THANK YOU!

Dear Valued Customer,

Thanks to your kind support of ZEAFIVE, we hope our product can improve the quality of your life.

As our valued customer, your comments and opinions are very important to us. If you have any concerns, questions, or comments, we hope that you will bring them to our attention.

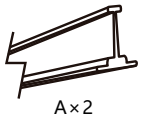

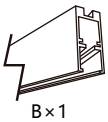

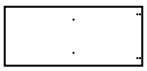

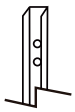

Please keep the carton and packaging materials until your product is completely installed.

Feel free to contact us if you encounter any problems such as missing parts, or product defects during the installation process. We are happy to provide you with the most sincere service.

Sincerely,
Service Team

Check carefully affter opening the box.Make sure there are no missing pieces and the shower doors do not have any cracks.During installation.please be careful with the corners of the glass doors. They are very fragile.After the shower doors are installed, the sliding doors should be parallel to each other to open and close smoothly, without gaps or water seepage, and the shower and the bottom basin should be sealed with silicone between them

The following instructions will guide you through the installation of a sliding shower door.

*Glass doors can be installed on either side.
Frame parts will need to be flipped over to install the sliding door on the left or right side.

Package contents

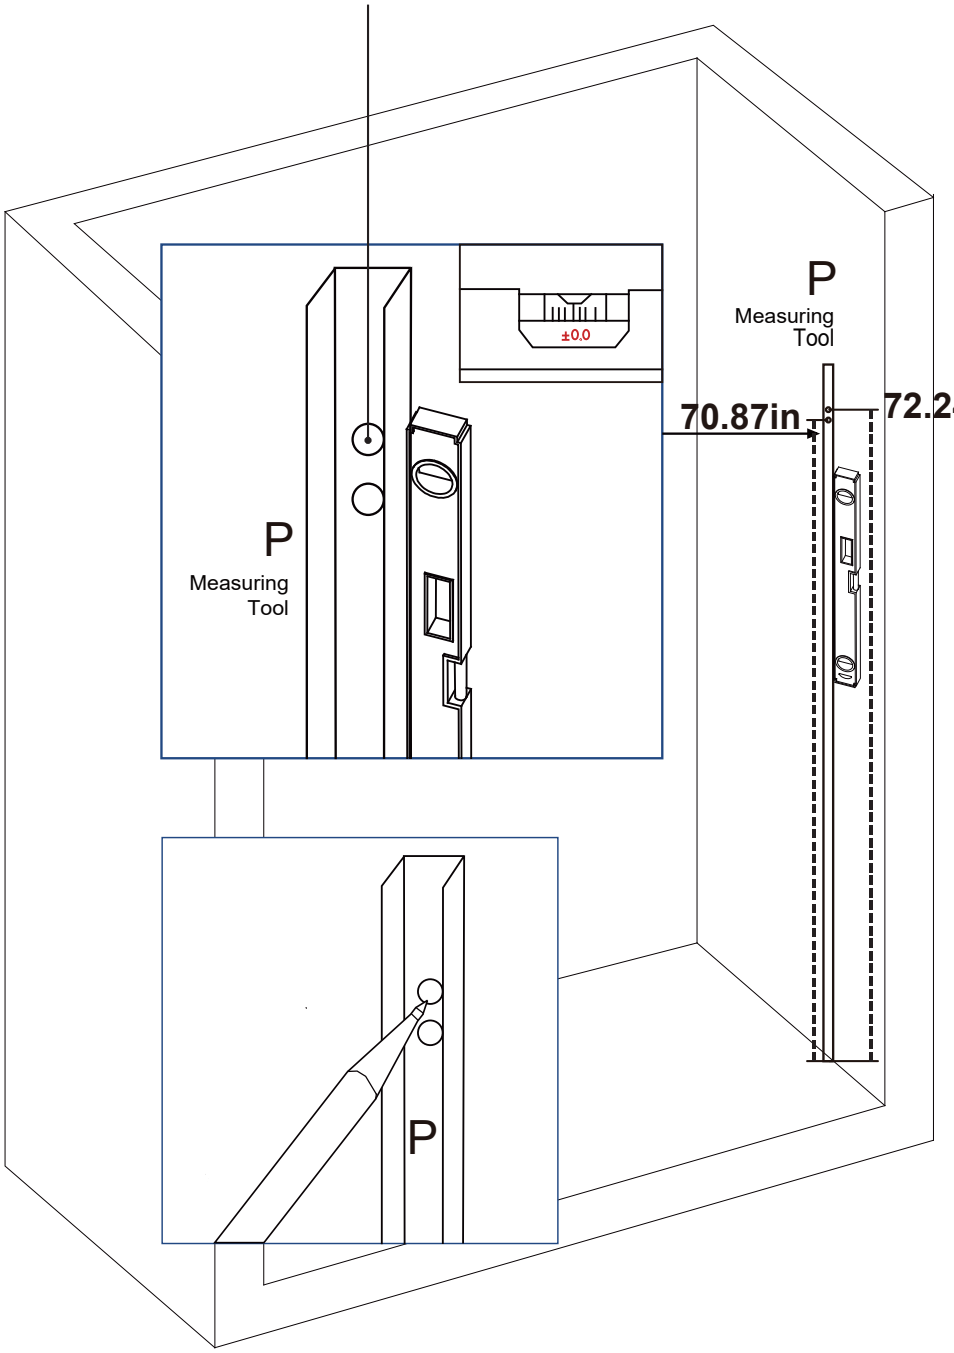

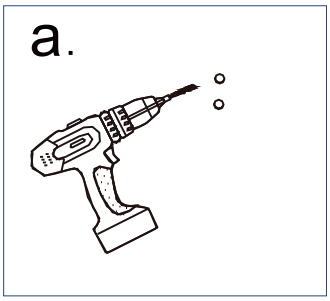

Measuring tool（No installation required): Only used for marking hole positions，please place this piece of aluminum on the ground against the wall, and mark on the wall according to the holes in the aluminum，then you can make the hole.

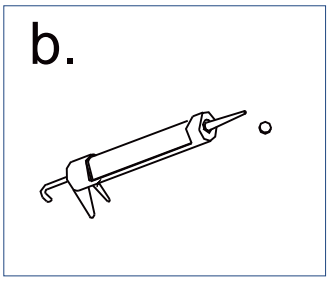

support@trendytotesinc.com 626 679 3588

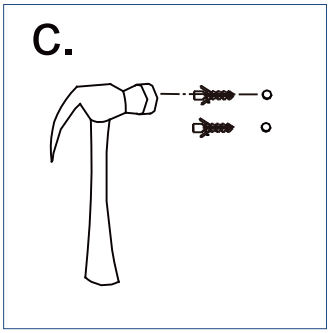

Step 01

48”*75”:Center hole position 70.87-72.24in(180-183.5cm) from the floor
60”*60”:Center hole position 55.91-57.28in(142-145.5cm) from the floor
60”*75”:Center hole position 70.87-72.24in(180-183.5cm) from the floor

