PRODUCT SPECIFICATION

Product Dimensions

Product Model	Product Dimension	Slide Type	Dimension Drawing
5EF0005113	10.5"W×16"H ×20.98"D	Slide Without Soft Close	Note: The height is adjustable (Please refer to step1-2 for details)
E617005114	13.5"W×16"H ×20.98"D	Slide Without Soft Close	
7195005115	16.5"W×16"H ×20.98"D	Slide Without Soft Close	
D4C5005116	19.5"W×16"H ×20.98"D	Slide Without Soft Close	
52BF005117	22.5"W×16"H ×20.98"D	Slide Without Soft Close	
7024005118	10.5"W×16"H ×20.98"D	Slide With Soft Close	
33AA005119	13.5"W×16"H ×20.98"D	Slide With Soft Close	
D3EB00511A	16.5"W×16"H ×20.98"D	Slide With Soft Close	
66BD00511B	19.5"W×16"H ×20.98"D	Slide With Soft Close	
DEEE00511C	22.5"W×16"H ×20.98"D	Slide With Soft Close	

This pull-out 2 tier storage organizer is designed for 15"W ~ 27"W base cabinets.

Package Contents

- 2 × Storage Organizers
- 1 × Lower Slides
- 1 × Upper Slides With Rear Mounting Brackets
- 2 × U-Shaped Support Brackets
- 1 × Hardware Set For Slides & Brackets Installation
- 1 × Mounting Template
- 1 × Installation Manual
- 1 × After-Sales Service Card

Care & Maintenance

- For daily cleaning, use a dry cloth and a soft liquid cleaner.
- Never use abrasive cleaners containing acetone, chlorine or strong bleach. Also, do not use tools as scrapers, metallic brushes, and other products which can scratch or tarnish surfaces.

PRIOR TO INSTALLATION

- Carefully remove all the items from the carton and place them individually on a soft cloth to prevent scratches or other damage.
- Check the included items. If any items are missing or have been damaged during shipment, please contact our service team to obtain any missing or damaged item.
- Carefully and strictly follow these installation instructions to ensure a completed product as designed.
- Do not tighten all the screws until the product is properly installed.
- Have the necessary tools ready.

TOOLS REQUIRED

Hand Drill

Phillips Screwdriver

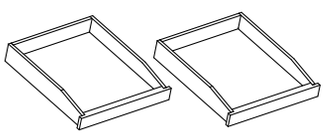

Tape Measure

Pencil

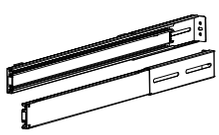

Tape

PART LIST

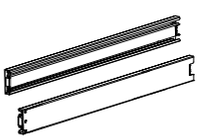

(A) Storage Organizer
2 pcs.

(B) Upper Slide With Rear Mounting Bracket
1 pair

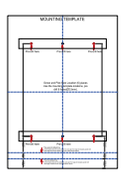

(C) Lower Slide
1 pair

(D) U-Shaped Support Bracket
2 pcs.

(E) Mounting Template
1 pc.

HARDWARE LIST

M3.5×12 Wood Screw
12 pcs. (+2 extra)

M4×6 Machine Screw
16 pcs. (+2 extra)

M4×18 Wood Screw
10pcs. (+2 extra)

INSTALLATION INSTRUCTIONS

STEP 1 Assemble The Frame Structure

STEP 1-1

Remove the four inner rails from the two pairs of Slides (B), (C). (See Figure 1, 2)

