

# Installation Guide – 14” Round Brass Vessel Sink

## Product Specifications:

- Diameter: 14 inches
- Height: 5 inches
- Type: Vessel sink (above-counter installation)

## Installation Requirements:

1. Countertop must have a standard drain hole (typically 1.5” to 1.75”).
2. No mounting ring is required for installation.
3. Apply a continuous bead of clear silicone or construction adhesive at the base of the sink.
4. Carefully position the sink centered over the drain opening.
5. Press gently to secure the sink in place and ensure full contact with the countertop.
6. Allow silicone/adhesive to cure according to manufacturer instructions (typically 24 hours).

## Drain Information:

- A standard drain basket is included with the sink.
- Customers may alternatively use a pop-up drain if preferred.
- Insert drain through sink and countertop, then tighten securely.

## Important Notes:

- This is a handcrafted product; slight variations are normal.
- Do not overtighten drain fittings.
- Professional installation is recommended.
