

Multi functional storage rack

Bamboo and Wood/Original Life/Small Furniture

Accessories List (Taking 5 layers as an example, different layers have different accessories)

Explanation of side bracket hole positions

- Red circle fixed middle layer board A for use
- Fixed middle layer board B with brown circle
- Blue circle is used to fix the top layer board
- Green circle fixed door for left and right
- Used for fixing short gear strips with purple circles

Installation steps

1. Remove the left foot and the long gear strip and install them with pointed screws

2. Remove the bottom layer board and install it with pointed screws (Pay attention to aligning the bracket groove with the layer board groove)

3. Remove the right foot and install it with a pointed screw

4. Remove the left side bracket and install the middle layer board A with pointed screws (Pay attention to aligning the bracket groove with the layer board groove)

5. Remove the side bracket and install it on the right with pointed screws (Pay attention to aligning the bracket groove with the layer board groove)

6. Then fix the side bracket to the left and right feet with flat head screws

7. Raise the shelf

8. Remove the middle layer board B and install it with pointed screws

9. Continue to remove the middle layer board B and install it with pointed screws

10. Remove the backboard and insert it along the groove

11. Remove the top layer board and install it with pointed screws facing downwards on the reverse side

12. Remove the short gear strip and fix it with pointed screws