3 Section Full Extension Ball Bearing Slides

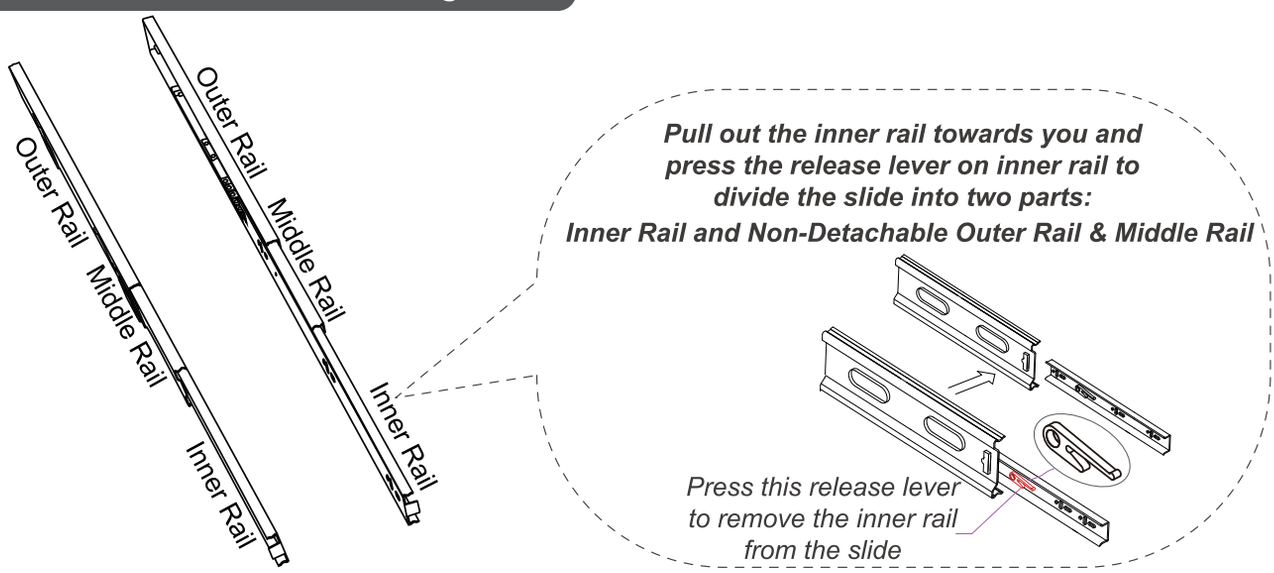

Figure 1

※ The outer rail and middle rail are connected together and can not be separated.

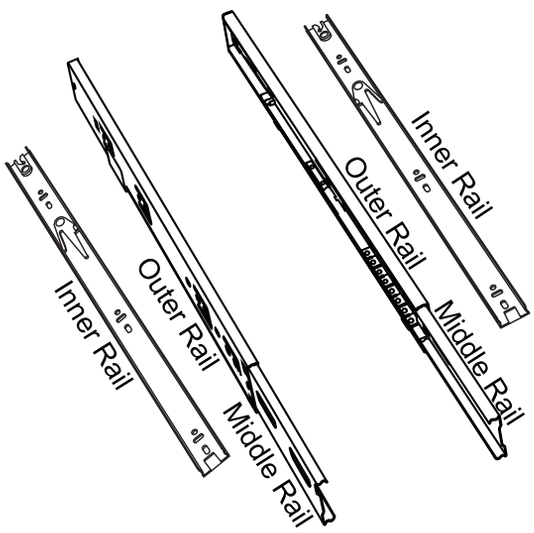

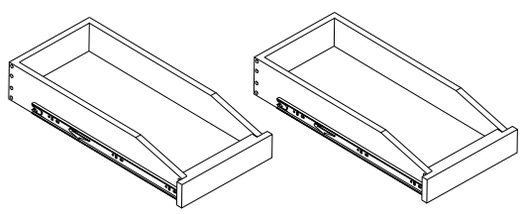

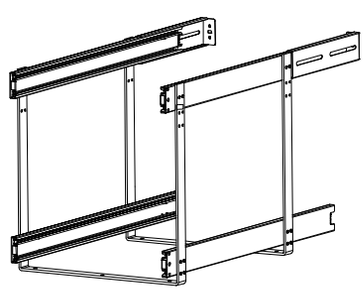

Figure 2

Note: *The four inner rails are installed on the side panels of the two Storage Organizers (A) .*

Note: *The four outer rails are installed on the two U-Shaped Support Brackets (D).*

STEP 1-2

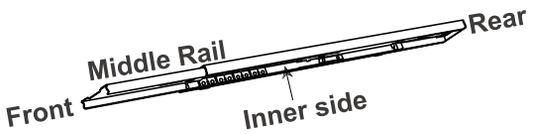

Remove the rear mounting brackets from Slides (B) before installation and install the four slides on the U-Shaped Support Brackets (D). (See Figure 3)

Note: Slides (B) are installed on the upper layer of the U-brackets.
Slides (C) are installed on the lower layer of the U-brackets.

The following points should be noted during slides installation:

① The installation direction of the front and rear of the four slides should be consistent.

