# WARNING

## Important Before Use:

Damage from improper installation or adverse weather use is the user's sole responsibility.

**Do not use this tent in high winds, heavy snow, or inclement weather.**

Do not insert L-shaped stakes vertically. For enhanced stability, drive stakes into the ground at a 45° angle.

This tent is designed as a temporary structure. Do not leave unattended outdoors for extended periods or overnight.

When the wind speed is high, ensure all doors are open and aligned with the wind direction to prevent the tent from being lifted or blown away.

## Setup and Use Instructions:

1. Store tent in a climate-controlled area. Clear debris before setup/takedown; Avoid contact between fabric and sharp/hard objects.
2. Setup on flat ground,  $\geq 1.8\text{m}$  away from obstacles. Secure with stakes and guy ropes to prevent collapse and hazards.
3. Ground nails for grass; expansion screws for hard surfaces (e.g. concrete). Do not mix.
4. Assemble poles per manufacturer's instructions; ensure tight connections—do not force assembly.
5. Inspect before use: confirm all fasteners are tightened; check for loose parts, uneven tension or safety risks.
6. Keep open flames/heat sources away—tent is not fire-resistant.
7. Implement regular maintenance; inspect stakes, ropes and structure for stability and safety.

The following installation methods will provide better wind resistance performance, extend the product's lifespan, and help you maximize its value, delivering an even better user experience.

1

If the deck you are installing is made of hardwood and has a depth exceeding 40mm, you can use ST8\*35mm screws to secure it in place. (This hardware is not included with the product, so you will need to purchase it separately.)

2

The best option is to fix it on a concrete surface. You can use the expansion bolts that are pre-configured with the product to secure it in place.
