Installation & Environment

1. Please install in a dry, ventilated area. Avoid prolonged exposure to high-humidity environments (even though it is non-electric, moisture can still cause component aging).
2. Install away from sharp objects/heavy impacts to prevent housing damage that may affect the cold-water flushing function.

Usage Notes

1. This product is designed for cold-water flushing. Do not connect it to a hot water source, as this may cause component deformation and damage.
2. Keep sharp objects away from the flushing nozzle. Gently press to reset after use; do not wipe forcefully.

Maintenance & Cleaning

1. Clean with a soft, damp cloth. Do not rinse the device directly with water (even non-electric, internal water accumulation should be avoided).
2. Drain any remaining water inside before long-term non-use to prevent pipe freezing and cracking in low-temperature environments.

Safety & Prohibitions

1. Do not stand on or place heavy objects on the toilet lid to avoid damage to the soft-close mechanism.
2. Do not allow children to operate the flushing function unsupervised, to prevent accidental cold-water splashing.

Please be sure to observe the following

- Do not allow urine to splash onto the nozzle.
- Do not flush the unit directly with water.
- Do not wipe the seat or cover with rough cloth or toilet paper. Use a soft damp cloth instead.

Please do not open the seat ring or cover violently.
- May cause cracking or malfunction.

Please take antifreeze measures by freezing.

Please do not put heaters near this product.
- Discoloration or malfunction will occur.

Daily cleaning and maintenance

Cleaning and maintenance of spray head

If there is dirt in the nozzle, clean it with a small brush such as a toothbrush. (Note: First close the angle valve and rotate the knob to extend the spray rod)

- Do not stretch and bend the spray head.

Cleaning of the Angle Valve Filter Screen

- Check the filter screen of the angle valve filter regularly (recommended once a month).
- Close the angle valve to cut off the water supply, then remove the angle valve filter screen and clean it thoroughly with clean water.