② Inner side of the four slides should face inward.
* Pull out the middle rail towards you and take note of which direction the inner side of the slide faces.
If it faces left, install this slide on the right side.
If it faces right, install this slide on the left side.

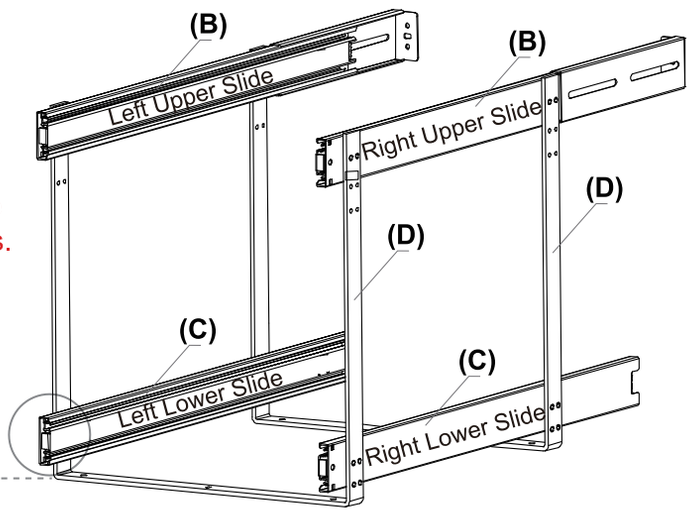

Figure 3

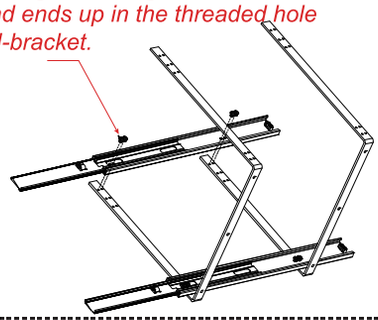

Detailed steps are as follows:

STEP 1-2-1

Install the left upper and lower slides onto the U-brackets.

Pull out the middle rail and you can see the mounting holes in the outer rails. Align holes in outer rails with threaded holes in U-brackets, then secure them with 8PCS M4×6 Machine Screws.

Pay attention to the direction of mounting screws:
The screw goes through the hole in the slide and ends up in the threaded hole in the U-bracket.

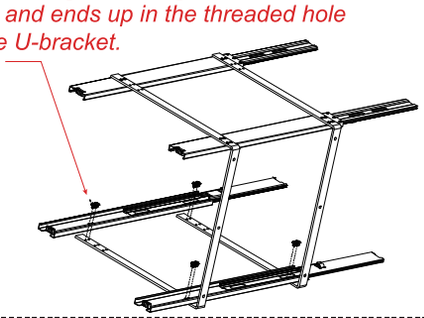

STEP 1-2-2

Install the right upper and lower slides onto the U-brackets.

Pull out the middle rail and you can see the mounting holes in the outer rails. Align holes in outer rails with threaded holes in U-brackets, then secure them with 8PCS M4×6 Machine Screws.

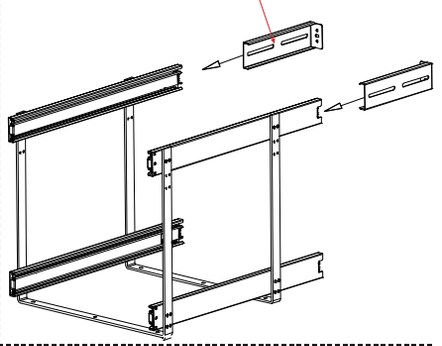

Pay attention to the direction of mounting screws:
The screw goes through the hole in the slide and ends up in the threaded hole in the U-bracket.

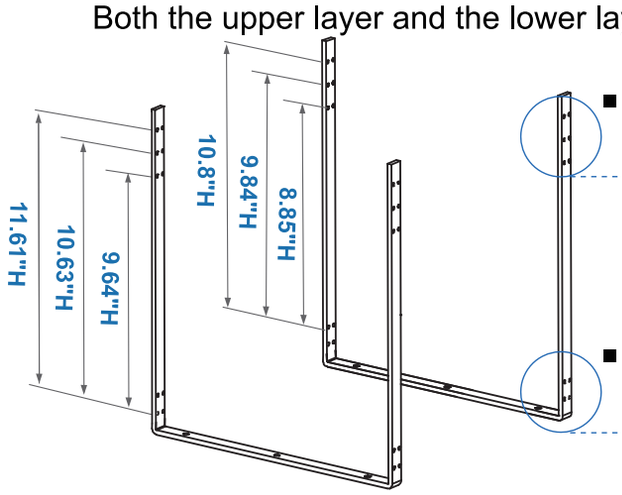

STEP 1-2-3

Slip the rear mounting brackets on to the back of the two upper slides.

