

Simple installation Easy Operation

Step 1: Remove all the accessories

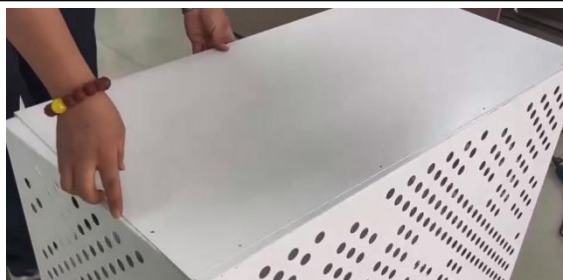

Step 2: Use gaps left in the panels. Interlace two sides and a front with each other. Assemble them together.

Step 3: There are four pre-drilled mounting holes on the inside. Then we use self-drilling screws to hold it in place.

Step 4: In order to stabilize the installation, the triangular connecting piece needs to be installed at the left and right corners at the bottom. Attach two triangular aluminum plates to each of the two corners

Step 5: Cover the top panel on the top of the shelf

Step 6: There are reserved holes in the top plate, install the top panel with electric drill according to the reserved holes in the top plate.
