Installation Step 2

B	 M6×10(×4)
F	

X2

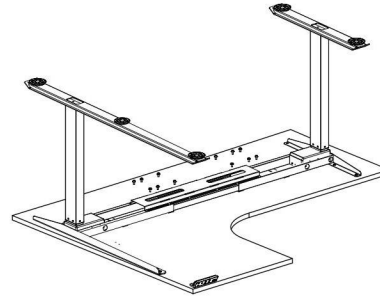

Installation Step 3

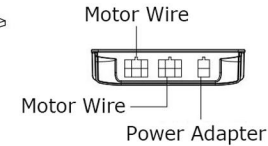

Note:

- 1.The side away from the hand controller has a long motor wire.
- 2.Adjust to the appropriate length according to the desk board hole positions.
- 3.The force for installing the desk board is approximately 8N.

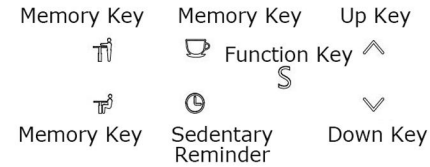

Installation Step 4

A	 M6×12(×8)
E	

Complete

Instructions for use:

- 1.To reset at the lowest position or when an error code appears, press and hold the  key.
- 2.To save a memory position: Move the desk to the desired position, press the S key until the display screen flashes, then press the corresponding memory key.
- 3.By briefly pressing a memory key, the desk will move to the preset height. Press any key during movement to stop the desk.
- 4.Sedentary Reminder Function: Press  key to enter the sedentary reminder settings, use the up and down keys to toggle between durations and to turn off.

- (1). The sedentary reminder is triggered when the adjustable desk remains at any height for longer than the set sedentary reminder duration.
- (2). After the sedentary reminder is triggered, it will remind every 2 minutes by flashing the current height on the display for 9 seconds, totaling three reminders.
- (3). If the desk's height changes within the set duration or before the three reminders are complete, the timer will reset.
- (4). When the sedentary reminder function is enabled, the third decimal point on the display screen will light up in the screen-off state, indicating that the function is on. When the sedentary reminder is off, there will be no decimal point indication.
- (5). If the desk's height remains unchanged after the three reminders, the sedentary reminder will automatically turn off. To reactivate the function, follow the activation steps again.

- 5.Child Lock Function: Press and hold the S and  keys simultaneously; the screen will display "LOC," indicating that the child lock is enabled. To disable the child lock, repeat the same operation.