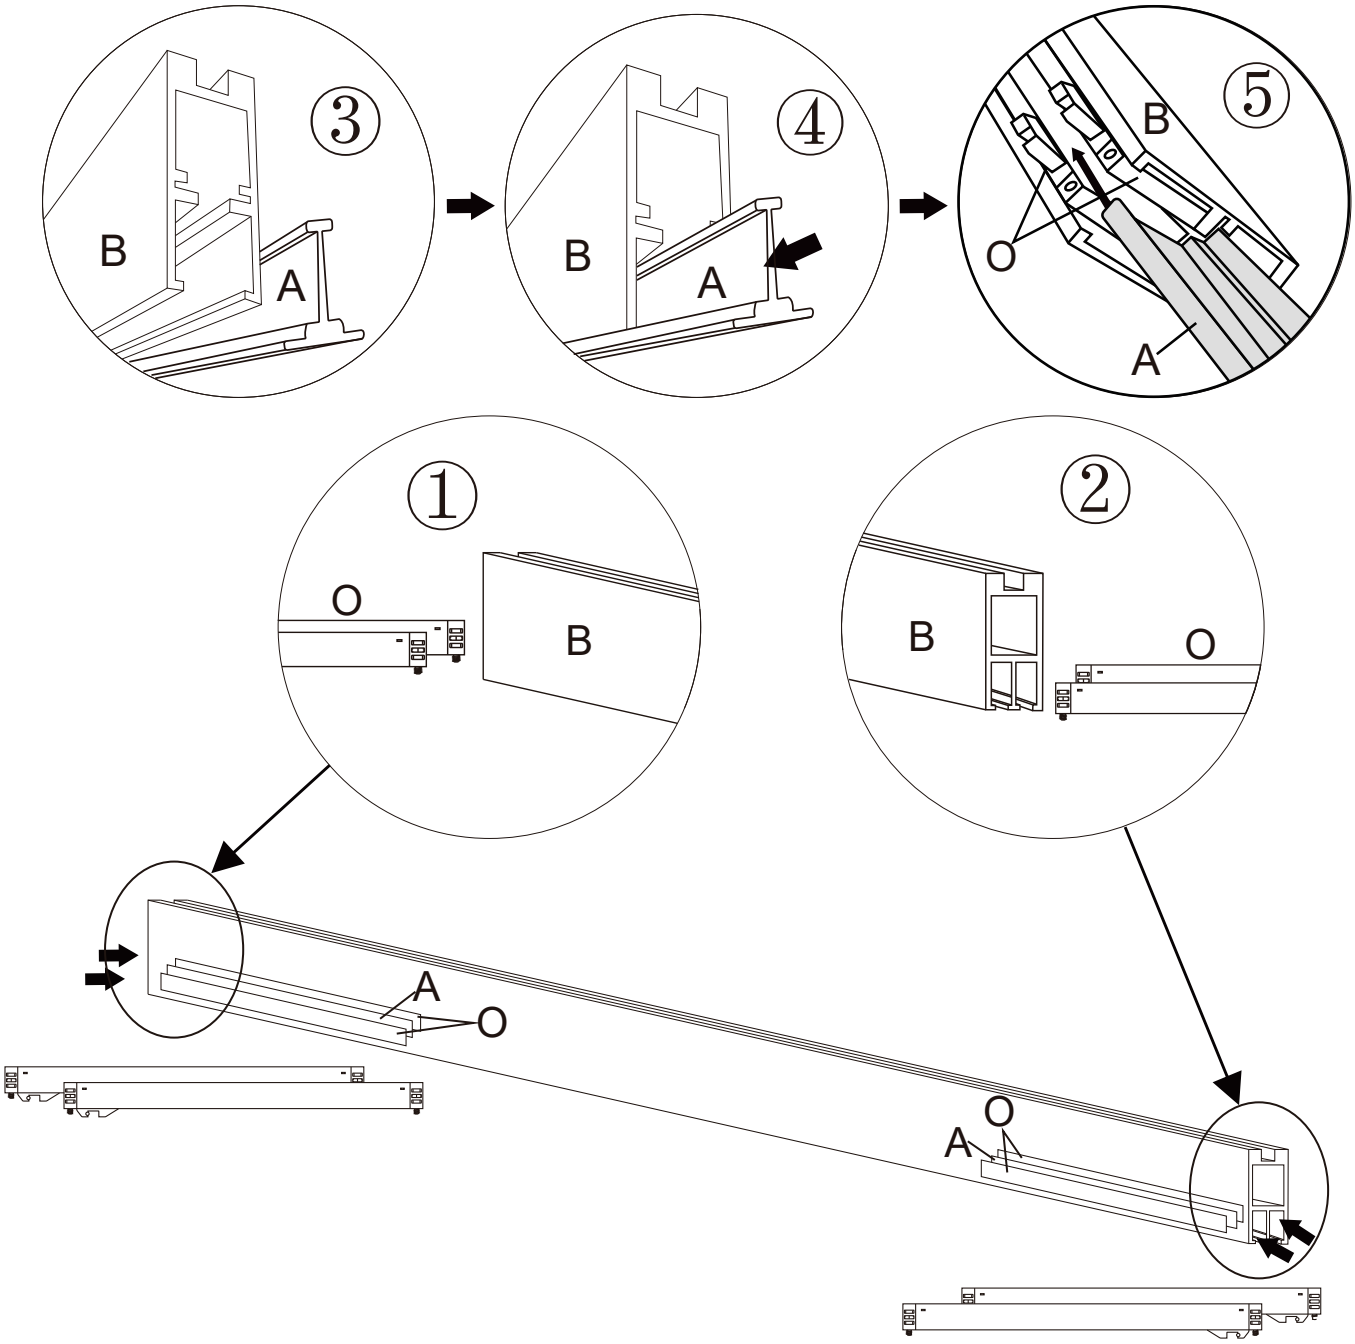

1.Place the Measuring Tool(P) vertically from the ground on theleft and right walls. Mark the installation holes on the walls according to the holes on the measuring Tool(P)
Drill holes in the location marked above and apply siicone intothe holes, insert the Wall anchors (K) for the Guide Rail Bracket

