

## **Hanging Instructions**

**Suggested Anchor and Screws size:** #8 x 1-1/4" screws and #8 anchors, hangs up to 75 lbs. (Anchor and screws are NOT included)

1. Measure from the top of the frame/art to the top of the keyhole. Then measure the distance between the two mounting points. When transferring these measurements to the wall, pay special attention to the leveling of the two mounting points.
2. Confirm the position – Lightly make a mark on pencil where the anchors should be located.
3. On the mark, drill a hole smaller than the anchor.
4. Tap anchor in with a hammer or mallet.
5. Insert the screw & slowly screw it in with screwdriver. Just remember to leave a quarter inch sticking out.
6. Erase/wipe off the pencil marks. Then you can mount the frame/art to the wall by placing the keyhole inside the 2 screwhead.
