1   Secure the mounting plate to the junction box.

2   Connect the fixture to a suitable ground in accordance to local electrical codes.

3   Connect the white fixture wire to the neutral power line wire with a wire nut.

4   Connect the black fixture wire to the hot power line wire with a wire nut.

5   Place the fixture base onto the mounting plate studs and secure it in place by screwing the cap nuts onto the mounting plate studs.

6   Screw the lamps into the sockets. Refer to the label on the socket for Max Wattage Information.

7   Install a hex nut onto each end of the threaded pipe, then screw the threaded pipe to the bottom of the socket assembly.

8   Attach the fixture arms to the hub with the provided thumb screws.

9   Attach the outer shade to the fixture arms with the thumb screws and nuts.

10 Place a steel washer, rubber washer, the shade, rubber washer, and steel washer (in that order) onto the threaded pipe, then secure them in place by screwing a hex nut onto the threaded pipe.

11 Place the cup onto the threaded pipe and secure it by screwing the finial onto the threaded pipe.