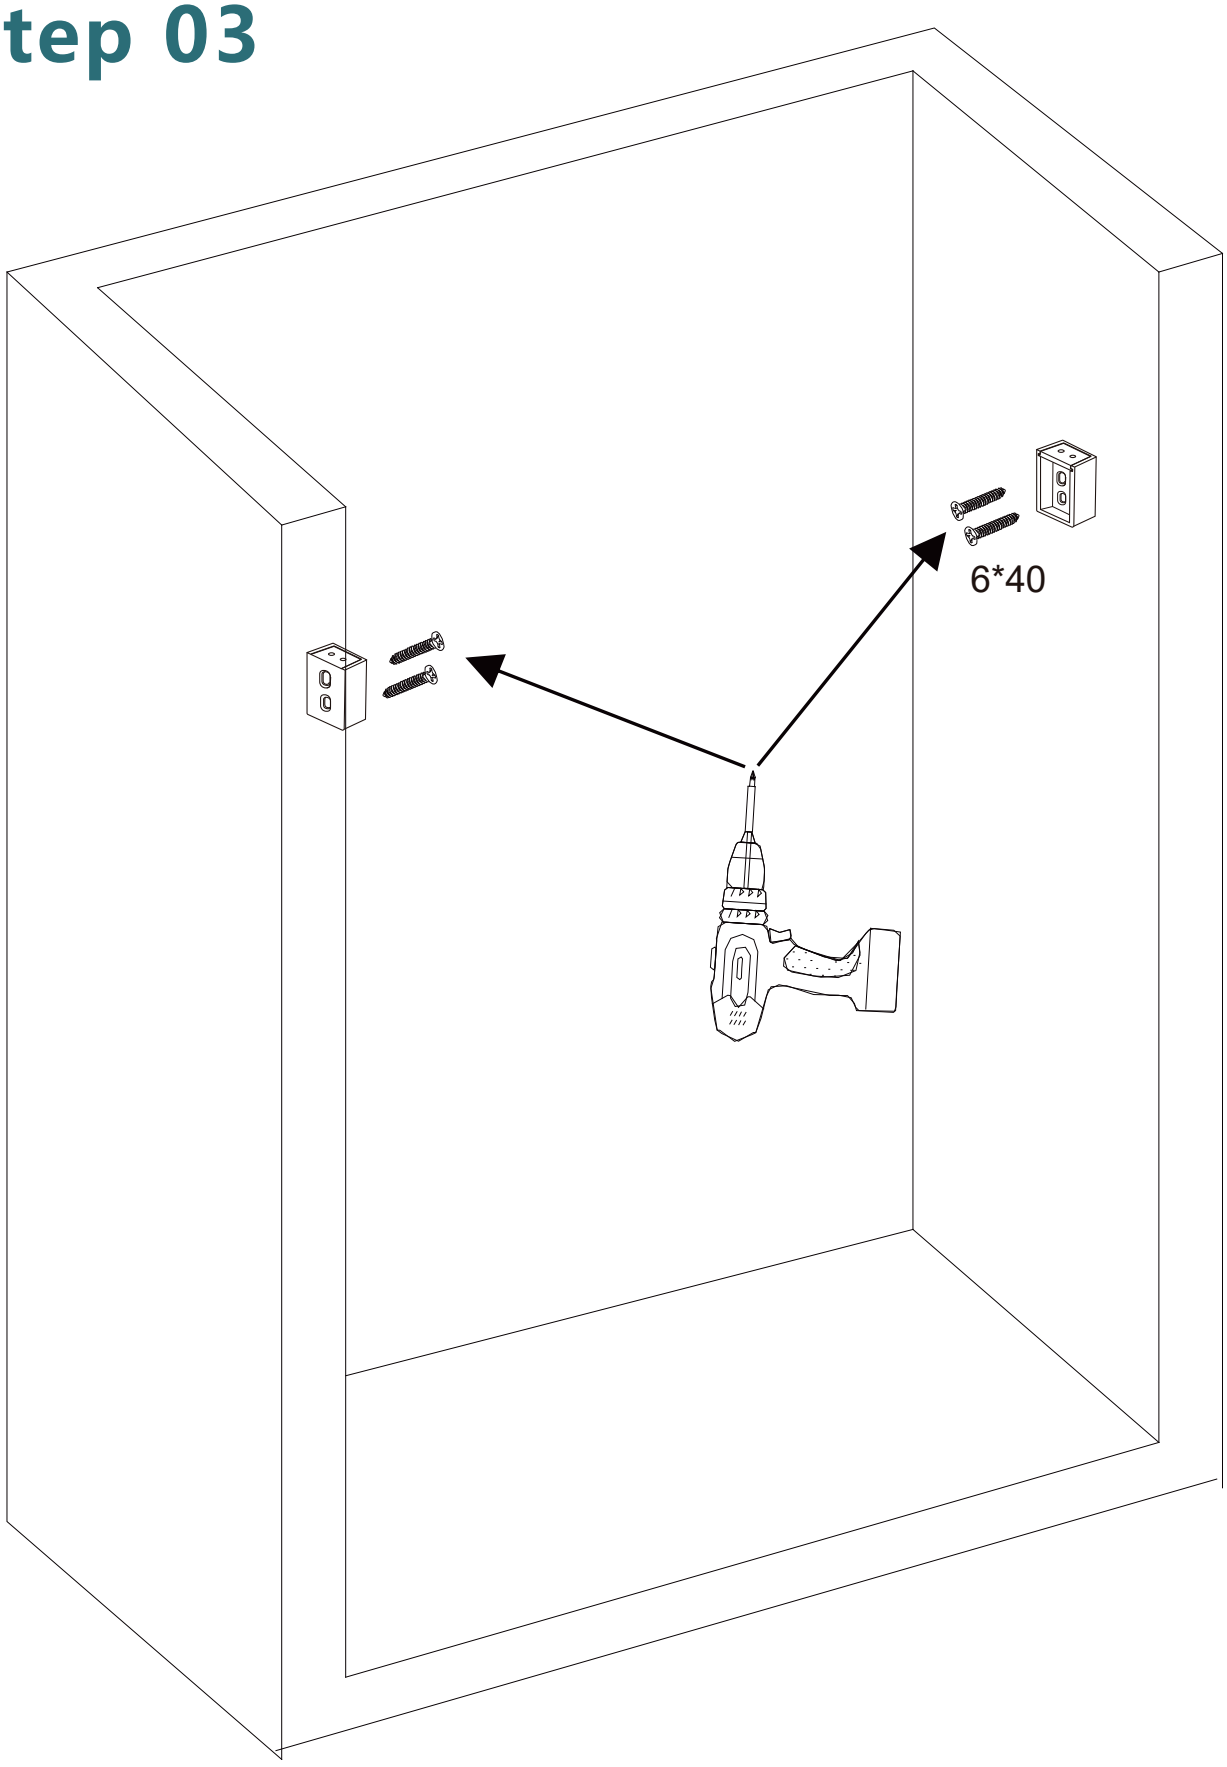

support@trendytotesinc.com 626 679 3588

Step 02

2.Insert Bottom Accessory of Upper Guide Rail (B) into Bottom Accessory of Upper Guide Rail(A) forms the complete Upper Guide Rail Install the Glass Door Buffers (O) into the two rails on each end of the upper connecting rod, two Buffers on each bottom end

