

Thank you for purchasing the Smart RGBIC DIY Triangle Light Kit. This manual will guide you through the setup and operation of the product. Please read the instructions carefully before using the bulb.

Product Function Diagram.

Installation.

- When unpacking, please ensure that all contents are present and none are damaged.
- Before connecting the pieces, design the shape to your own preference.
- Remove the protective cover from each hexagon. (Only remove the relative protective cover from the direction you want the link). Attach the connection clips as shown below, making sure the clips are aligned with the Triangles. Once the clips are in place, press down gently to ensure the clip is securely in place.
Note: To disassemble a connecting clip, press down on the side of the Triangle with a little force. When two Triangles are connected, turn the over, then disassemble the first Triangle then disassemble the single connecting piece.

- Take the double sided adhesive (provided) and tear off once side of the of the red paper and attach this to the underside a Triangle.Do the same on the other sude of the tape when connecting to next Triangle. Once all the Triangles are connected, attached plug 24v adaptor and check the running mode of the lights through each Triangle.

- Please install the item on a dry, clean and smooth surface.
Not to be attached to brick walls, rough walls, frosted glass, dusty walls, rough plastic or any other uneven walls.
- Do not use the item in a humid or minus temperature environment.
- Do not install the item on a ceiling