The rear mounting brackets are used to connect the upper slides with the cabinet's rear.

Note: This 2-tier organizer has 5 different height options to fit different cabinets.
Both the upper layer and the lower layer are adjustable.

■ **3 height options available for the upper layer**
Choose any one of the three options to get a flexible use of vertical space.

■ **2 height options available for the lower layer**
When it is used for face frame cabinets, we recommend choosing the upper option to avoid collision.

STEP 2 Install Frame Into Cabinet With Mounting Template (E)

STEP 2-1

Mark centerline in cabinet. (See Figure 4)

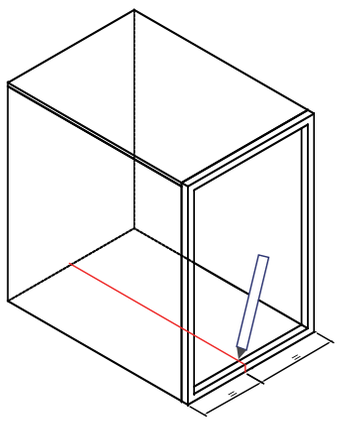

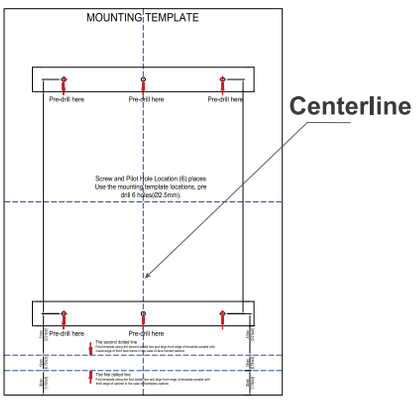

Figure 4

Mounting Template (E)

STEP 2-2

Use Mounting Template (E) to pre-drill holes by following these steps below:

(1) Lay template inside cabinet.

(2) Fold template along the dotted line and align front edge of template parallel with front edge of cabinet or inside edge of front face frame in the case of face framed cabinet. (See Figure 5, 6)

(3) Align the template centerline with the centerline marked in the cabinet.

(4) Taping template to the cabinet to keep template in place.

(5) Pre-drill six holes (Φ2.5mm) using the mounting template locations.

