What to do when you receive Shipment of your Custom Island

READ FIRST!

TOOLS NEEDED: Hammer, Drill, Phillips head screwdriver, Wood shims and Furniture Dolly; or hire a licensed contractor to install.

1. Unwrap crate with drill and hammer.
2. Take A&L BBQ/Accessories out of Island. (This will lighten the weight-Phillips screws hold them in place.)
3. Save plywood if needed. (This will help as a solid surface to use dolly and roll into backyard.)
4. For safe loading, it is recommended that you use 6 people to pick up one side and use furniture dolly—do the same for the other side.
5. Strap the BBQ Island onto the dolly.
6. Follow step three.
7. Put in desired location, use shims to set level.
8. "Caution" check ALL connections for leaks BEFORE lighting. (Or hire a licensed plumber to review connections.)

ENJOY YOUR NEW OUTDOOR KITCHEN!!!!!!