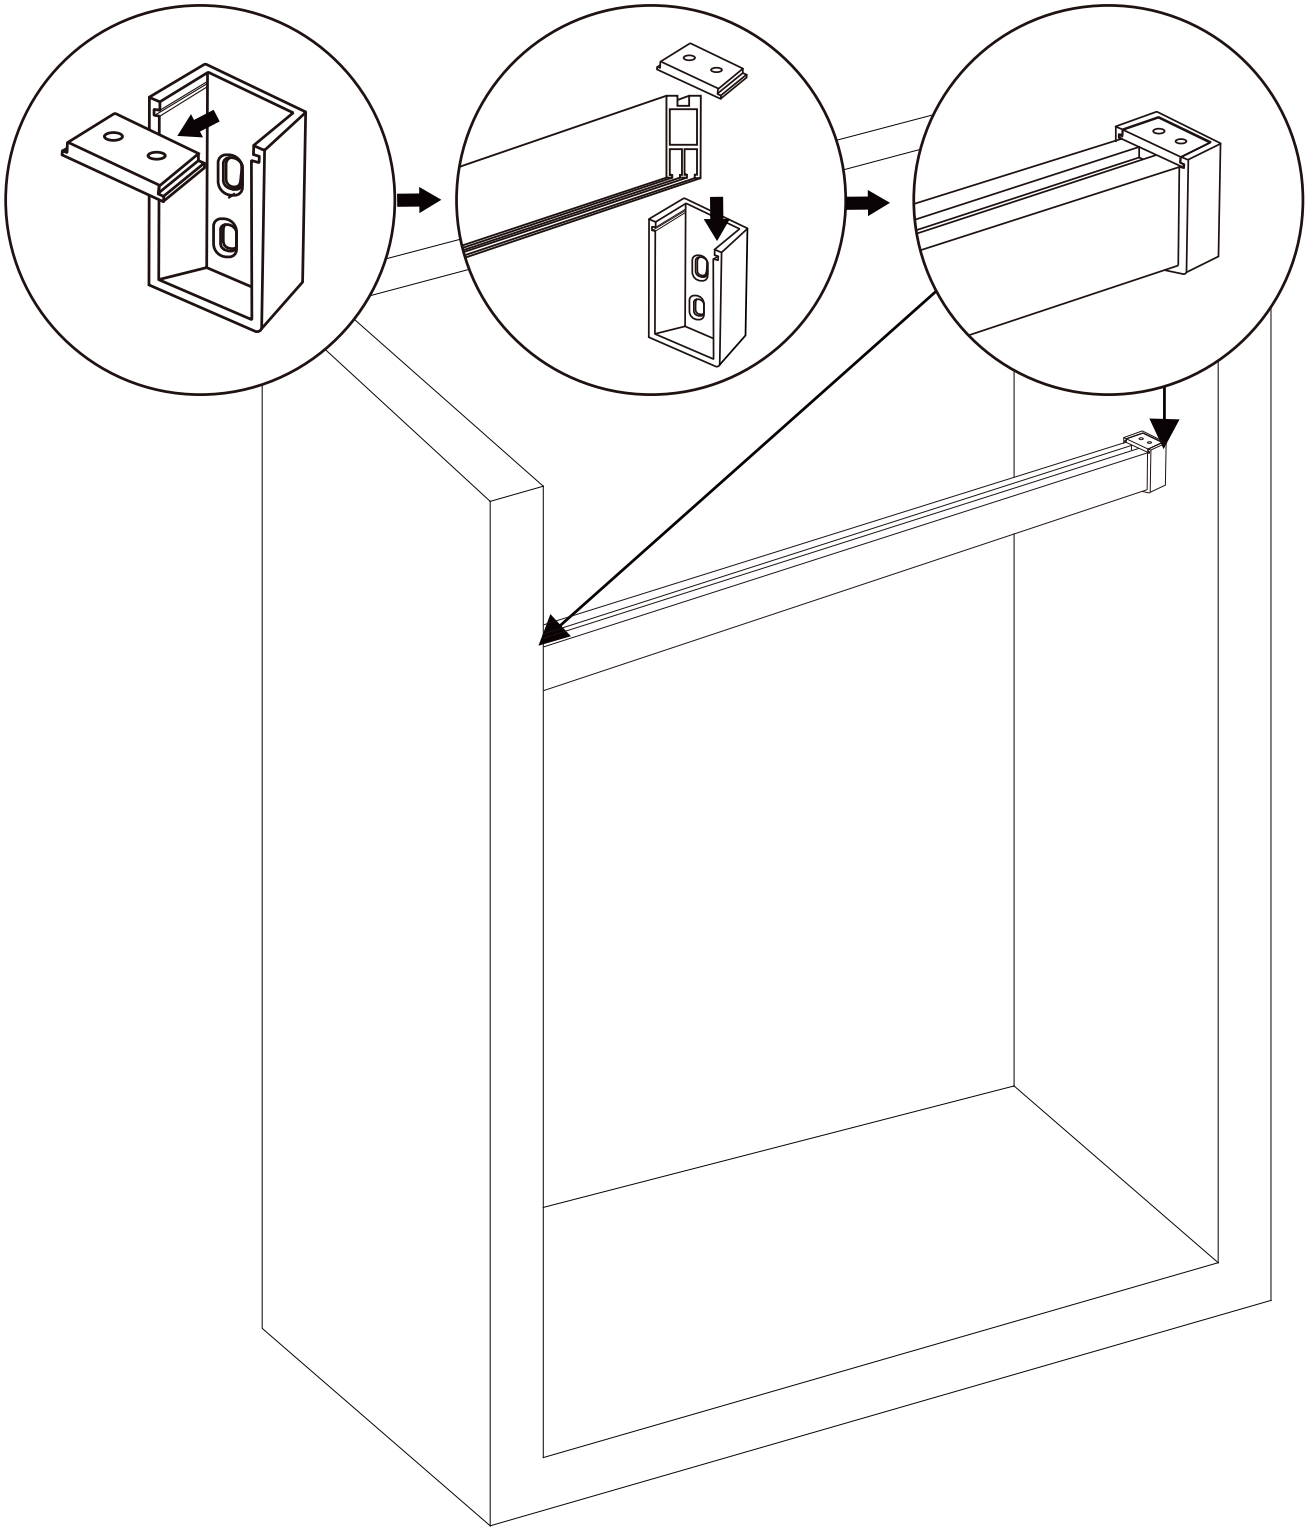

Step 03

3. Fix the Guide Rail Bracket(D) to the wall on both sides with 6*40 screws (L-1) as shown in the picture.The other side of the Guide Rail Bracket (D) is installed in the same way

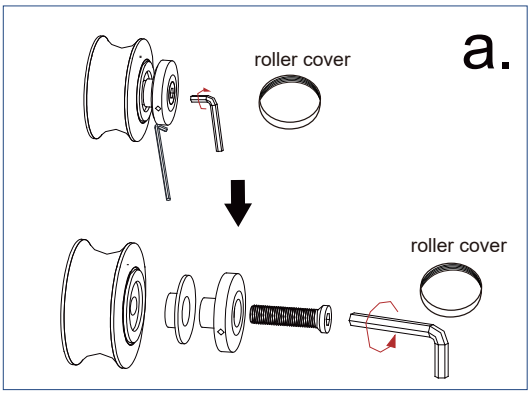

support@trendytotesinc.com 626 679 3588

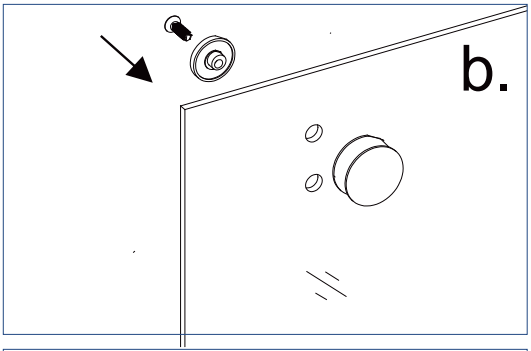

Step 04

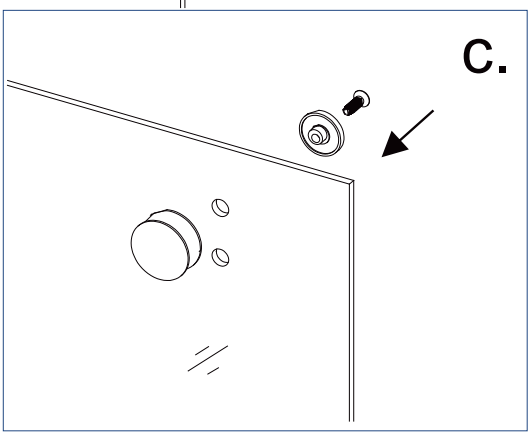

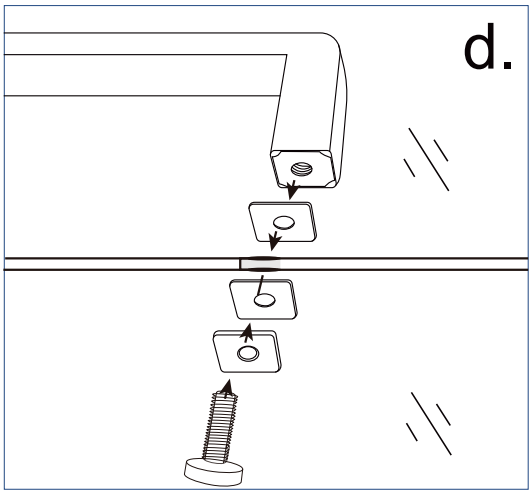

4.Detach the Guide Rail Bracket(D) as shown in the picture to open the connecting rod, then insert the Upper Guide Rail (B) into the Guide Rail Bracket(D).
Put the Guide Rail Bracket Covers to the Guide Rail Brackets (D) and secure it tightly with Allen Key(Q)