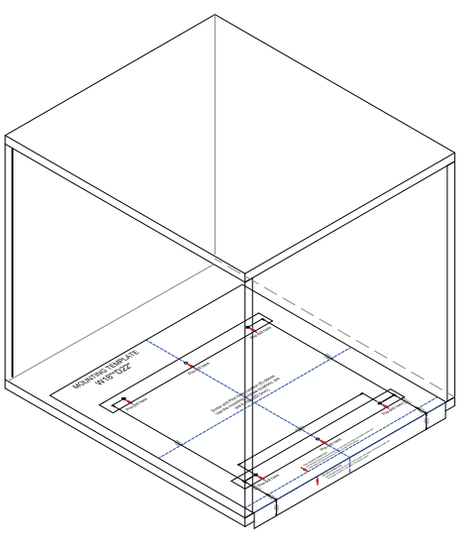

Figure 5

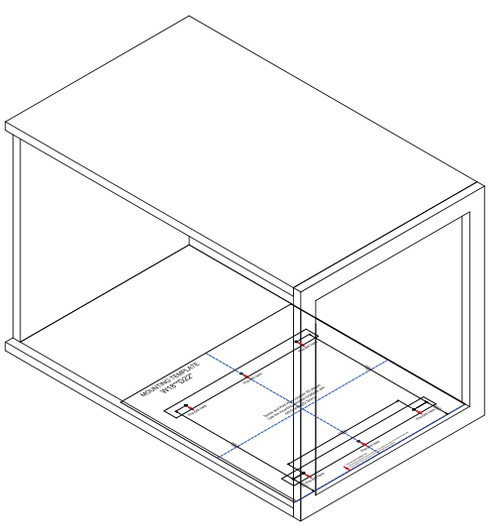

Figure 6

◆ **Frameless Cabinet:**

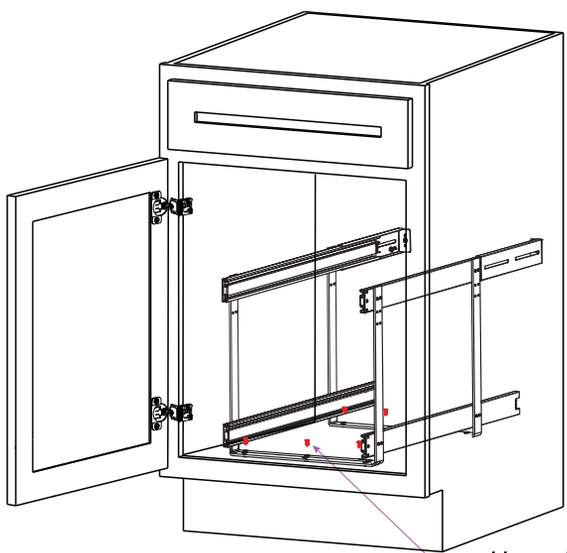

Fold template along the first dotted line and align front edge of template with front edge of cabinet.

◆ **Face Frame Cabinet:**

Fold template along the second dotted line and align front edge of template with inside edge of front face frame.

STEP 2-3

Remove the template and align the six holes in the U-Shaped Support Brackets (D) with the six pre-drilled holes in the cabinet, then secure them with 6PCS M4×18 Wood Screws. (See Figure 7)

Use a Phillips screwdriver or an electric hand drill with a Phillips drill bit to tighten the screws.

Figure 7

STEP 2-4

Attach the rear mounting brackets to the back panel of the cabinet using 4PCS M4×18 Wood Screws. (See Figure 8)

Note: The rear mounting brackets are adjustable and can be adjusted appropriately according to the inside depth of the cabinet.

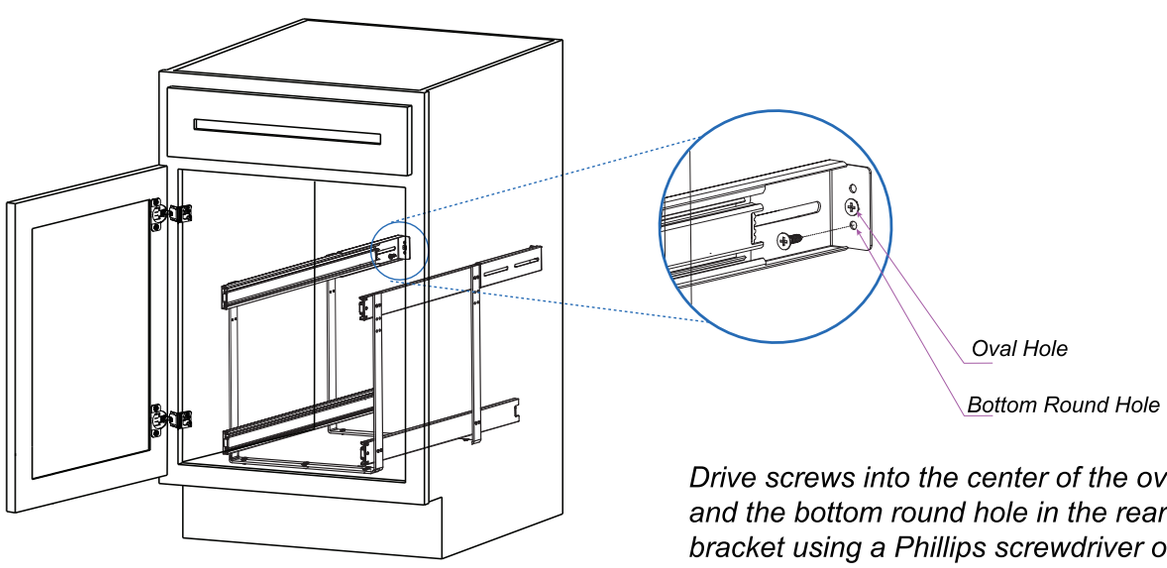

Figure 8

Drive screws into the center of the oval hole and the bottom round hole in the rear mounting bracket using a Phillips screwdriver or an electric hand drill with a Phillips drill bit.

