ASSEMBLY INSTRUCTIONS

WARNING

- If you need to use this greenhouse in severe weather conditions, please move valuable items indoors to avoid unnecessary financial loss.
- You must install the PC board greenhouse on a deck or level surface. If placing it on the ground, we recommend securing it with wooden strips under the frame and placing it in a pre-dug trench, then using ground stakes to further enhance stability.
- You must apply silicone sealant at the joints between the PC boards and the frame. Ensure that the clips are fastened in the correct direction onto the PC boards to prevent the boards from coming loose easily.
- Expansion screws and ground stakes are required to increase the overall stability of the product.

Notes:

Please read this instruction carefully and keep it for later reference. Each assembly step will be detailed explained below. Refer to the enlarged illustration to determine the precise arrangement of the components.

Attention:

A foundation is not included in the delivery.
Adequate fastening must be ensured by the customer!
A suitable foundation is available as an optional accessory.
Instructions for self-construction can also be found on page 7.

Please wear gloves during assembly.
The corners and edges of the components may be sharp and hard.
Proceed with caution to avoid injuries.
Take your time for the assembly and plan sufficient breaks.
The assembly will take some time and requires a methodical approach.
Store the greenhouse in a dry and frost-free place when not in use.
The twin-wall polycarbonate panels should not be pressed or bent.
Keep all components away from sources of fire and sparks!

Before assembly:

Find a solid and level surface as the base before starting the assembly.
Read the assembly instructions carefully before assembly and follow each step precisely.
Check all supplied parts for completeness and integrity.
Gather all greenhouse parts and the required tools (not included in the delivery) before assembly.
Only set up the greenhouse in dry weather.
Never assemble in strong winds or poor weather conditions!
The assembly requires multiple persons.

Final assembly,

Plate Placement Place the multiwall polycarbonate sheets as listed in step M and secure them using the clips (Part #40).

1. Place the two ends of the clip into the groove of the frame.
2. Position the middle section of the clip against the hollow chamber panel.

Two edges of the clip are under the edge of the hollow chamber panel, and the middle edge holds the panel in place.

Important: The sheets are coated with a UV-protective layer on one side. The side with the white film must be placed inwardly to ensure UV protection! Peel off the white film! The transparent film can be left as a protective film or optionally removed (e.g., in case of dirt).

Safety Precaution:

Please be sure to install the wind clips and fastening clips by strictly following the instructions. The manufacturer will not be liable for any damage or loss resulting from improper installation that causes reduced wind resistance or the PC panels to fall off.