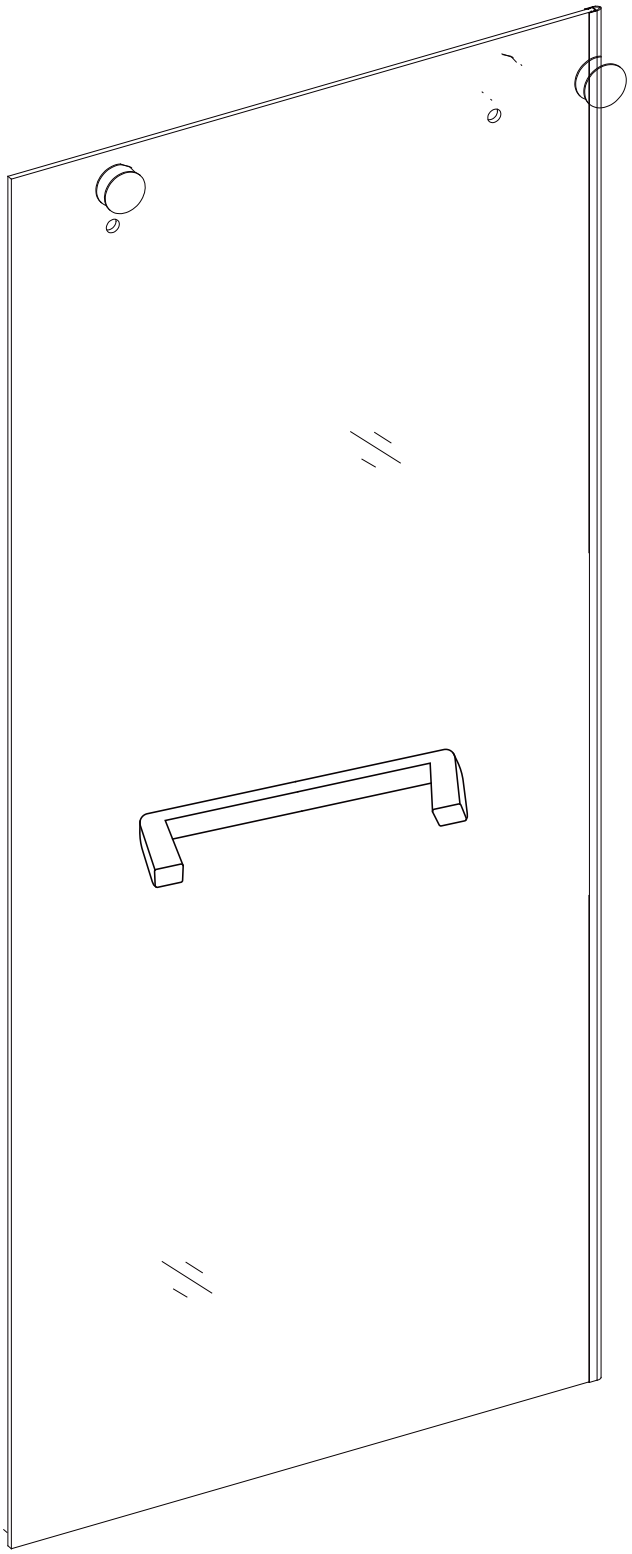

Step 05

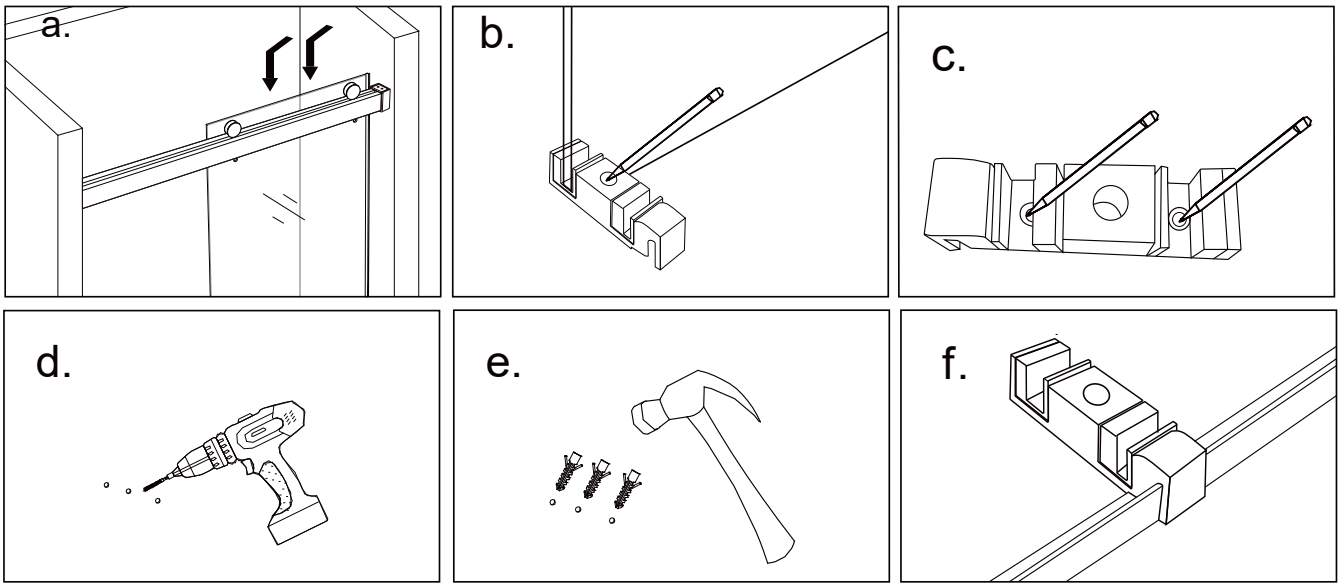

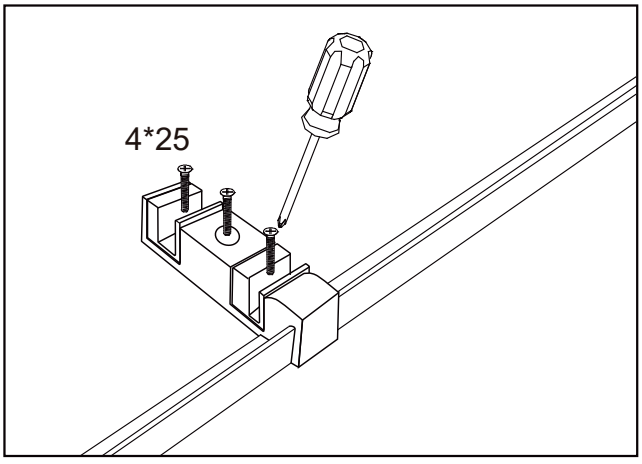

Assemble the Roller (F) and Door Handle(H) on the two piecesof Door Glass(C) as shown

