# Trouble Shooting

## Fan does not work :

1. Check fuses or circuit breakers if disconnecting the power supply to the fan.
2. Turn off electrical power and check all wire connections to fan and in switch housing. It must be carried out by an electrician.
3. Please press and hold the "  " buttons at the same time within 5 seconds after the product is powered on, until light flicks to succeed. If it does not work, please try again.

## Fan is noisy :

If there is resonance noise, please tighten the screws at the connection between the hanging plate and the lamp body.

## Fan turns but the airflow is inadequate :

1. The fan may be running in reverse, so air is going upward.
2. The room may contain items that obstruct the air flow.
3. The fan may be too small for size of the room.