(Note: You can loosen the screws in the oval holes to make the upper slides left-right position adjustments.)

STEP 3 Install Inner Rails To The Two Storage Organizers (A)

Align holes in inner rails with pilot holes in side panels of the organizer, then secure the inner rails to the side panels with 6PCS M3.5×12 Wood Screws. (See Figure 9, 10)

Note: The installation steps for inner rails of the two organizers are the same. Each organizer requires 6PCS M3.5×12 Wood Screws for installation.

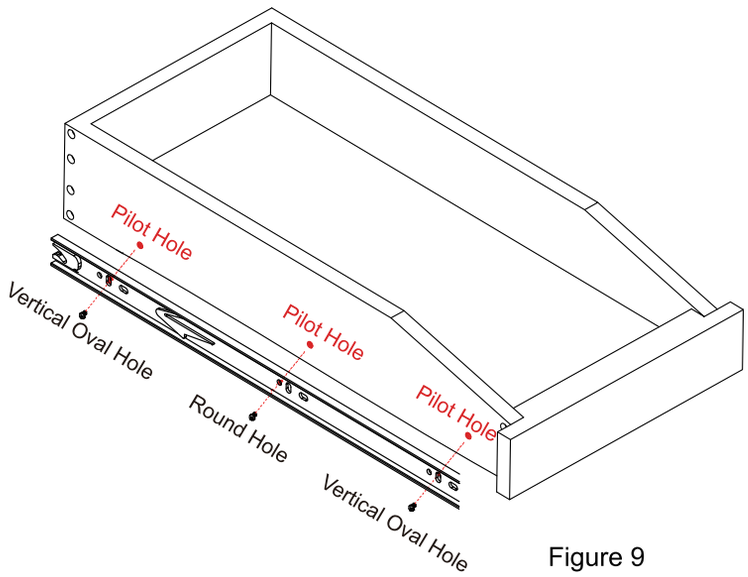

Figure 9

■ ***Pay attention to the installation direction of the inner rails:***

The end shown in the following figure is the back end of inner rail (Slide With Soft Close)

