Ottoman Assembly

Spet 1:Fix leg; Spet 2: Fix the cover plate then put on the seat cushion;

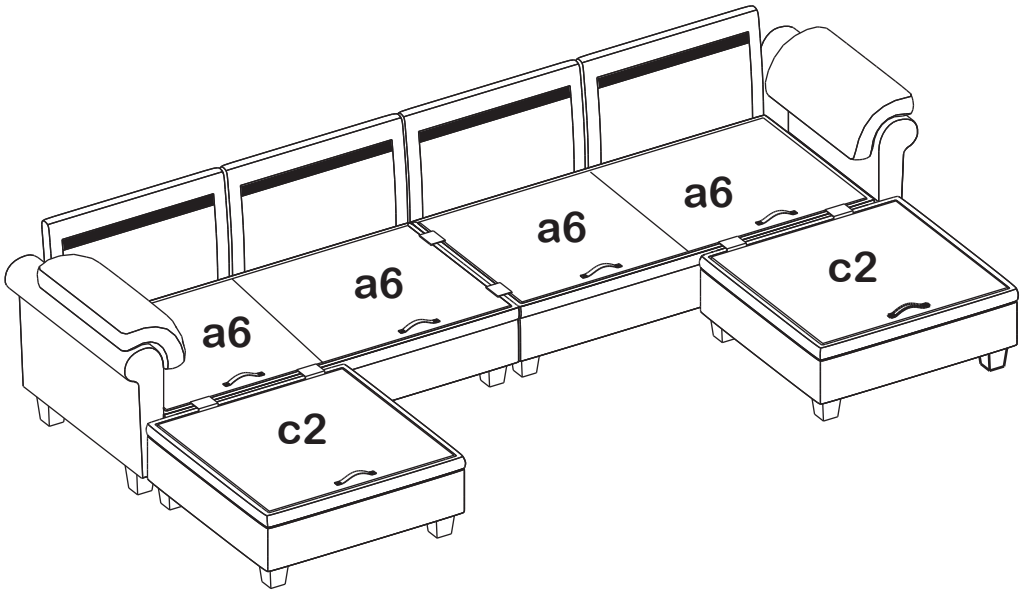

1 Fix the assembled sofa together with K and then place the seat cushion and backrest on top

2

3

1. **The cushion will recover 80% within 30 minutes of being unrolled and 95% within 72 hours.**
2. **If you want it to recover faster, you can pat it by hand.**
3. **The surface fabric of the cushion may develop some wrinkles due to compression, but this does not affect its use. These wrinkles will disappear over time. To quickly deal with these creases, you can steam the surface of the cloth with a steam iron, but do not set the temperature too high.**
