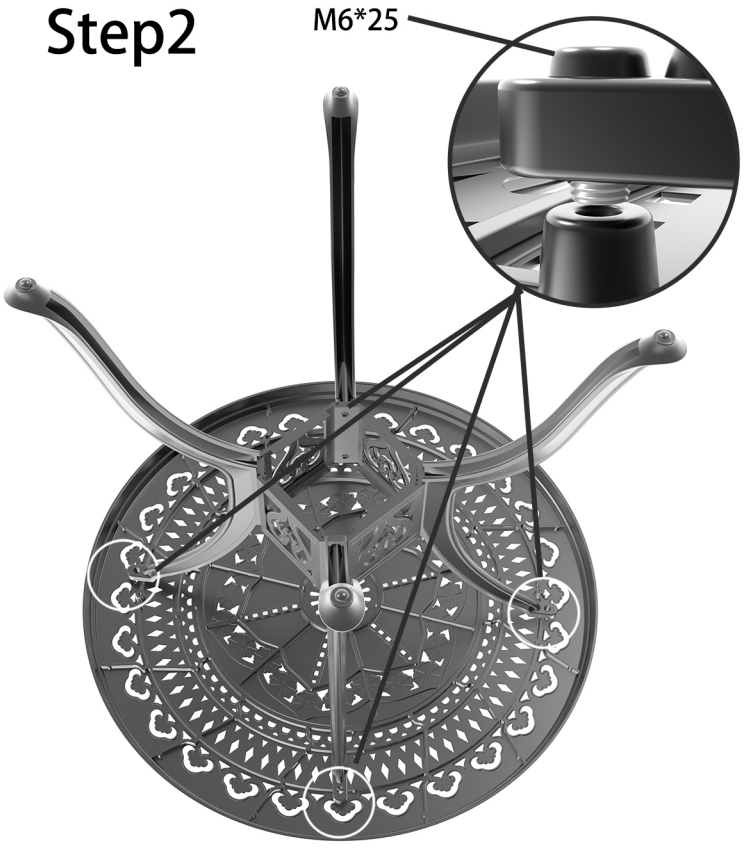

Item No.	Reference Image	Description	Qty.	Extra Spare Parts Qty.
A		screw M6*25	12	1
B		washer M6	12	1
C		spring washer M6	12	1
D		allen key M4	1	1
E		Adjustable foot pads	4	1

ASSEMBLY INSTRUCTION:

1.Initial Tightening

Use a hex key (Allen wrench), not a power drill, to tighten each screw to about 50% before fully securing any of them. Fully tightening one screw too early may cause others to misalign.

2.Final Tightening

Once all parts are aligned, gradually and evenly tighten all screws using the proper tools.

3.Misalignment Fix

If some screws don't line up, loosen all screws to 50%, adjust the parts, and try again.

4.Stability Issue

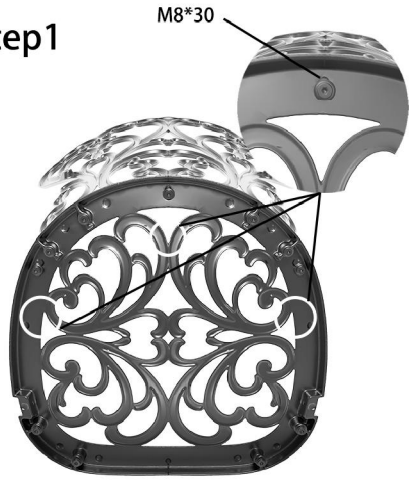

If the item feels unstable, loosen all screws, adjust it on a flat surface, then retighten them evenly.

Hardware Fittings

Item No.	Reference Image	Description	Qty.	Extra Spare Parts Qty.
A		screw M8*35	4	1
B		screw M8*30	11	1
C		spring washer for M8	15	1
D		nut for M8	15	1
E		washer for M8	15	1
F		Screw cap	15	1
