

## Gnome Plush Toy Battery Safety Guide

*Keep your magical gnome friends shining safely with these simple instructions!*

### 1. Power Supply Safety

#### Single Power Source Only

- These decorative gnomes are designed for **low-power use only**.
- **Never connect** to more than the recommended power supply (e.g., 1 battery pack or 2 AAA batteries).

### 2. Battery Guidelines

#### Use the Right Batteries

- **Do not mix** different battery types (e.g., alkaline + lithium) or old/new batteries.
- Always use the **same brand and charge level** for all batteries.

#### Correct Installation

- Insert batteries according to the **+/- polarity markings** inside the compartment.
- Incorrect placement may damage the toy.

#### Dispose Responsibly

- Remove **dead batteries** promptly to prevent leakage.
- Recycle batteries at approved facilities—do not toss in household trash.

### 3. Terminal Safety

#### Avoid Short-Circuiting

- Never let metal objects (coins, keys) touch both battery terminals at once.
- Store unused batteries separately in original packaging.

### 4. Additional Tips

🌟 These gnomes are **decorative**—avoid exposing to water or extreme heat.

🌟 For cleaning, gently wipe with a dry cloth.

*Enjoy the whimsy of your gnome pals safely!*
