

Usage Notes

Note: During the charging of the solar panel, please make sure to turn off the LED light switch to avoid charging and discharging at the same time, which will affect the charging efficiency and battery life.

- The solar panel will automatically charge when there is enough sunlight and store it in the built-in battery for use at night or on cloudy days.
- the surface of the solar panel regularly and keep it free of dust, leaves and other obstructions.
- Check whether the connecting wires and switches are intact, and replace them promptly if damaged.
- When not in use for a long time, it is recommended to store the battery in a cool and dry place after it is fully charged.

USER MANUAL

LED PATIO UMBRELLA

Installation Guide

Choose a sunny and firm ground for installation to ensure that the center column will stand vertically and securely.

Insert the pole A (Upper Pole) with the umbrella into pole B (Lower Pole), until the button C is buckled in. Finished.

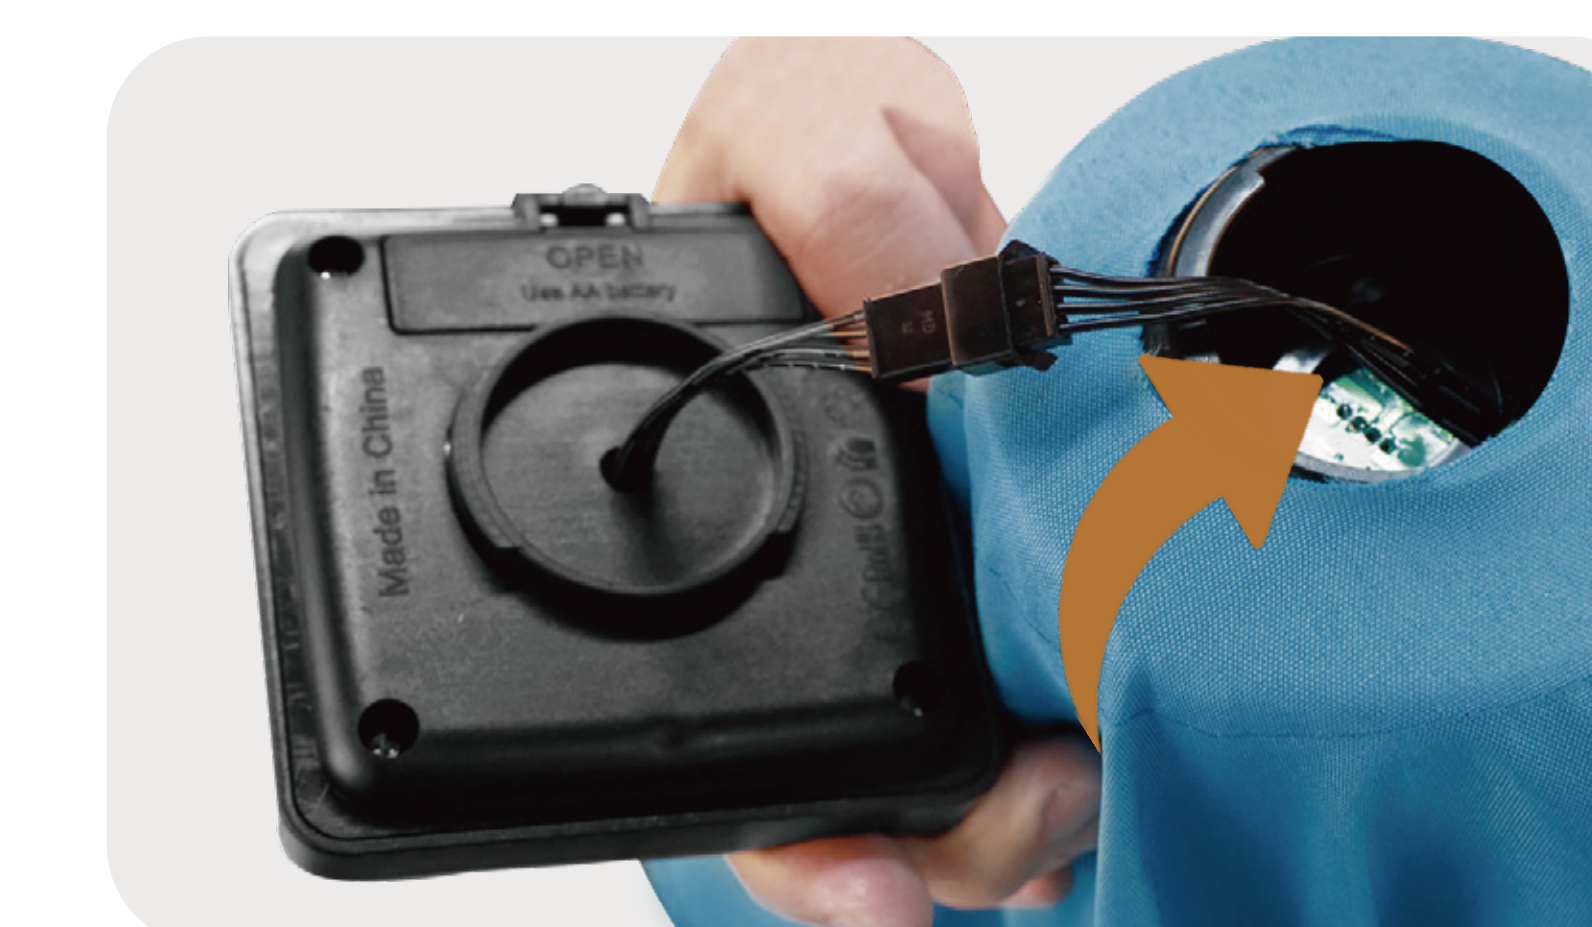

Installing Solar Panels

Connect the solar panel with the interface at the top of the umbrella

2

Plug in the power supply

Screw the solar panel to the umbrella firmly mounted

Once the installation is complete, run a functional test first to make sure everything is working.
