

MEASURING GUIDE FOR AWNTECH® HAMPTON MODEL

MODEL	HEIGHT (in)	DEPTH (in)	WIDTH
HAMPTON	9.5"	8 1/8	Varies

The Hampton has an aluminum cassette/encasement that cover the top, sides, and front when the awning is fully retracted in.

When determining which model and size to mount to your structure, consider the following:

- Height between top of the door frame and/or window to the roof line
- Width between door and/or windows and /or light fixtures
- Width of door and/or windows
- Depth of eave/patio
- Side closet to power outlet (determined by your perspective facing structure)
- Can withstand winds up to 30 mph
- Awning is structural Steel & Aluminum
- 12'ft electrical cord