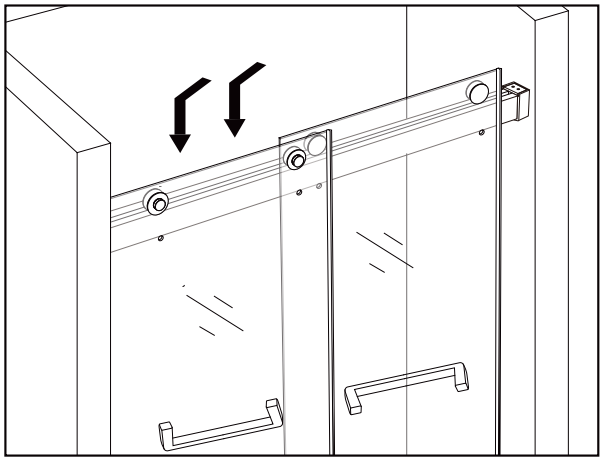

support@trendytotesinc.com 626 679 3588

Step 06-07

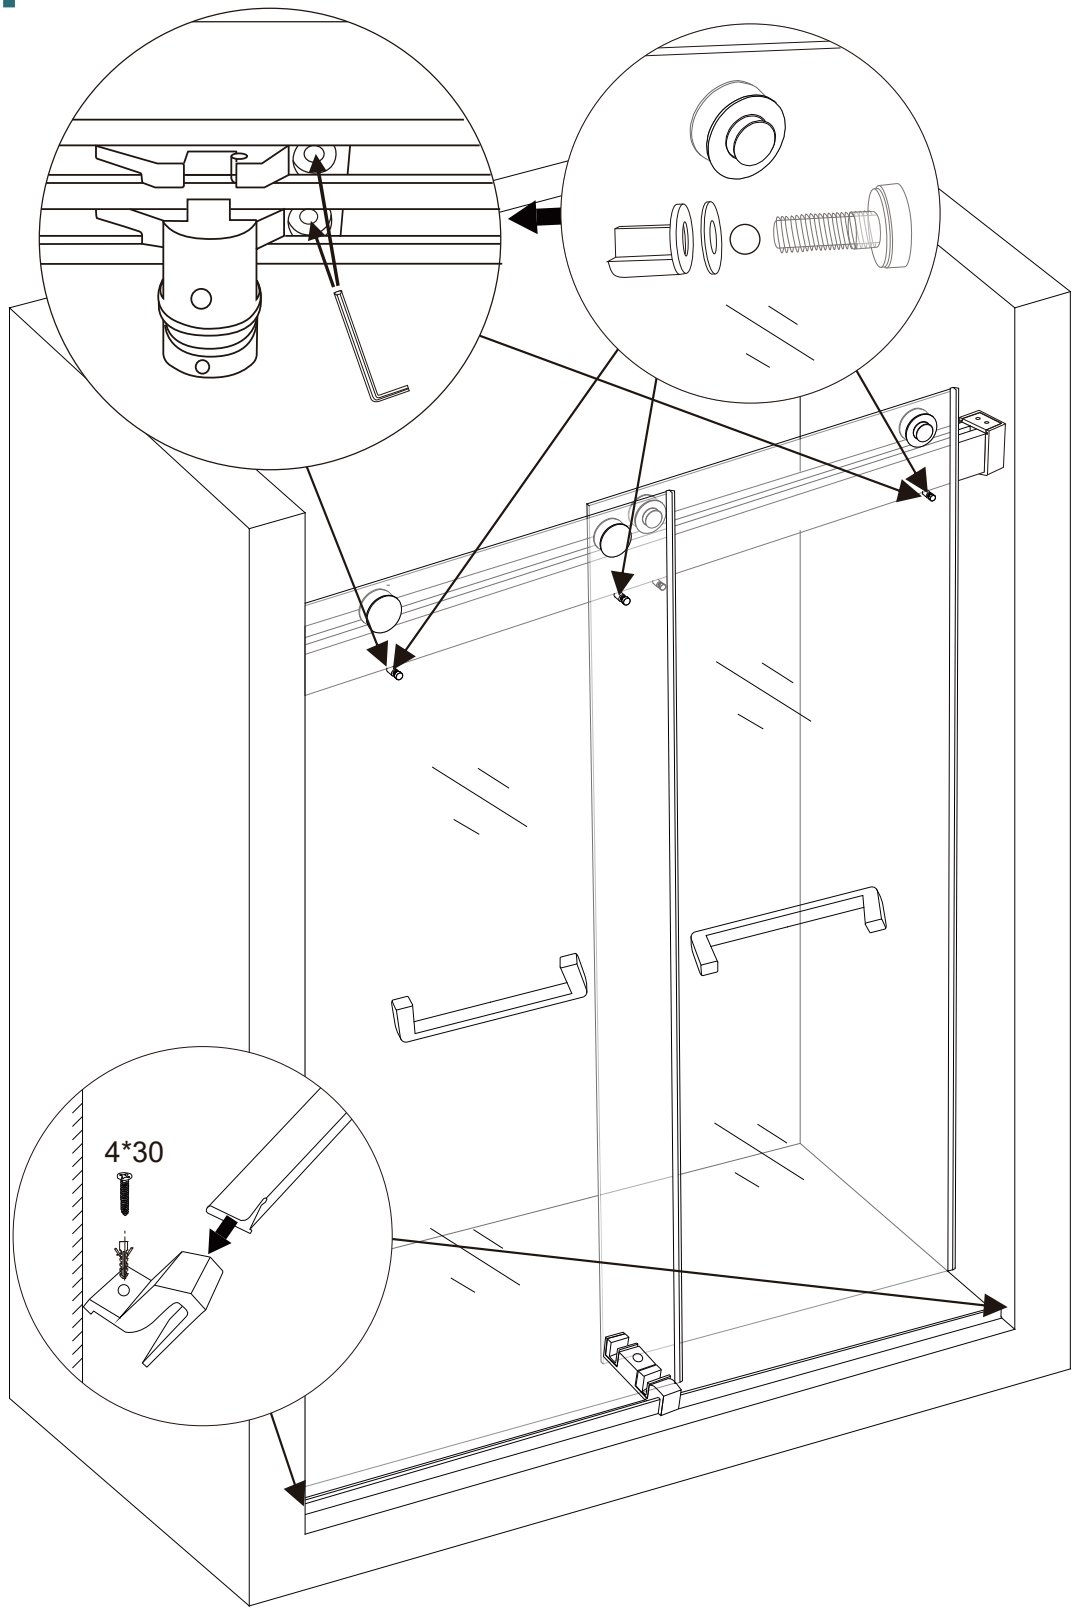

6.Hang the glass door (C)assembly on the upper guide rail (B).Make sure the rollers roll on the tracks of the upper guide rail (B). Then slide the bottom edgeof the glass door into the groove of the bottom guide block(E). Make sure the door glass isvertical and the bottom guides (E) are centered left and right, then mark the hole locations for the bottom guides as shown. Remove the door glass and drill and apply silicone to the hole.then insert the plastic wall anchor (K).Hold the Anti-Splash Threshold (N) against the shower floor, making sure the Threshold islevel. Then place the bottom guide block (E) on the Anti-Splash Threshold (N) and coincideswith the hole position

