

Cape Cod DECORATIVE FENCING

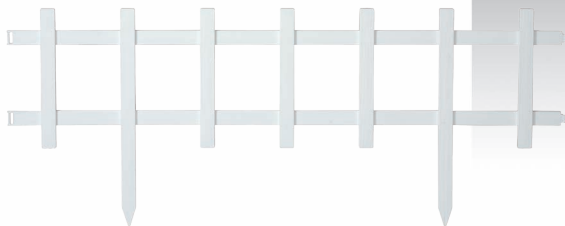

3 EASY STEPS

Create accent corners and straight runs by simply hooking the fencing pieces together. Interlocking sections make continuous lengths.

- 1 Lay out fencing pieces** along the area where you want to install. Be sure the fencing pieces are touching. You may want to hook them together as you proceed. The unique interlocking system enables the homeowner to create continuous lengths.

- 2 Gently tap built-in stakes into ground** when your design is completed. If ground is too hard, soften it with water. If necessary, make starter holes with screwdriver.

- 3 Continue fencing run.** As you go, hook Cape Cod Decorative Fencing pieces together with convenient interlocking system. Maintenance-free Cape Cod Fencing can be used to accent and define flower beds, shrubbery or any garden setting, path or walkway.
