Vanity Care & Maintenance Guide

Cabinet Care

- Wipe dust regularly with soft lint-free cloth. Use mild non-abrasive wood cleaner for painted surfaces, dry immediately after cleaning.
- Never use acetone, bleach, ammonia, vinegar or abrasive cleaners, which cause discoloration and paint peeling.
- Keep cabinet away from direct sunlight to avoid fading. Ventilate bathroom fully to reduce humidity and prevent wood warping.
- Clean spills instantly to stop moisture seeping into wood. Keep hot styling tools away from cabinet surface.

Stone Countertop Care

- Blot all spills right away, especially oil & acidic drinks (coffee, juice). Do not leave liquid overnight.
- Clean only with neutral soap water or stone-specific cleaner. Avoid acid, lemon, vinegar, bleach and rough scrubbers.
- Always use coasters/mats under toiletries. Do not place hot hair tools directly on stone. Do not stand or sit on countertop to avoid cracks.

General Tips

- Maintain good bathroom ventilation to lower moisture.
- Wipe all chemical residues from soap, facial cleansers completely after use.
- Contact local stone shop for irreversible stone damage.