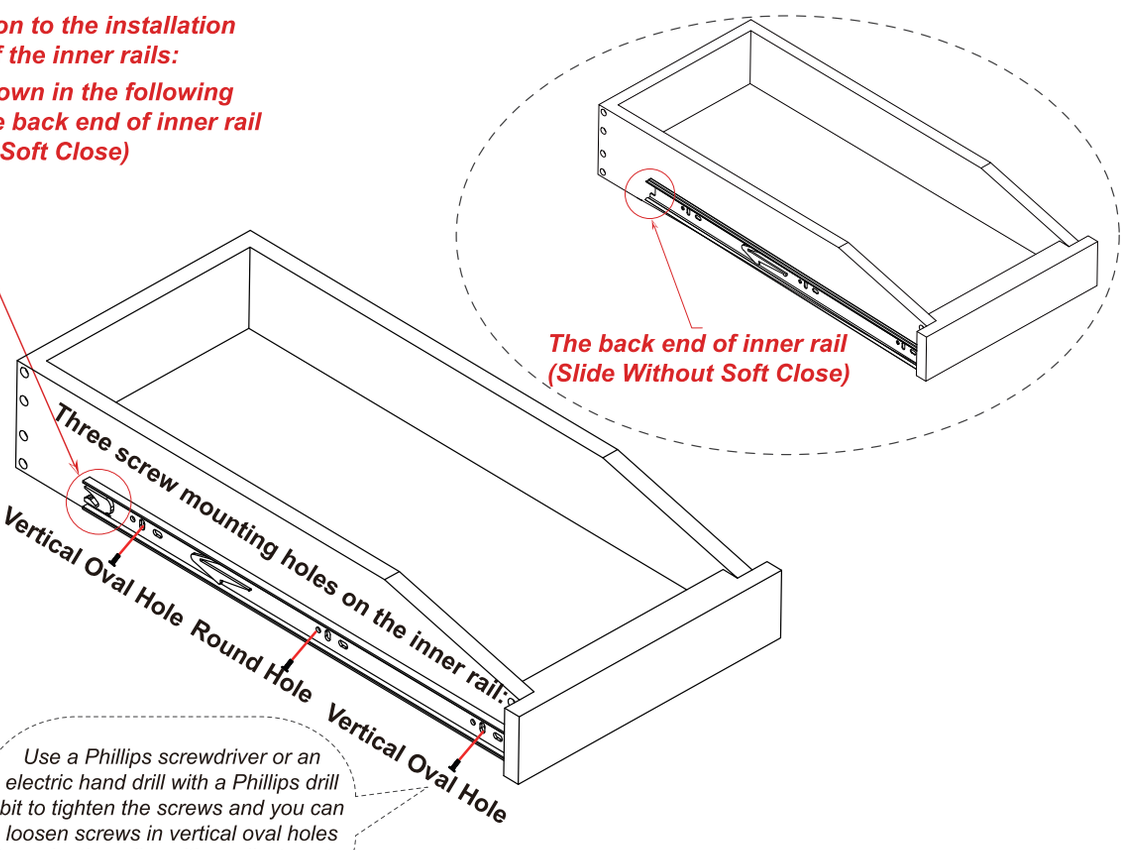

Figure 10

STEP 4 Attach Two Storage Organizers To Frame Structure

STEP 4-1

Attach the organizer to the lower slides. (See Figure 11, 12)

Note: For both lower slides, slide the inner ball bearing carriage all the way forward to the stop, then insert the organizer into the frame slides and push the organizer back until you feel that the slides have fully engaged.

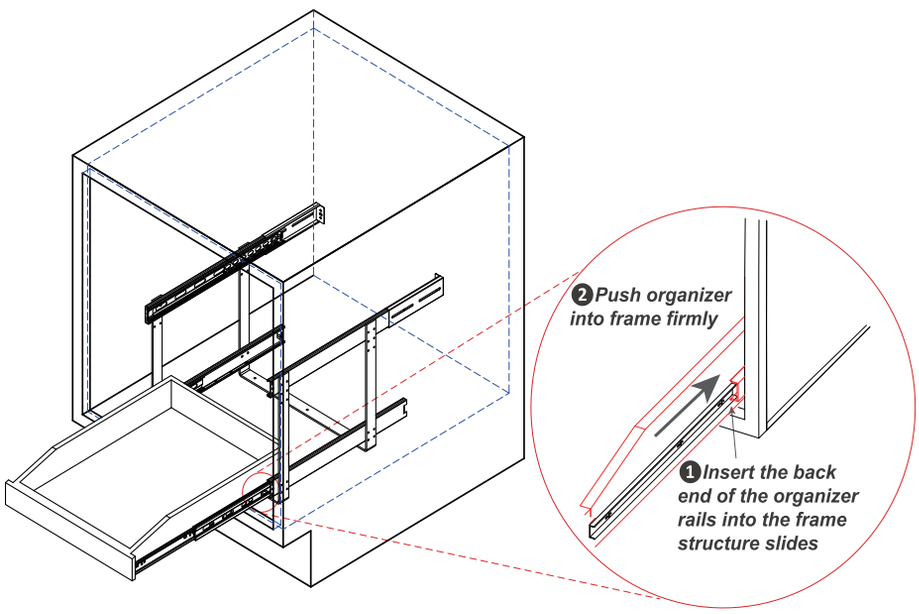

Figure 11

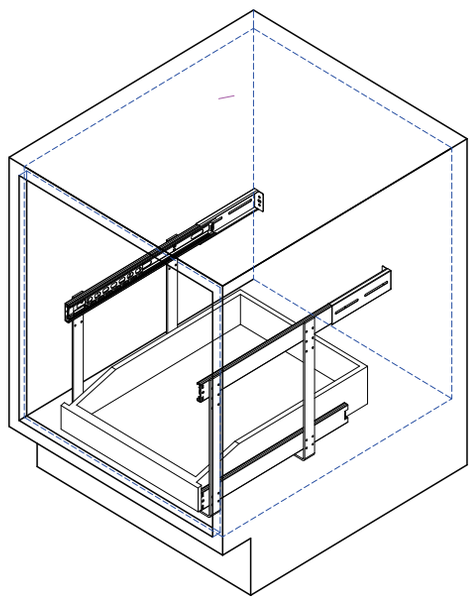

Figure 12

STEP 4-2

Attach the organizer to the upper slides. (See Figure 13, 14)

Note: For both upper slides, slide the inner ball bearing carriage all the way forward to the stop, then insert the organizer into the frame slides and push the organizer back until you feel that the slides have fully engaged.

The installation of this product is complete.
