Meticulously cut from multiple types of glass—stainless, metallic, textured—Meta makes an eye-catching centerpiece in any space. Our Elizabeth Sutton Meta Fiji Purple Glossy Glass Chevron Mosaic Tile reinterprets the classic chevron format, in a boldly colorful, abstract work of art. The carefully composed palette of purple, pink, white, and silver provides depth and dimension, while a polished finish adds a look of luxury.

Palette of compatible colors
Eight sophisticated colorways are cleverly curated.

A chic chevron in no time at all
Mounted to mesh sheets and easy to install.

More than a grand gesture, the introduction of the Meta collection designed by Elizabeth Sutton pays homage to art for art's sake. Known for her vibrant use of color, Sutton's talents are on full display. Meta is a boldly reinvented chevron cut from brilliant stained glass. This energetic collection is available in multiple finishes and eight gorgeous colorways.

Meta is designed by Miami-based Elizabeth Sutton, an artist, fashion designer, and entrepreneur who lives for color. Her patterns are striking and stylized, and her exclusive collection for TileBar is no exception. Meta features glass with different shimmering qualities and textures. Sutton's choice of color is bold in all the right places. This glass is cut at high speeds with exceptional accuracy, forming a chevron pattern with a dimensional, contemporary vibe.

Insider Tip: Many DIYers find glass tile tricky to work with, so we recommend hiring a professional installer.
