

CHARACTERISTICS OF SPC

 LOCKING SYSTEM	<p>SIERRA incorporates the Angle –Angle with 2 optional installations with patented Unilin technology that allow for an effortless floating installation and durable locking system.</p>
 WATERPROOF BY DESIGN	<p>SPC is incredibly resistant to water and moisture. It will not swell, peel, or ripple.</p>
 HIGH STABILITY INSTALL NEARLY EVERYWHERE	<p>SIERRA offers SPC floor with outstanding thermal stability properties in structure and size, improving the reliability of structure performance during use.</p>
 PURKLEEN™ UV FINISH	<p>UV vanish is a protective layer made of polyurethane that protects the floor surface from scratches, abrasions and stains. Combined with wear layer to protect the floor in the best way.</p>
 WEAR LAYER	<p>Protective wear layer is made from 100% virgin vinyl that is durable, and resilient to resist indentation for SPC floor. In addition, wear layer is intended to resist surface abrasion during use.</p>
 INTEGRATED ACOUSTICS	<p>SPC comes with a preinstalled acoustic padding (optional), increasing the soundproof properties of the floor and offering higher acoustic insulation.</p>
 WHERE TO INSTALL	<p>Can be installed in any room, including fully enclosed spaces that do have permanent or temporary heating and cooling systems.</p>
 FIRE RESISTANCE	<p>SIERRA offers strong fire resistance SPC floor. It is made of limited igniting materials, as well as the ability to create little or no smoke when firing under European standard.</p>