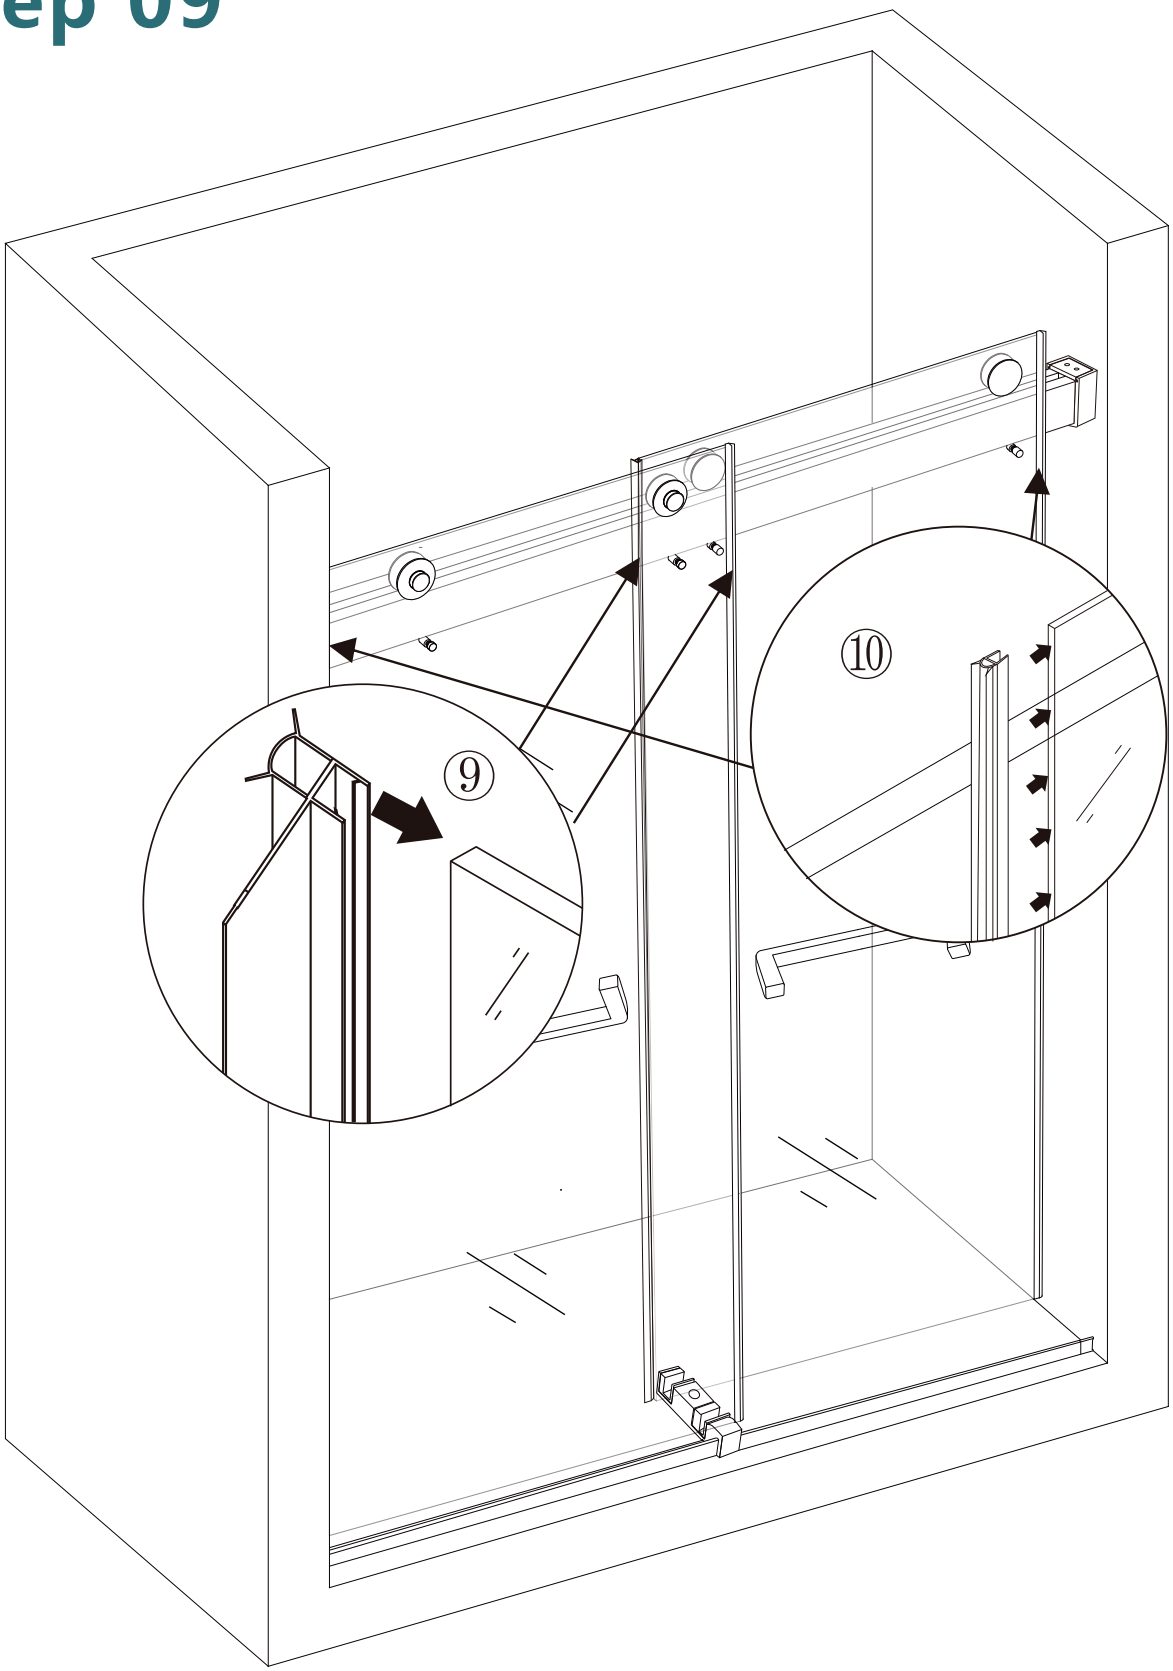

7.Secure the Bottom Guide Block (E) to the floor using the Screw M4x25 (L-2).Hang the two Door Glass(C) Assembly to the Upper Guide Rail (B) and then slide thebottom edge of the glass door into the groove of the Bottom Guide Block (E). Makesure that the roller is rolling against the track of the Upper Guide Rail (B)

Step 08

8.(1)Install the Anti jumping knob (G) to the Door Glass (C). Make sure that the clear gasket will be between the glass and the metal parts of the Anti jumping knob(G).(2)Adjust the position of the Glass Door Buffer (O), then tighten the screws.(3)Then use 4x25 Screw (L-2) to fix the Positioning Block (M) at both ends of the anti-splash Threshold (N)

