

Stella Floor Lamp Assembly Instructions

1. Remove all parts before assembling and place on a flat surface.
2. Put pole D into base C, tighten screw B into place by using provided allen wrench A.
3. Line pole F up with pole D and use allen key A to secure screw E into place to connect the poles. Repeat these steps to connect pole G to pole F. As you connect the poles, gently pull the excess wire out from the bottom of pole D, making sure it doesn't get caught between the poles.
4. Place harp H onto place on the socket, and secure the assembled shade I into place using finial J. Finial may need to be removed from harp first. See separate sheet for shade assembly instructions.

Max Wattage: 150 watt incandescent or 42 watt CFL equivalent. A 9.5 watt LED bulb is included. (Incandescent/CFL not included). The bulb is not dimmable, but may be replaced with a smart bulb if desired, taking care not to exceed the maximum wattage.

Extend Your Warranty From 3 Years To 5 Years

To extend your warranty by 2 extra years for a total of 5 years' warranty, register your purchase by filling in the brief form at <https://brightech.com/pages/extended-warranty>.

IMPORTANT SAFETY INSTRUCTIONS:

This portable lamp has a polarized plug (one blade is wider than the other) as a feature to reduce the risk of electric shock. This plug will fit in a polarized outlet only one way. If it does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Never use with an extension cord unless the plug can be fully inserted.

DO NOT ALTER THE PLUG

Please contact us via our website if you need any help with your new lamp.
