

# Brightech® MAXWELL FLOOR LAMP

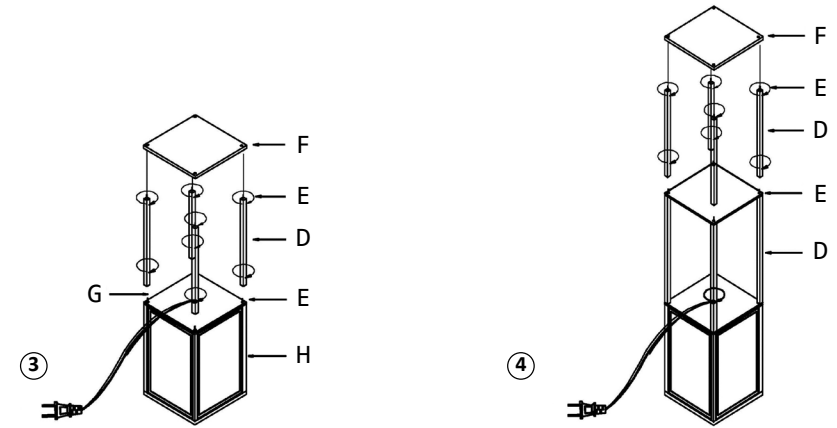

Place frame (I) on a flat surface. Insert four (B) screws into the frame and into the short poles (H) and screw until tight. Then slide the shades (K) into the short poles.

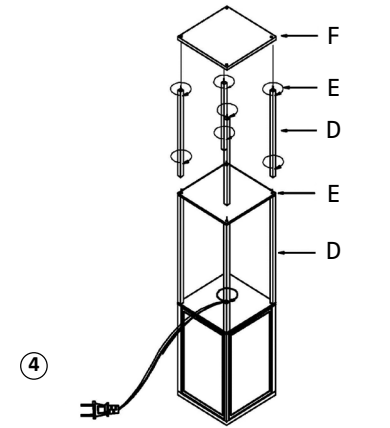

Pull the socket and cord through socket board G's hole and turn to tighten. Then, insert the stud bolts (E) into the board and into the short poles (H) and screw tight.

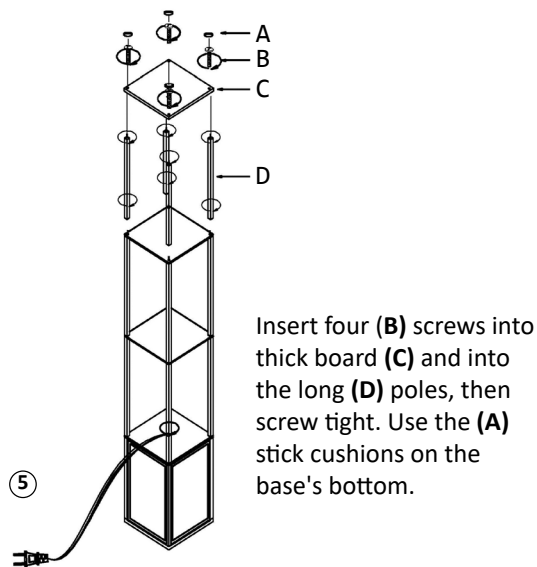

**Note:** The direction of the socket opening must be downward when you screw the socket board and short poles together.

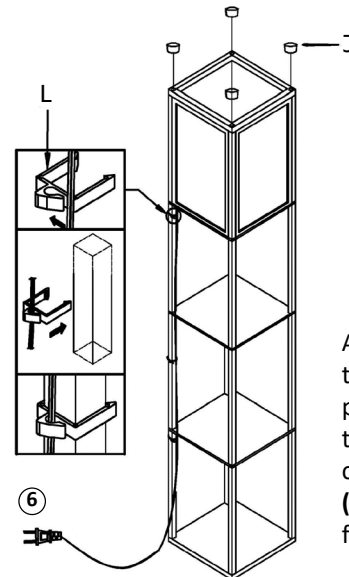

Screw four long (D) poles and (F) shelves together with the (E) screws until tight. Repeat this step to build another level.

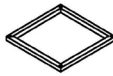

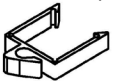

Screw four long (D) poles and (F) shelves together with the (E) screws until tight. Repeat this step to build another level.

Insert four (B) screws into thick board (C) and into the long (D) poles, then screw tight. Use the (A) stick cushions on the base's bottom.

Attach the wire clamps to one of the poles, one per level, then insert the wire into the clamp's hook. Add the (J) caps onto the top frame's screws.
