

# Ovente Electric Kettle, 1.7L, Auto Shut-Off, 1500W, Matte Stainless Steel, Removable Anti-Scale Filter, Centered Water Gauge, Silver (KS777S)

## Key Features

**BOIL WATER IN MINUTES** – Get your hot cup of tea before you step out of the house with the Ovente Electric Kettle KS777 Series. This one runs on 1500W (120v), and it can boil a liter of water in less than 5 minutes. The kettle accommodates 1.7L of water. Simply fill the jug with water, switch the kettle on, and wait for your water to be ready.

**QUALITY YOU CAN DEPEND ON** – This has a fast-heating cordless boiler and its base, lid, and interior parts are made of 304-grade stainless steel. The handle stays comfortable to touch to prevent burns. With its matte finish, it won't gather too much dust.

**AUTO SHUT-OFF AND BOIL-DRY PROTECTION** – You don't need to worry even if you accidentally left the water boiler on and plugged in. The kettle has an automatic shut-off and boil-dry protection feature: It turns off on its own once the water reaches its boiling point or when there's no water inside the kettle.

**BRING BEAUTY TO ANY COUNTERTOP** – Nothing deserves your precious countertop space than an appliance with an award-winning design and superb functionality, and this tea kettle has it all: It can be lifted from the 360° swivel base for convenient serving; the anti-scale filter can be removed for a thorough cleaning; and the water level gauge is placed just behind the handle, making it easy to use for both left- and right-handed people.

**LIMITED 2-YEAR WARRANTY** – All Ovente kettles have a two- (2) year warranty period from the date of purchase from an authorized retailer. This warranty only covers defects in workmanship and materials. Please note that you have to provide proof of purchase to request for repair or replacement.