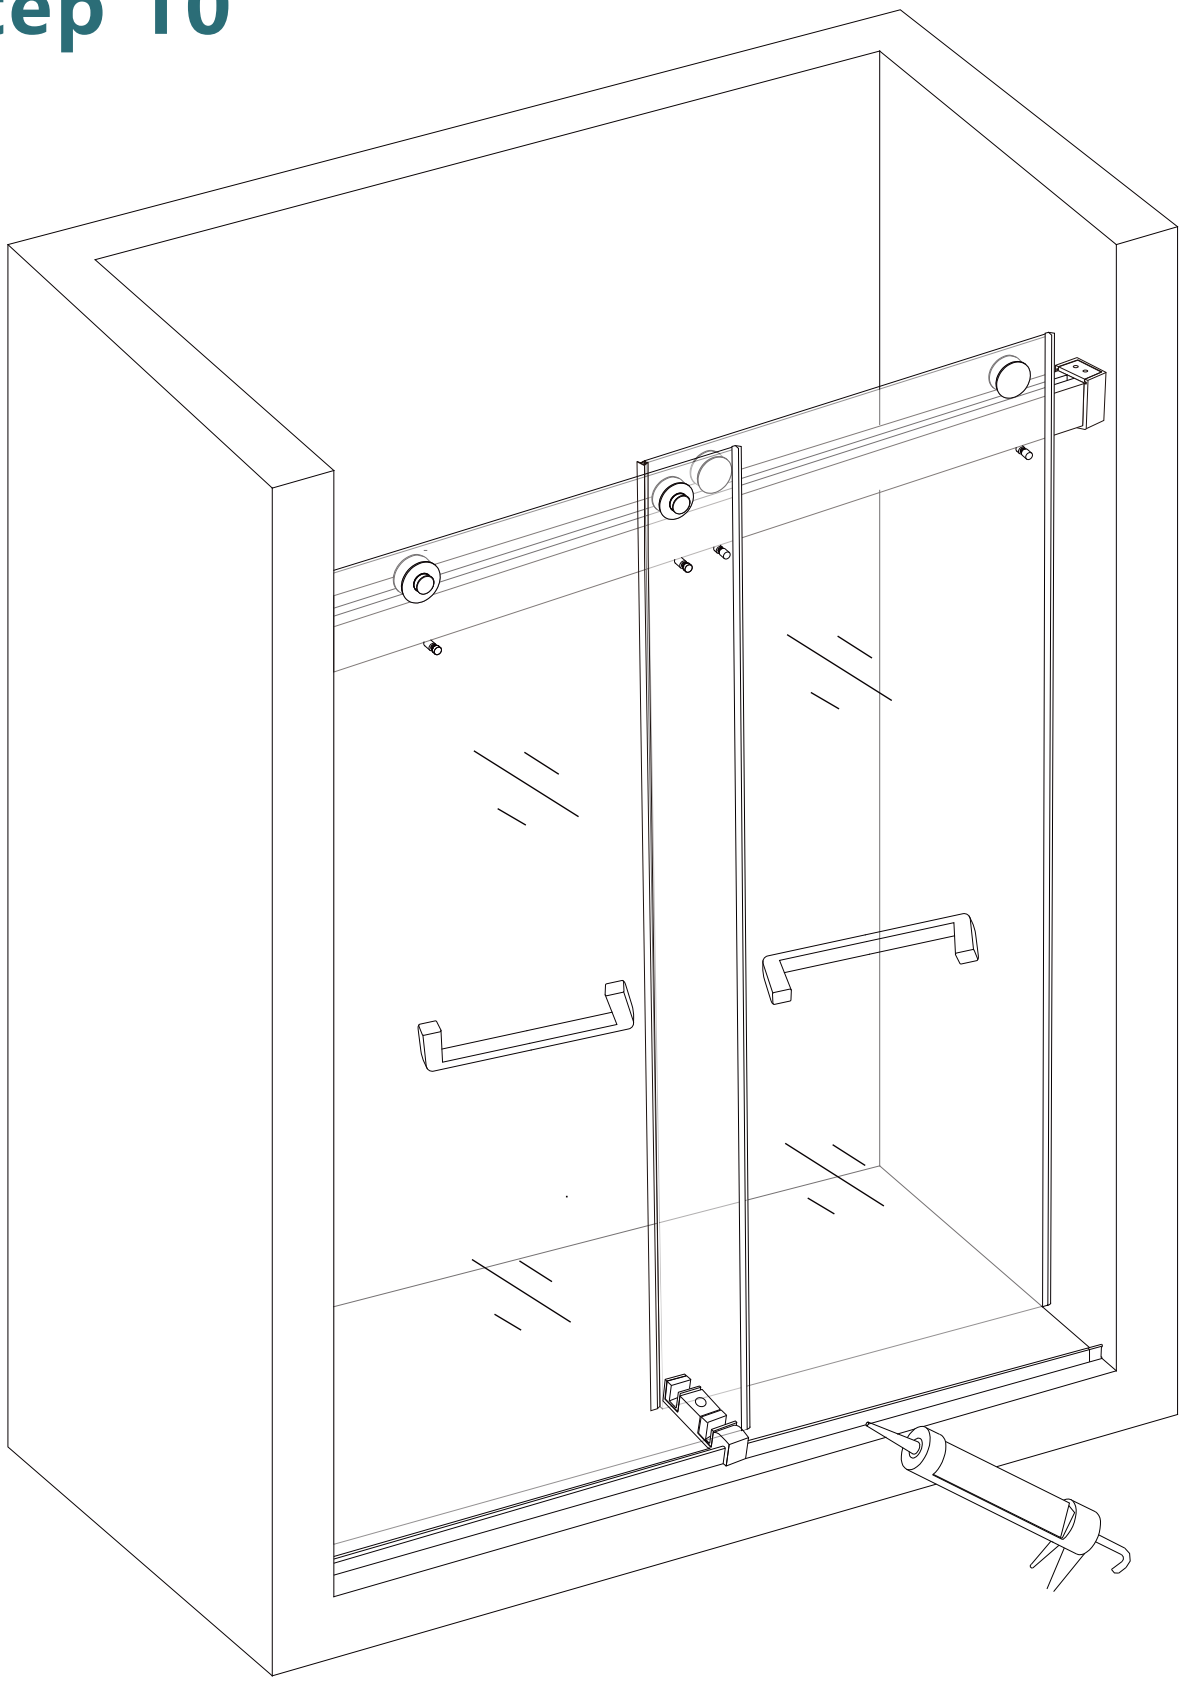

Step 09

9 Slide the Water retaining strip(I) and (J) to the two Door Glass (#3)

support@trendytotesinc.com 626 679 3588

Step 10

10.Apply silicone sealant on the seams between the anti-splashThreshold (N)and the shower floor.MUST ALLOW SILICONE TO DRY FOR 24 HOURS BEFORESTARTING USING THE SHOWER

CARE & MAINTENANCE

The golden rules for care

NOTE: Use warm soapy water and a soft damp cloth to keep the glass clean. Wipe dry with a clean cloth. Glass cleaner can be used if required. Scourers, abrasives and chemical cleaners can damage the glass and pattern, and should not be used.

In hard water areas, insoluble lime salts may be deposited on the glass. If this is allowed to build up it becomes increasingly difficult to remove and looks unsightly. Regular cleaning will minimize this effect.

- ☑ Do not attempt to cut the glass.
- ☑ Do not strike the glass with hard or pointed items.
- ☑ Regularly check moving parts such as rollers and hinges to ensure they are secure and adjusted correctly. Tighten and adjust where required. Also check all sealed joints to ensure seal has not deteriorated. Re-seal if required.
